

Youth Services Survey (YSS)

November 2014 Survey Period
San Diego County

Children, Youth & Families Behavioral Health Services

Report prepared by the
Child & Adolescent Services Research Center (CASRC)

April 2015

Overview

One way to ensure that services are responsive to consumer needs is to collect information from youth and families about their satisfaction with services and their perspectives on the quality of services. In San Diego County, data on consumer satisfaction was collected through the Youth Services Survey (YSS), which is completed by **all youth (ages 13+)** and **all available parents/caregivers**, regardless of the youth/client age. The majority of questions on the YSS focus on satisfaction with the provision and results of services.

This report focuses on results of the YSS from the November 17—21, 2014 survey administration period. Two YSS measures were independently evaluated: **YSS compliance** and **YSS results**.

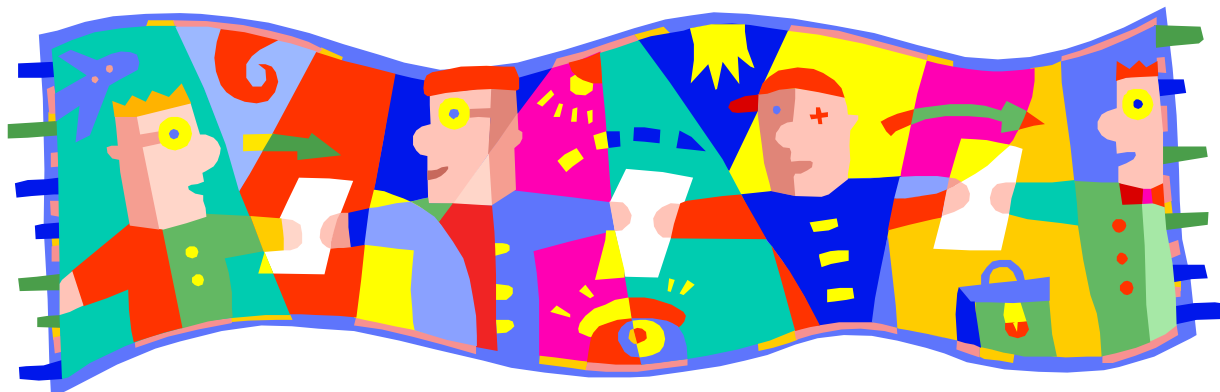

YSS compliance is determined by using Client ID numbers to compare the number of clients receiving services (as reported in Anasazi) to the number of clients who submitted surveys during the November 2014 YSS period. During the survey period, 412 (10.8%) of the 3,814 completed forms did not match to a client with a billed service. There are several reasons why this may have occurred: 1) Client ID number error on the survey, 2) delays in billing data entered into Anasazi; i.e., client got a billed service, but it had not yet been entered in Anasazi at the time of data download, or 3) client should not have been given a survey (client had an open episode, but did not receive a billed service during the YSS period).

YSS results are calculated directly from submitted surveys. The YSS gives a snapshot in time of youth receiving behavioral health services, and whether client data changes with duration of services received. Specifically, the YSS provides data regarding three outcome areas of interest: consumer satisfaction, recent substance use, and recent arrests.

Individual items on the YSS are grouped into seven domains for analysis:

1. General Satisfaction
2. Perception of Access
3. Perception of Cultural Sensitivity
4. Perception of Participation in Treatment Planning
5. Perception of Outcomes of Services
6. Perception of Functioning
7. Perception of Social Connectedness

Clients may receive multiple services from more than one program during the YSS period; therefore, a single client may submit multiple forms. Results are evaluated by item and by domain, at the systemwide, level of care, and program levels.

