INTRODUCTION

North Central Region consists of seven subregional areas (SRAs): Coastal, Del Mar-Mira Mesa, Elliott-Navajo, Kearny Mesa, Miramar, Peninsula, and University. This health status report summary provides the most current information on demographic characteristics, socioeconomic factors, and health concerns in North Central Region and its SRAs.

The key segments of this report include:

- 1) **Demographic Characteristics:** This section includes an overview of the 2019 population characteristics (e.g., age, race/ethnicity, household income, health insurance coverage, disability status, etc.) for North Central Region. Characteristics for SRAs are reported in comparison with North Central Region and San Diego County.
- 2) **Mortality Measures:** This section includes a summary of overall life expectancy for North Central Region and its SRAs in 2019. Life expectancy is one of the Top 10 Indicators measured for the County of San Diego's *Live Well San Diego* vision for healthier, safer, and thriving communities. This section, additionally, lists the Top 10 Leading Causes of Death in 2019 for North Central Region, outlining the relative burden of a specific cause of death compared to other causes.
- 3) **Health Outcomes:** This section summarizes health-related information such as rates of death, emergency department (ED) discharge, and hospitalization for the following group of health conditions and indicators:
 - a) Non-Communicable (Chronic) Diseases,
 - b) Communicable Diseases,
 - c) Injury Indicators,
 - d) Behavioral Health Indicators, and
 - e) Maternal and Child Health Indicators.

Health Status Overview (2019): North Central Region

DEMOGRAPHIC CHARACTERISTICS

Population Characteristics

Population: 656,404 (19.8% of San Diego County population)
Age Distribution: Highest proportion consisted of individuals aged **25-44 years old (33.2%)**, followed by individuals aged **45-64 years old (23.5%)**

Income, Health Insurance, Disability Status

Median Household Income: \$100,965
Population Below 200% Federal Poverty Level (FPL): 20.8%
Population with Health Insurance: 94.5%
Population with Disability: 8.1%

MORTALITY MEASURES

Overall Life Expectancy: 84.5 years

Top 5 Leading Causes of Death: Cancer, Diseases of the heart, Alzheimer's Disease, Stroke, Accidents/Unintentional injuries

HEALTH OUTCOMES

Non-Communicable (Chronic) Diseases

Highest Death Rate: Overall cancer (131.4 per 100,000)
Highest ED Discharge Rate: Overall heart disease (1,395.1 per 100,000)
Highest Hospitalization Rate: Overall heart disease (780.0 per 100,000)

Communicable Diseases

Highest Death Rate: Pneumonia (5.4 per 100,000)
Highest ED Discharge Rate: Urinary tract infection (412.1 per 100,000)
Highest Hospitalization Rate: Pneumonia (87.0 per 100,000)

Injury Indicators

Highest Death Rate: Suicide (12.6 per 100,000)
Highest ED Discharge Rate: Falls (1,666.2 per 100,000)
Highest Hospitalization Rate: Falls (364.1 per 100,000)

Behavioral Health Indicators

Highest Death Rate: Alzheimer's disease and related dementias (ADRD) (83.7 per 100,000)
Highest ED Discharge Rate: Alcohol-related disorders (242.6 per 100,000)
Highest Hospitalization Rate: Alcohol-related disorders (43.9 per 100,000)

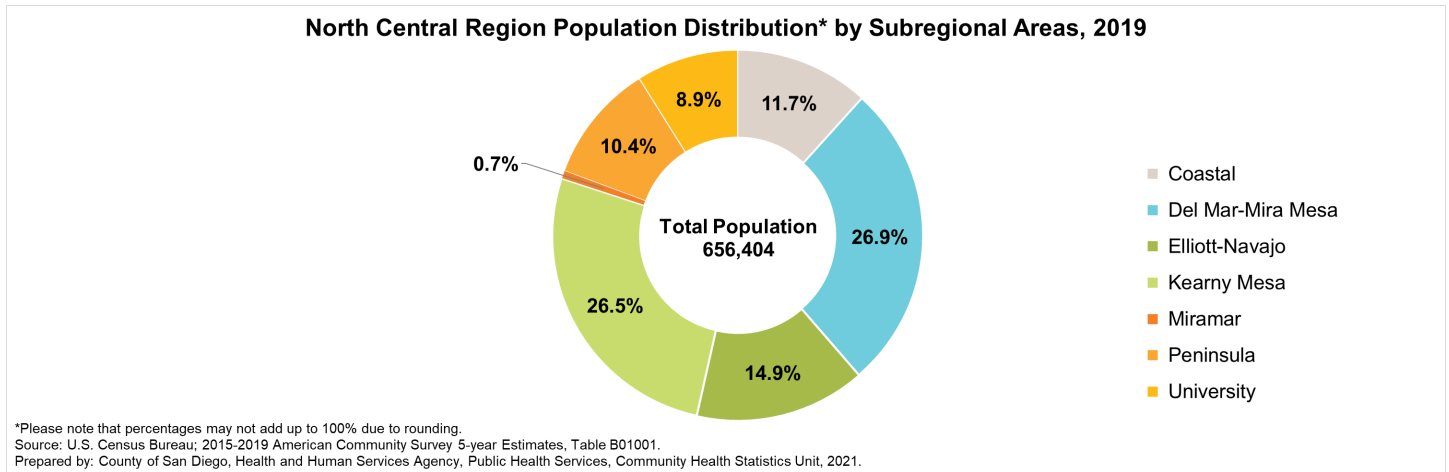

Maternal and Child Health Indicators

Total Live Births: 6,946
Preterm Births: 7.7%
Low Weight Births: 6.2%
Infant Mortality Rate: 4.0 per 1,000 total live births
Fetal Mortality Rate (2018): 3.0 per 1,000 live births plus fetal deaths

DEMOGRAPHIC CHARACTERISTICS

Population Characteristics

In 2019, North Central Region was home to an estimated 656,404 residents, representing 19.8% of the San Diego County population (3,316,073).

