B-450 EMT Scope of Practice		
DATE	NAME	PUBLIC COMMENT
1/15/2025	Claudia Rempel	A. d. - will CPAP machines be required in the future? B. 2 - PICC line and port-a-cath not listed specifically. Is this sentence intentionally meant to be vague?
1/31/2025	Christopher Kahn	Adding CPAP to the EMT local scope, consistent with CCR 100066.02(a)(6)(E), is an excellent idea. We also agree with the removal of the item formerly labeled III.B.5 limiting EMT transport after ALS treatment, particularly given the extensive offload delays that are symptomatic of significant system stress. If a patient is safe for BLS transport, they should be allowed to have a BLS transport.