Key Findings

1. The County process objective of 80% of clients submitting a YSS form was met and exceeded in November 2014: 92% of the 3,411 clients receiving a service submitted a YSS form. Submission rates are at their highest since the process objective was set.
2. The County outcome objective of 80% of clients responding “agree” or “strongly agree” for at least 75% of the survey items was met for parents/caregivers but was not met for youth.
3. Both parents/caregivers and youth were most satisfied with the *Perception of Cultural Sensitivity* domain. Parents/caregivers and youth were least satisfied with the *Perception of Outcomes of Services* domain.
4. Youth were less satisfied than parents on every domain except *Perception of Outcomes of Services*.
5. The greatest disparities in satisfaction between youth and parents/caregivers were found in the *Perception of Access* and *Perception of Participation in Treatment Planning* domains.
6. Satisfaction and perception of outcomes varied substantially among different levels of care in the Children, Youth and Families Behavioral Health Services (CYFBHS) system, especially among youth. On average, youth receiving Case Management services were most satisfied and youth receiving Day Treatment services were least satisfied. Parents/caregivers reported higher levels of satisfaction across all levels of care; parents/caregivers of youth receiving Day Treatment services were least satisfied.
7. Satisfaction and perception of outcomes also varied widely among different racial/ethnic groups. Hispanic clients and their parents/caregivers had the highest levels of satisfaction with the *Perception of Outcomes of Services* and *Perception of Access* domains, as compared to other racial/ethnic groups. On average, Asian/Pacific Islander youth and their parents/caregivers were least satisfied among the racial/ethnic groups with the *General Satisfaction* domain. Native American clients and their parents/caregivers reported the lowest levels of satisfaction across racial/ethnic groups with the *Perception of Cultural Sensitivity*, *Perception of Outcomes of Services* and *Perception of Functioning* domains; however, only 22 completed surveys were submitted for Native American youth and their parents/caregivers, which means the averages may not be generalizable to the population.
8. On average, satisfaction and perception of outcomes were highest among the youngest (ages 0-5 years) and the oldest (18+ years) clients served and/or their parents/caregivers.
9. One-quarter of youth who responded to the recent substance use question on the YSS reported substance use within the past month; the most commonly used substances were marijuana, cigarettes, and alcohol. Overall, clients in service six months to one year reported less substance use than clients who received less than six months, or more than one year, of treatment services.
10. Six percent of youth who responded to the recent arrest question on the YSS reported an arrest within the past month. Overall, clients in services six months to one year had fewer arrests than clients who received less than six months, or more than one year, of treatment services.