Adults aged 25-44 years old, constituted the highest proportion of North Central Region residents (33.2%), followed by residents 45-64 years old (23.5%). Among North Central Region subregional areas (SRAs), Coastal had the highest proportion of adults aged 25-44 years old (37.9%), followed by University (37.1%) and Peninsula (35.1%). In 2019, over half of residents in Miramar SRA were aged 15-24 years old (52.8%).

North Central Region Health Status Report Summary

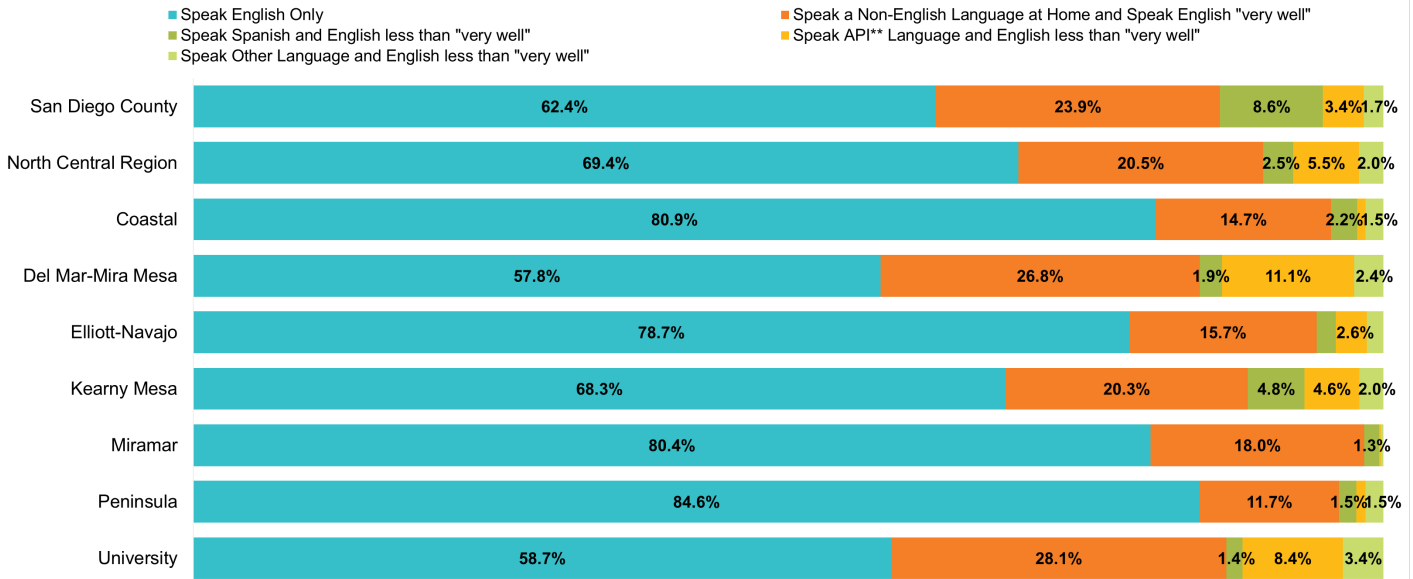

In 2019, residents in North Central Region were primarily White (55.9%), followed by Asian (19.1%), Hispanic (16.6%), Black (3.3%), American Indian/Alaska Native (0.3%), Native Hawaiian and Other Pacific Islander (0.3%), and Other (4.6%). Among North Central Region SRAs, Miramar had the highest proportion of Hispanic residents (31.7%), while Del Mar-Mira Mesa had the lowest proportion (11.2%). Compared to all other Health and Human Services Agency (HHSA) regions, North Central Region had the highest percentage of Asian residents (19.1%). Among North Central Region SRAs, Del Mar-Mira Mesa (37.1%) and University (31.8%) had the highest proportion of Asian residents.

NH refers to Non-Hispanic or Latino
 **AIAN-American Indian/Alaska Native. **NHPI-Native Hawaiian and Other Pacific Islander.

Federal Poverty Level (FPL) refers to a measure of income used to assess eligibility for certain income-based government programs and/or benefits. In 2019, 1 out of 5 residents (20.8%), in North Central Region, lived below 200% FPL. Among North Central Region SRAs, Miramar had the highest proportion of residents living below 200% FPL (54.7%), followed by University (33.2%). Furthermore, the proportion of residents living below 200% FPL in North Central Region was lower than San Diego County overall.

