

## SERVICE STRUCTURE

- 1** The federal government and State of CA provide funding and regulations to the County of San Diego to serve as the Specialty Mental Health Provider for children with Medi-Cal. The County extends these services to low income, uninsured or underinsured children.
- 2** Within the County, the Health & Human Services Agency tasks the Department of Behavioral Health Services' Children, Youth & Families System of Care (BHS-CYF) with ensuring children receive these needed services.
- 3** BHS-CYF partners with school district staff to determine need and appropriate staffing at schools.
- 4** BHS-CYF contracts with community based organizations (CBOs) to provide behavioral health and support services at local school and community sites.
- 5** Once they receive a contract from BHS-CYF, CBOs enter into a Memorandum of Understanding (MOU) with the school district detailing services and expectations.
- 6** CBO's behavioral health providers work together with school site leadership to identify children in need and provide SchoolLink services.