CYFBHS Process Objective

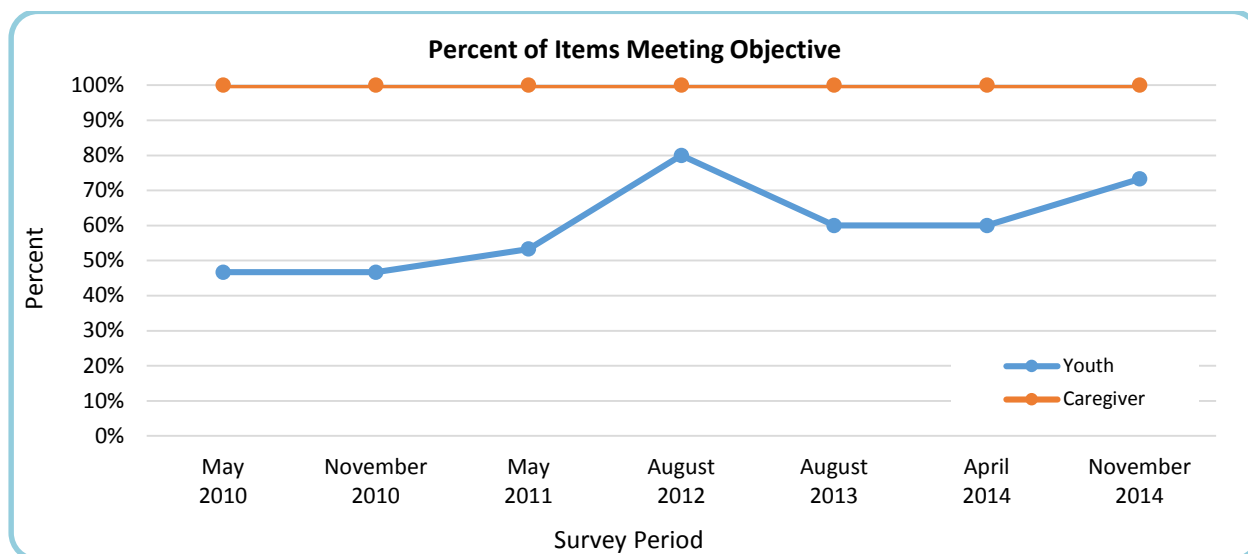

Providers are tasked with the administration of a YSS survey to every client (and/or parent/caregiver) receiving a service during the survey period. The process objective set by the County is 80% of eligible clients submitting a YSS form; this objective has been met and exceeded during every survey period since November 2006. The process objective is calculated using the number of clients served during the survey period, as opposed to the number of forms received. In the current survey period, **92% of 3,411 clients receiving a service submitted a YSS form, and 77% of 3,411 clients receiving a service completed a YSS form.**

CYFBHS Outcomes Objective

More than 5,100 survey forms were submitted for the November 2014 YSS (3,389 forms from caregivers and 1,732 forms from youth). More than 3,800 of the forms were completed and had useable data (2,444 forms from caregivers and 1,370 forms from youth). Overall, **74% of the forms that were turned in were completed.** Reasons for non-completion include refusals, parent/caregiver not available (e.g., for a child in out-of-home care), and caregiver or child not showing up for a scheduled appointment.

The first 15 items on the YSS address satisfaction, while the remaining items cover client demographics, outcomes of services, and involvement with police and schools. The County has established an **outcome objective for the satisfaction items** which applies to all contractors: Aggregated scores on the Youth Services Survey (YSS) and the Youth Services Survey Family (YSS-F) shall show an average of 80% or more of clients responding in the two most favorable categories (Agree and Strongly Agree) for at least 75% of the individual survey items. Countywide data on the outcomes objective are presented in this report.

Parents/caregivers were more satisfied with services than Youth respondents. Since the outcomes objective was initiated in November 2006, **parent scores have been above 80% for all of the satisfaction items on the survey**, and the objective has been satisfied. For youth respondents, the scores are lower; this has been true since the inception of these YSS measures. The County's objective was not met during the November 2014 YSS; at least 80% of youth responded in the two most favorable categories for 73% of the individual survey items. It is notable that **youth scores on all individual items were above the 75% level with the exception of one item: "I helped to choose my services" (66% replied Agree or Strongly Agree).**

Survey Response Rate

	Parent/Caregiver	Youth	TOTAL
Forms Submitted	3,389	1,732	5,121
Forms Completed	2,444	1,370	3,814

Satisfaction by Item Response: Systemwide*

Caregiver Satisfaction by Item		
Questions based on services received in last 6 months:	% Strongly Disagree/Disagree	% Strongly Agree/Agree
1. Overall, I am satisfied with the services my child received	2.0%	92.4%
2. I helped to choose my child's services	4.9%	90.1%
3. I helped to choose my child's treatment goals	3.0%	92.0%
4. The people helping my child stuck with us no matter what	3.6%	90.0%
5. I felt my child had someone to talk to when he/she was troubled	2.9%	90.8%
6. I participated in my child's treatment	1.6%	95.8%
7. The services my child and/or family received were right for us	2.3%	88.7%
8. The location of services was convenient for us	4.6%	92.1%
9. Services were available at times that were convenient for us	3.7%	93.4%
10. My family got the help we wanted for my child	2.9%	86.1%
11. My family got as much help as we needed for my child	4.1%	81.7%
12. Staff treated me with respect	1.9%	97.4%
13. Staff respected my family's religious/spiritual beliefs	1.8%	95.7%
14. Staff spoke with me in a way that I understood	1.6%	97.8%
15. Staff were sensitive to my cultural/ethnic background	2.0%	95.6%
At least 80% of clients responded "Agree" or "Strongly Agree" to 15 of 15 questions – 100%		
As a result of the services received:	% Strongly Disagree/Disagree	% Strongly Agree/Agree
16. My child is better at handling daily life	6.3%	69.9%
17. My child gets along better with family members	7.6%	71.8%
18. My child gets along better with friends and other people	6.5%	71.4%
19. My child is doing better in school and/or work	9.4%	68.5%
20. My child is better able to cope when things go wrong	10.1%	64.3%
21. I am satisfied with our family life right now	12.9%	66.8%
22. My child is better able to do things he or she wants to do	7.8%	69.9%
23. I know people who will listen and understand me when I need to talk	2.8%	91.4%
24. I have people that I am comfortable talking with about my child's problem(s)	3.3%	91.6%
25. In a crisis, I would have the support I need from family or friends	4.6%	88.3%
26. I have people with whom I can do enjoyable things	3.8%	91.1%