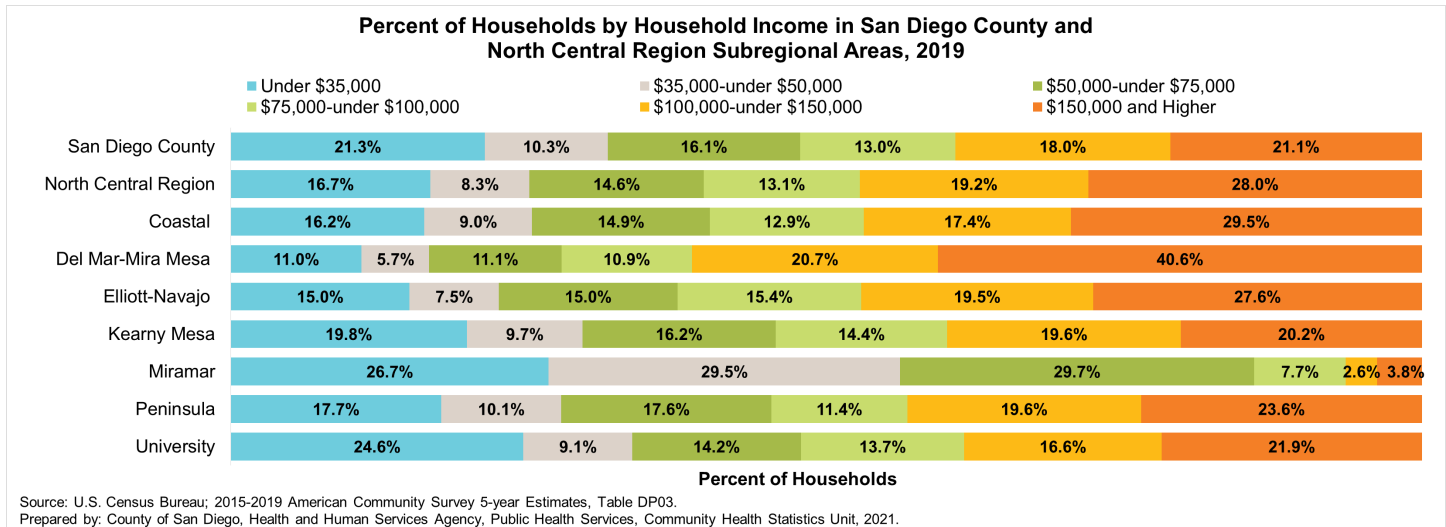

Percent of Population Below 200% Federal Poverty Level (FPL) in San Diego County and North Central Region Subregional Areas, 2019

Source: U.S. Census Bureau; 2015-2019 American Community Survey 5-year Estimates, Table S1701. Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2021.

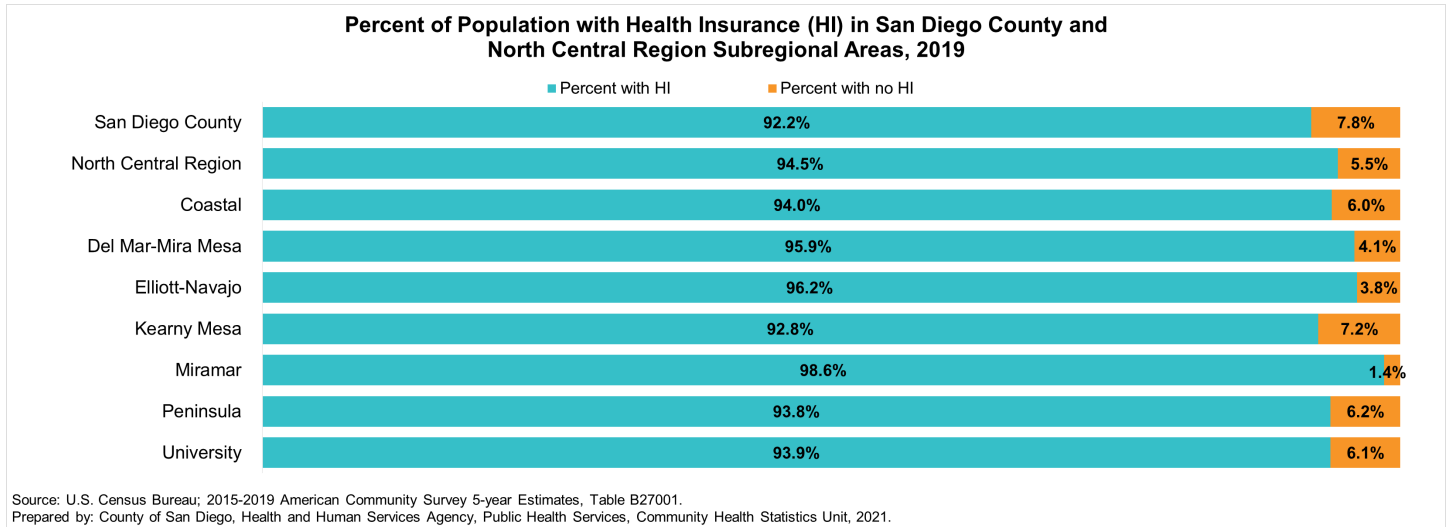

North Central Region Health Status Report Summary

Household income includes the income of the householder and all other individuals 15 years and older in the household, whether they are related to the householder or not. In 2019, 16.7% of households in North Central Region had an annual income of less than \$35,000. Among North Central SRAs, Miramar had the highest proportion of households with an annual income of less than \$35,000 (26.7%), while Del Mar-Mira Mesa had the lowest proportion (11.0%).

