FEBRUARY 2019

Please complete the anonymous [SchoolLink Website & Tools Survey](#)

by February 28, 2019!

For many years, the County of San Diego's Health and Human Services Agency has partnered with local school districts to provide on-campus behavioral health services for eligible Medi-Cal and uninsured students in need. In the fall of 2018, the County rebranded these services under the name "SchoolLink" and launched a new SchoolLink website with embedded documents and tools.

We need your constructive feedback on the SchoolLink website & tools. Please help us refine and enhance these new resources by completing this [10 minute, anonymous survey](#) by **February 28, 2019**.

If you're a HHS contracted school-based behavioral health provider, please also forward the survey link to the school staff and administrators you work with on your campuses.

Please contact your supervisor with any questions. The County COR is also available to provide Technical Assistance through your Program Manager.

Thank you for all that you do for San Diego kids!