*Percent may not add up to 100, as "Undecided" response is not reported here.

Youth Satisfaction by Item		
Questions based on services received in last 6 months:	% Strongly Disagree/Disagree	% Strongly Agree/Agree
1. Overall, I am satisfied with the services I received	4.4%	85.4%
2. I helped to choose my services	13.0%	66.2%
3. I helped to choose my treatment goals	6.1%	82.2%
4. The people helping me stuck with me no matter what	5.8%	79.8%
5. I felt I had someone to talk to when I was troubled	7.1%	79.6%
6. I participated in my own treatment	3.5%	84.6%
7. I received that were right for me	4.3%	82.4%
8. The location of services was convenient for me	6.4%	81.6%
9. Services were available at times that were convenient for me	5.7%	81.1%
10. I got the help I wanted	6.3%	80.0%
11. I got as much help as I needed	6.8%	75.8%
12. Staff treated me with respect	4.2%	89.2%
13. Staff respected my religious/spiritual beliefs	3.0%	88.6%
14. Staff spoke with me in a way that I understood	3.5%	90.3%
15. Staff were sensitive to my cultural/ethnic background	4.3%	83.2%
<i>At least 80% of clients responded "Agree" or "Strongly Agree" to 11 of 15 questions – 73%</i>		
As a result of the services received:	% Strongly Disagree/Disagree	% Strongly Agree/Agree
16. I am better at handling daily life	7.0%	71.4%
17. I get along better with family members	11.8%	64.5%
18. I get along better with friends and other people	6.5%	74.1%
19. I am doing better in school and/or work	10.2%	66.9%
20. I am better able to cope when things go wrong	8.2%	68.8%
21. I am satisfied with my family life right now	13.4%	61.2%
22. I am better able to do things I want to do	8.8%	69.1%
23. I know people who will listen and understand me when I need to talk	5.1%	84.0%
24. I have people that I am comfortable talking with about my problem(s)	7.2%	80.5%
25. In a crisis, I would have the support I need from family or friends	7.3%	78.2%
26. I have people with whom I can do enjoyable things	4.0%	85.9%

**Percent may not add up to 100, as "Undecided" response is not reported here.*

Satisfaction by Domain: Systemwide

DOMAIN	Percent Stating Agree or Strongly Agree	
	Caregiver (N=2,444)	Youth (N=1,370)
General Satisfaction (Items 1, 4, 5, 7, 10, 11)	88.7%	80.8%
Perception of Access (Items 8, 9)	90.2%	76.7%
Perception of Cultural Sensitivity (Items 12, 13, 14, 15)	96.7%	87.7%
Perception of Participation in Treatment Planning (Items 2, 3, 6)	93.1%	78.8%
Perception of Outcomes of Services (Items 16, 17, 18, 19, 20, 21)	66.2%	67.5%
Perception of Functioning (Items 16, 17, 18, 20, 22)	69.2%	71.3%
Perception of Social Connectedness (Items 23, 24, 25, 26)	90.3%	81.3%