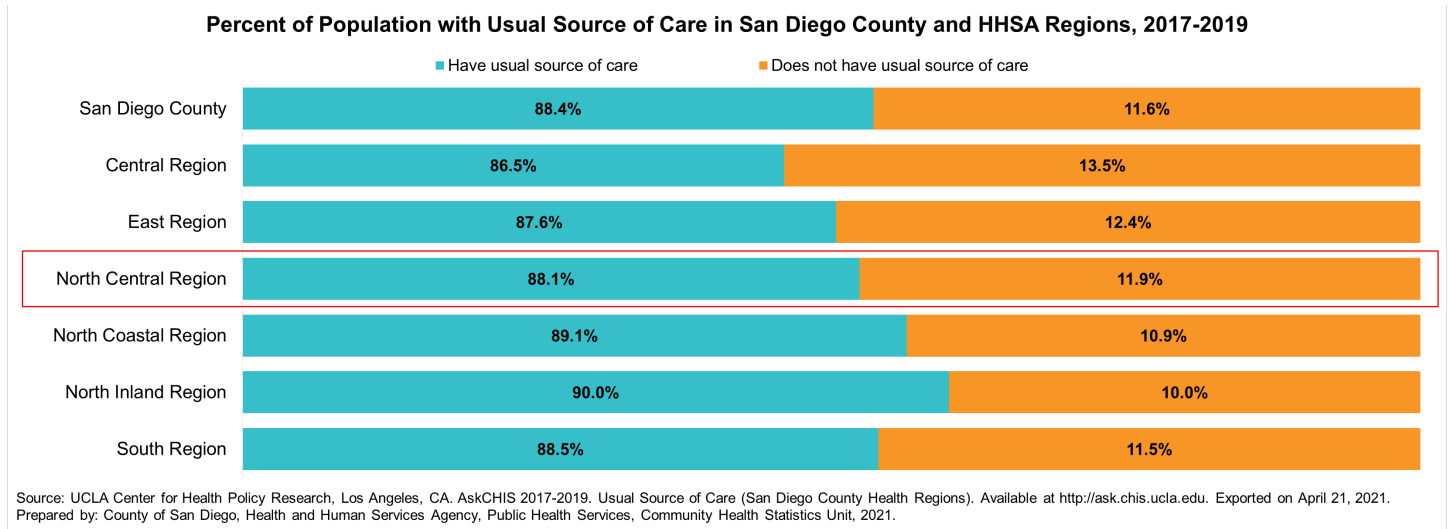

Insurance, Access, and Utilization

In 2019, 94.5% of residents in North Central Region were insured through private or public programs, while 5.5% of residents did not have any health insurance coverage. Among North Central Region subregional areas (SRAs), Kearny Mesa had the highest proportion of residents without health insurance (7.2%), followed by Peninsula (6.2%), University (6.1%), and Coastal (6.0%).

North Central Region Health Status Report Summary

Residents in North Central Region were more likely to report having a usual place to go when sick or needing health advice compared to Central Region and East Region. Between 2017 and 2019, nearly 9 out of 10 residents (88.1%) in North Central Region reported having a usual place to go when sick or needing health advice.

The proportion of adults with income less than 200% of the Federal Poverty Level (FPL) reporting food insecurity in North Central Region was higher than Central Region and North Inland Region. On average, nearly 2 out of 5 adults (36.1%), with income less than 200% FPL, reported an inability to afford enough food in North Central Region, between 2017-2019.

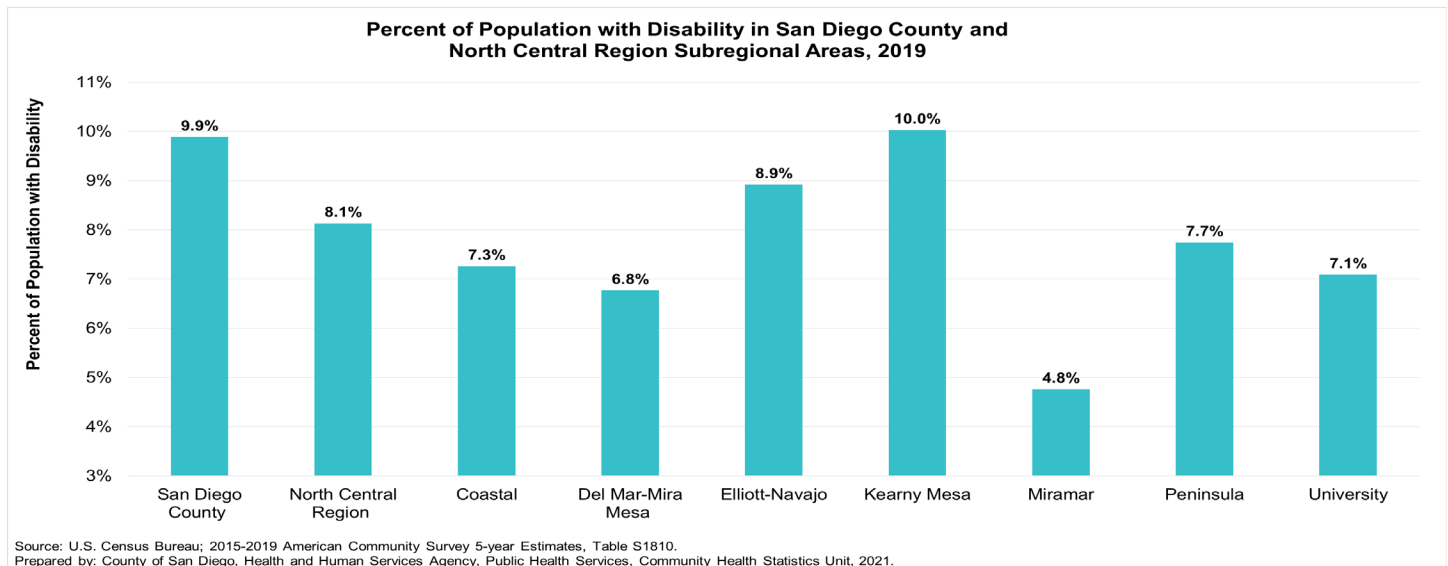

North Central Region Health Status Report Summary

The proportion of residents in North Central Region reporting fair or poor health was lower than all other Health and Human Services Agency (HHSA) regions, except North Coastal Region. In 2019, over 2 out of 3 residents (67.2%) in North Central Region reported excellent or very good health.

Disability Status

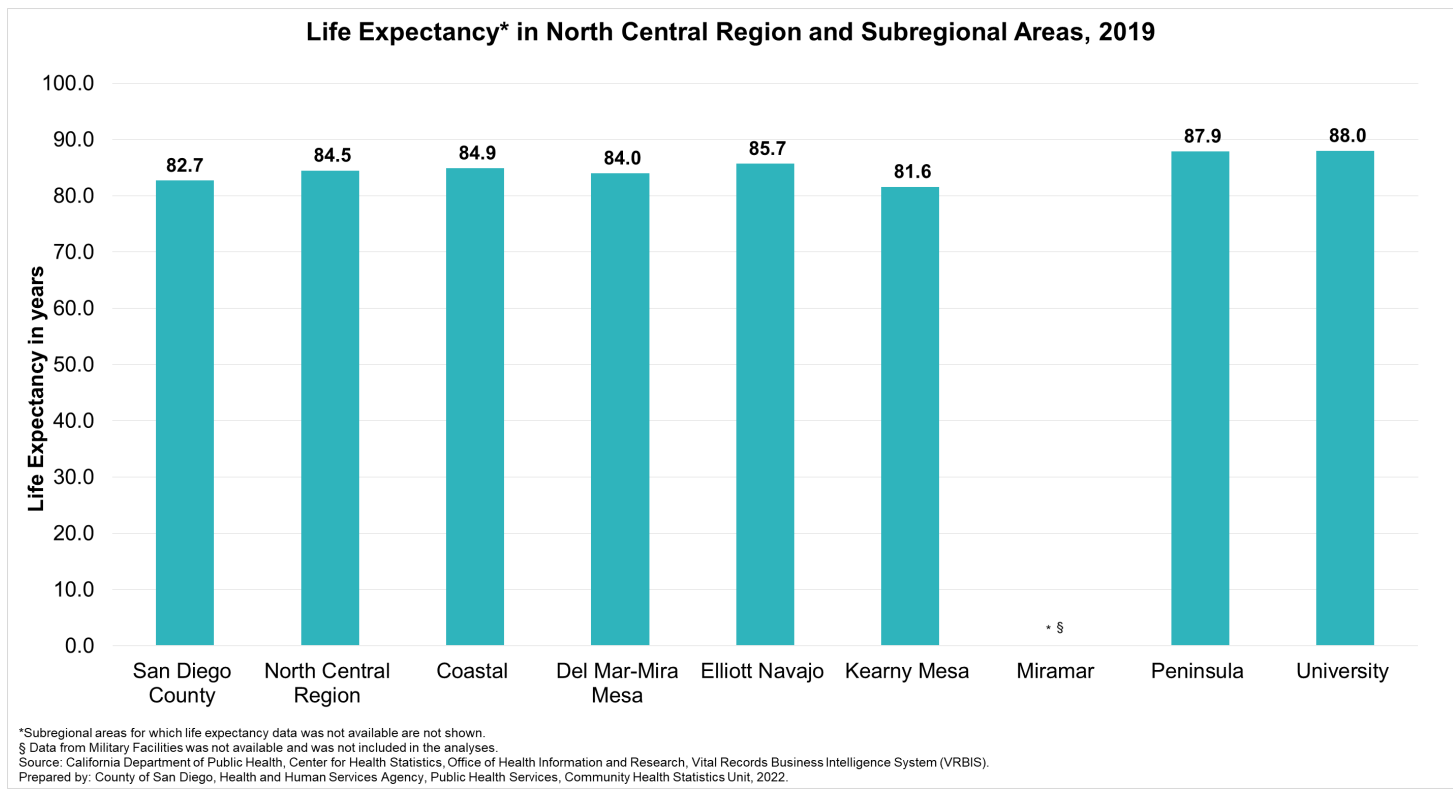

Individuals who report any of the six disability types: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, and independent living difficulty, are considered to have a disability. In 2019, 8.1% of North Central Region residents reported having one or more disabilities. Among North Central Region subregional areas (SRAs), Kearny Mesa (10.0%) and Elliott-Navajo (8.9%) had the highest proportions of residents with a disability, while Miramar had the lowest proportion (4.8%).