Satisfaction by Level of Care

Caregiver Satisfaction by Level of Care				
DOMAIN	Percent Stating Agree or Strongly Agree			
	Outpatient (N=1,953)	Day Treatment (N=163)	Case Management (N=213)	TBS (N=115)
General Satisfaction	89.1%	80.1%	89.9%	91.3%
Perception of Access	90.8%	76.1%	95.2%	92.7%
Perception of Cultural Sensitivity	96.8%	92.8%	97.5%	98.1%
Perception of Participation in Treatment Planning	94.1%	82.8%	92.2%	92.1%
Perception of Outcomes of Services	66.6%	63.9%	65.8%	62.2%
Perception of Functioning	69.5%	63.7%	68.7%	73.0%
Perception of Social Connectedness	90.3%	87.9%	92.7%	87.7%

Youth Satisfaction by Level of Care				
DOMAIN	Percent Stating Agree or Strongly Agree			
	Outpatient (N=884)	Day Treatment (N=291)	Case Management (N=156)	TBS (N=39)
General Satisfaction	83.8%	68.7%	88.3%	73.7%
Perception of Access	81.0%	56.0%	88.4%	86.5%
Perception of Cultural Sensitivity	92.1%	70.3%	94.0%	92.3%
Perception of Participation in Treatment Planning	82.2%	69.4%	78.6%	74.4%
Perception of Outcomes of Services	65.7%	67.9%	77.0%	65.8%
Perception of Functioning	70.7%	69.2%	77.0%	76.3%
Perception of Social Connectedness	83.7%	72.5%	84.9%	80.0%

NOTE: Not every youth/caregiver completed responses for every domain.

Satisfaction by Client Race/Ethnicity

DOMAIN	Percent Stating Agree or Strongly Agree							
	White (N=625)	Hispanic (N=2,300)	African- American (N=274)	Asian/ Pacific Islander (N=60)	Native American (N=22)	Mixed Race/ Ethnicity (N=242)	Other (N=55)	Unknown /Missing (N=236)
General Satisfaction	84.1%	88.2%	80.5%	79.7%	95.5%	79.8%	83.0%	80.0%
Perception of Access	84.1%	87.4%	82.4%	81.4%	81.8%	76.6%	82.7%	83.7%
Perception of Cultural Sensitivity	95.2%	94.4%	90.2%	92.7%	86.4%	89.7%	88.2%	87.6%
Perception of Participation in Treatment Planning	90.4%	88.7%	85.3%	86.0%	95.5%	85.7%	80.4%	78.7%
Perception of Outcomes of Services	61.0%	69.8%	61.9%	70.2%	47.6%	56.8%	66.7%	68.4%
Perception of Functioning	64.8%	72.7%	65.8%	73.2%	57.1%	62.4%	76.5%	68.5%
Perception of Social Connectedness	89.6%	87.0%	88.6%	89.5%	90.5%	84.5%	82.7%	81.1%

Satisfaction by Client Age

DOMAIN	Percent Stating Agree or Strongly Agree				
	0-5 years (N=291)	6-11 years (N=977)	12-15 years (N=1,478)	16-17 years (N=934)	18+ years (N=134)
General Satisfaction	92.4%	87.8%	84.2%	83.6%	91.7%
Perception of Access	89.4%	90.4%	82.5%	83.2%	87.7%
Perception of Cultural Sensitivity	97.3%	96.9%	92.6%	89.7%	95.2%
Perception of Participation in Treatment Planning	94.3%	93.6%	84.4%	85.2%	90.8%
Perception of Outcomes of Services	74.5%	65.9%	64.3%	67.3%	77.3%
Perception of Functioning	75.9%	68.6%	68.2%	71.0%	80.6%
Perception of Social Connectedness	95.2%	89.7%	85.0%	84.8%	88.4%