MORTALITY MEASURES

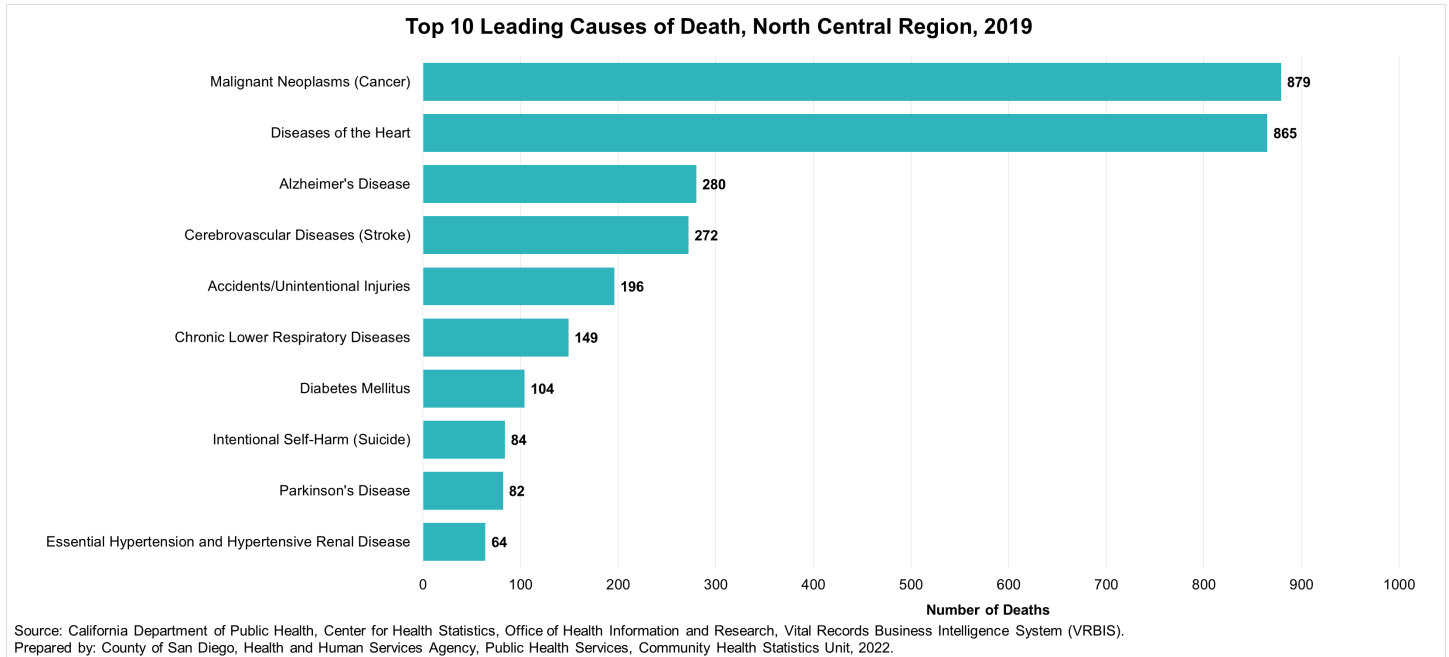

Life Expectancy

Life expectancy is one of the Top 10 Indicators measured for the County of San Diego’s *Live Well San Diego* vision for healthier, safer, and thriving communities. In 2019, a baby born in San Diego County had a life expectancy of 82.7 years, while a baby born in North Central Region had a life expectancy of 84.5 years. All North Central Region subregional areas (SRAs) with available life expectancy data, except Kearny Mesa, had higher life expectancies than San Diego County overall in 2019.

Top 10 Leading Causes of Death

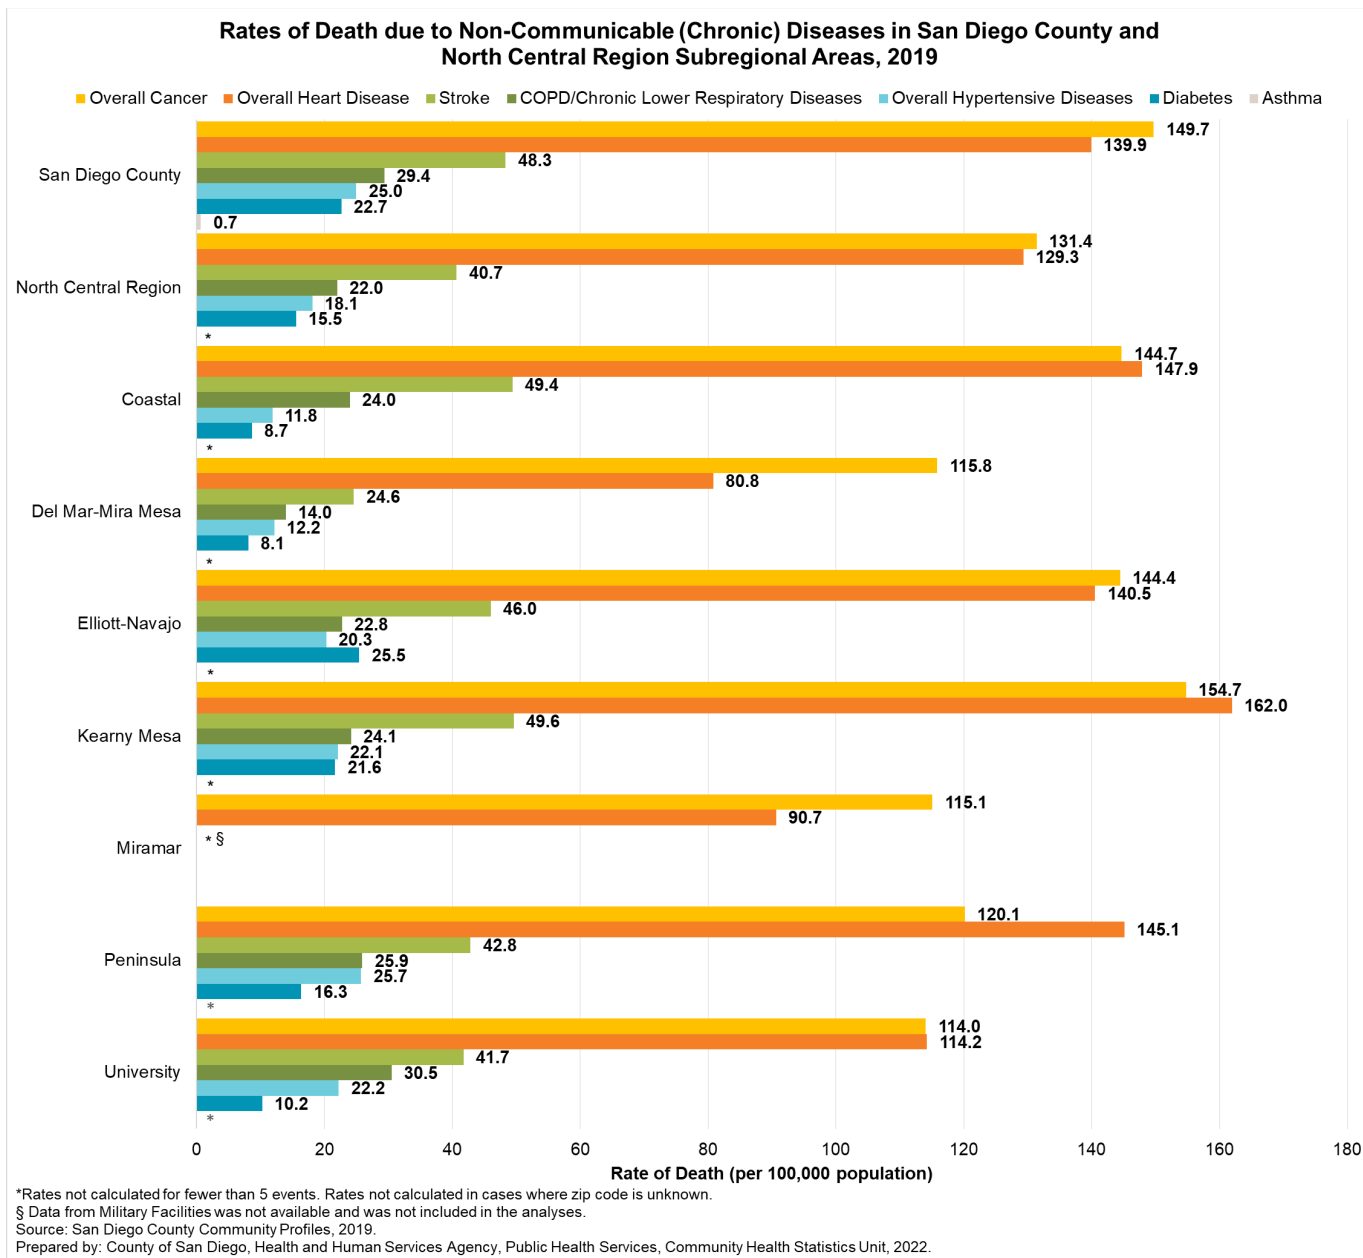

The Leading Causes of Death rankings represent the most frequently occurring causes of death in North Central Region. These rankings help in assessing the relative burden of a specific cause of death compared to all other causes. In 2019, the leading cause of death in North Central Region was cancer, followed by diseases of the heart. In North Central Region, 4 of the top 5 leading causes of death were non-communicable (chronic) diseases (cancer, diseases of the heart, Alzheimer’s Disease, and stroke).

HEALTH OUTCOMES

Non-Communicable (Chronic) Disease

Among non-communicable (chronic) diseases, the highest rate of death was due to overall cancer (131.4 per 100,000), followed by overall heart disease (129.3 per 100,000) in North Central Region in 2019. Among North Central Region subregional areas (SRAs), Kearny Mesa had the highest rate of death due to overall cancer (154.7 per 100,000), while University had the lowest rate of death due to overall cancer (114.0 per 100,000). Similarly, Kearny Mesa SRA had the highest rate of death due to overall heart disease (162.0 per 100,000), while University SRA had the lowest rate of death due to overall heart disease (114.2 per 100,000).

Among non-communicable (chronic) diseases, the highest emergency department (ED) discharge rate was due to overall heart disease in North Central Region and its SRAs in 2019. Moreover, the second-highest ED discharge rate was due to overall hypertensive diseases (218.8 per 100,000) in North Central Region and its SRAs.

*Rates not calculated for fewer than 5 events. Rates not calculated in cases where zip code is unknown.

 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics Unit, 2022.