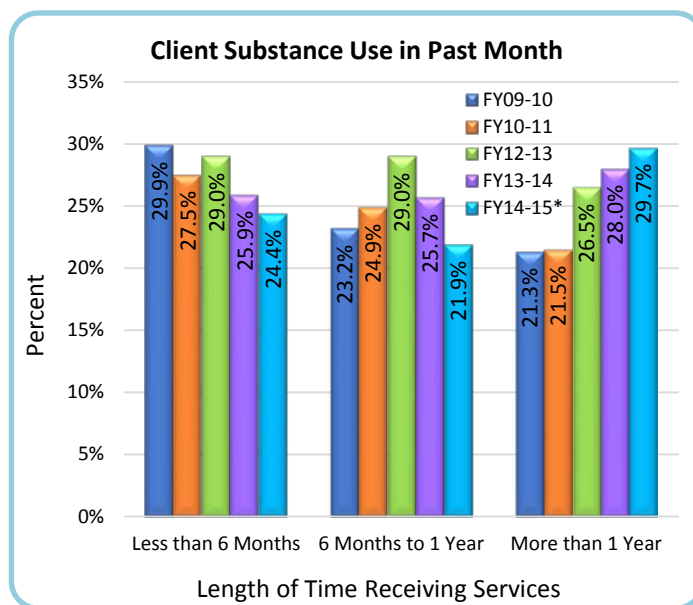

NOTE: Not every youth/caregiver completed responses for every domain.

Substance Use by Length of Service

On the YSS, youth ages 13+ were asked whether they had used any of a list of substances (alcohol, cigarettes, ecstasy, cocaine, marijuana, crystal meth, inhalants, hallucinogens, opiates, injected drugs) in the past month. 1,280 youth survey responses to the substance use question were submitted for the November 2014 survey period.

Overall, 25% of youth stated that they had used one of these substances at least once in the past month.

The three most commonly used substances in the past month were: Marijuana (15.6%), Cigarettes (12.7%) and Alcohol (11.0%).

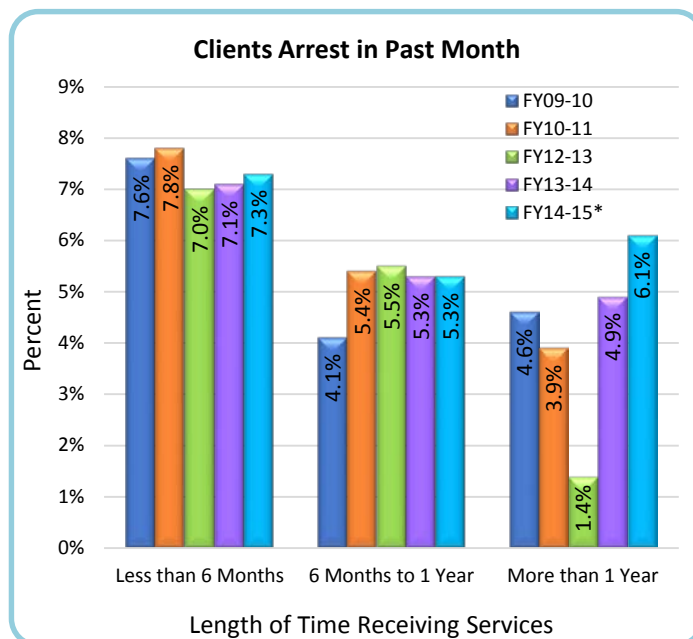

*November 2014 survey period

Arrests by Length of Service

On the YSS, youth ages 13+ were asked to report on whether they had been arrested for any crimes in the past month, and if so, how many times they had been arrested. 1,321 youth survey responses to the arrest question were submitted for the November 2014 survey period.

Overall, clients in services six months to one year had fewer arrests than clients who received less than six months, or more than one year, of treatment. It is important to note that due to the small number of total clients (N=97 in November 2014) who reported arrests, small changes in numbers can have large effects on proportion.

*November 2014 survey period

The Child and Adolescent Services Research Center (CASRC) is a consortium of over 100 investigators and staff from multiple research organizations in San Diego County and Southern California, including: Rady Children's Hospital, University of California San Diego, San Diego State University, University of San Diego and University of Southern California. The mission of CASRC is to improve publicly-funded behavioral health service delivery and