North Central Region Health Status Report Summary

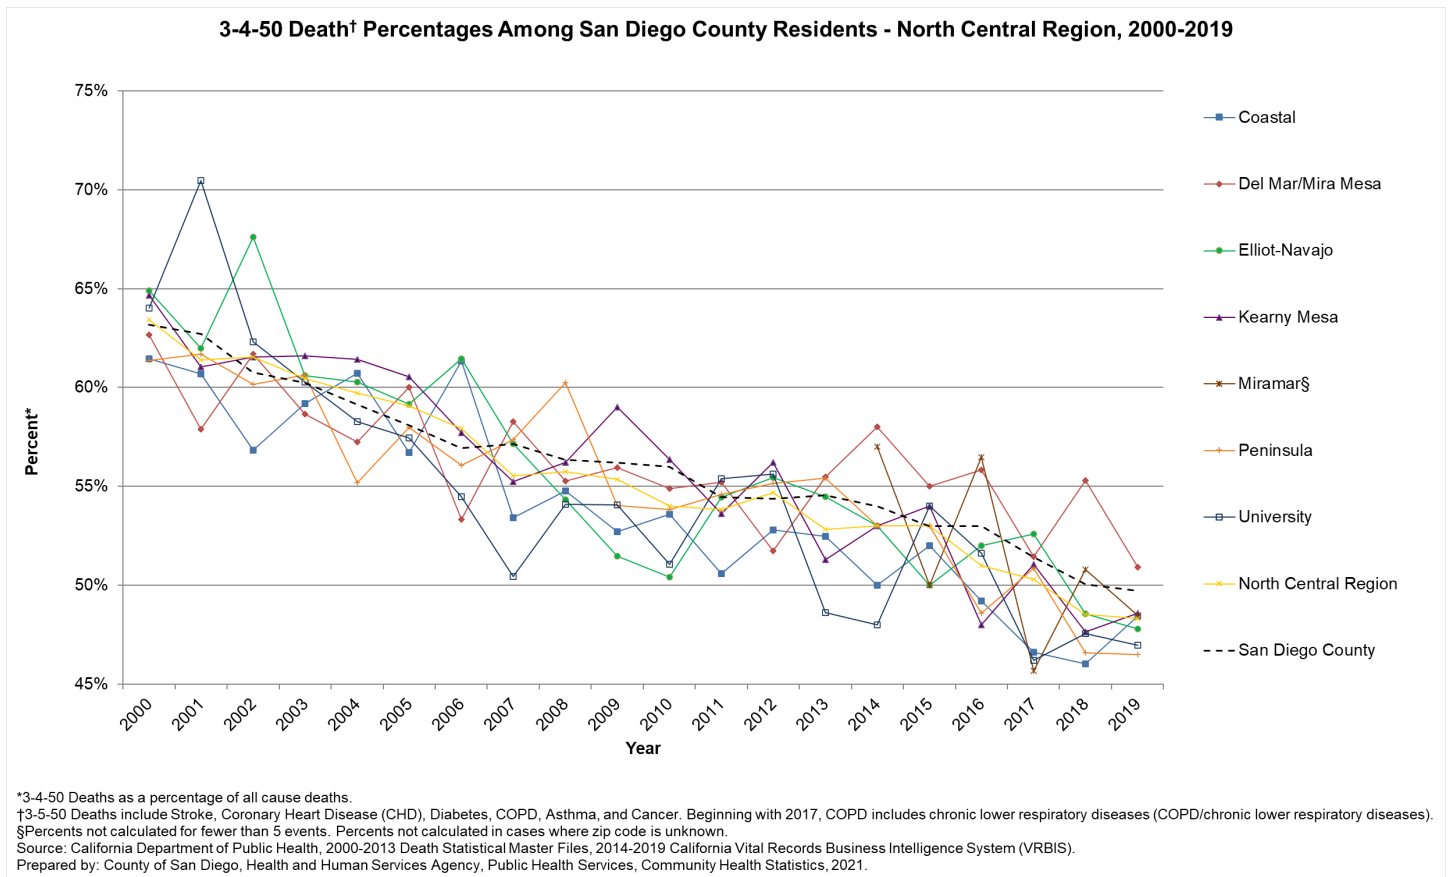

In 2019, the highest hospitalization rate was due to overall heart disease in North Central Region and its SRAs. Moreover, the second-highest hospitalization rate was due to overall hypertensive diseases (231.6 per 100,000) in North Central Region and its SRAs, except for Coastal, Del Mar-Mira Mesa, and University. In 2019, North Central Region had the lowest overall heart disease ED discharge and hospitalization rates than all other Health and Human Services Agency (HHS) regions.

*Rates not calculated for fewer than 5 events. Rates not calculated in cases where zip code is unknown.
 § Data from Military Facilities was not available and was not included in the analyses.

3-4-50: Chronic Diseases

Three behaviors (poor diet, physical inactivity, and tobacco use) contribute to four chronic diseases (cancer, heart disease and stroke, type 2 diabetes, and lung diseases such as asthma) that cause over 50% of all deaths worldwide. Overall, the percentage of deaths due to 3-4-50 chronic diseases decreased in North Central Region from 2000 to 2019. In 2019, cancer, heart disease and stroke, diabetes, and lung disease caused 48% of all deaths in North Central Region. Among North Central Region subregional areas (SRAs), Del Mar-Mira Mesa had the highest percentage of deaths due to 3-4-50 chronic disease (51%), while Peninsula had the lowest percentage of deaths (46%) in 2019.

North Central Region Health Status Report Summary

Overall, the rate of death due to 3-4-50 chronic diseases decreased in North Central Region and its SRAs from 2000 to 2019, except Del Mar-Mira Mesa, which remained steady in 2019. Among North Central Region SRAs, Kearny Mesa had the highest rate of death (336.5 per 100,000) due to 3-4-50 chronic diseases, followed by Elliot-Navajo (308.6 per 100,000).

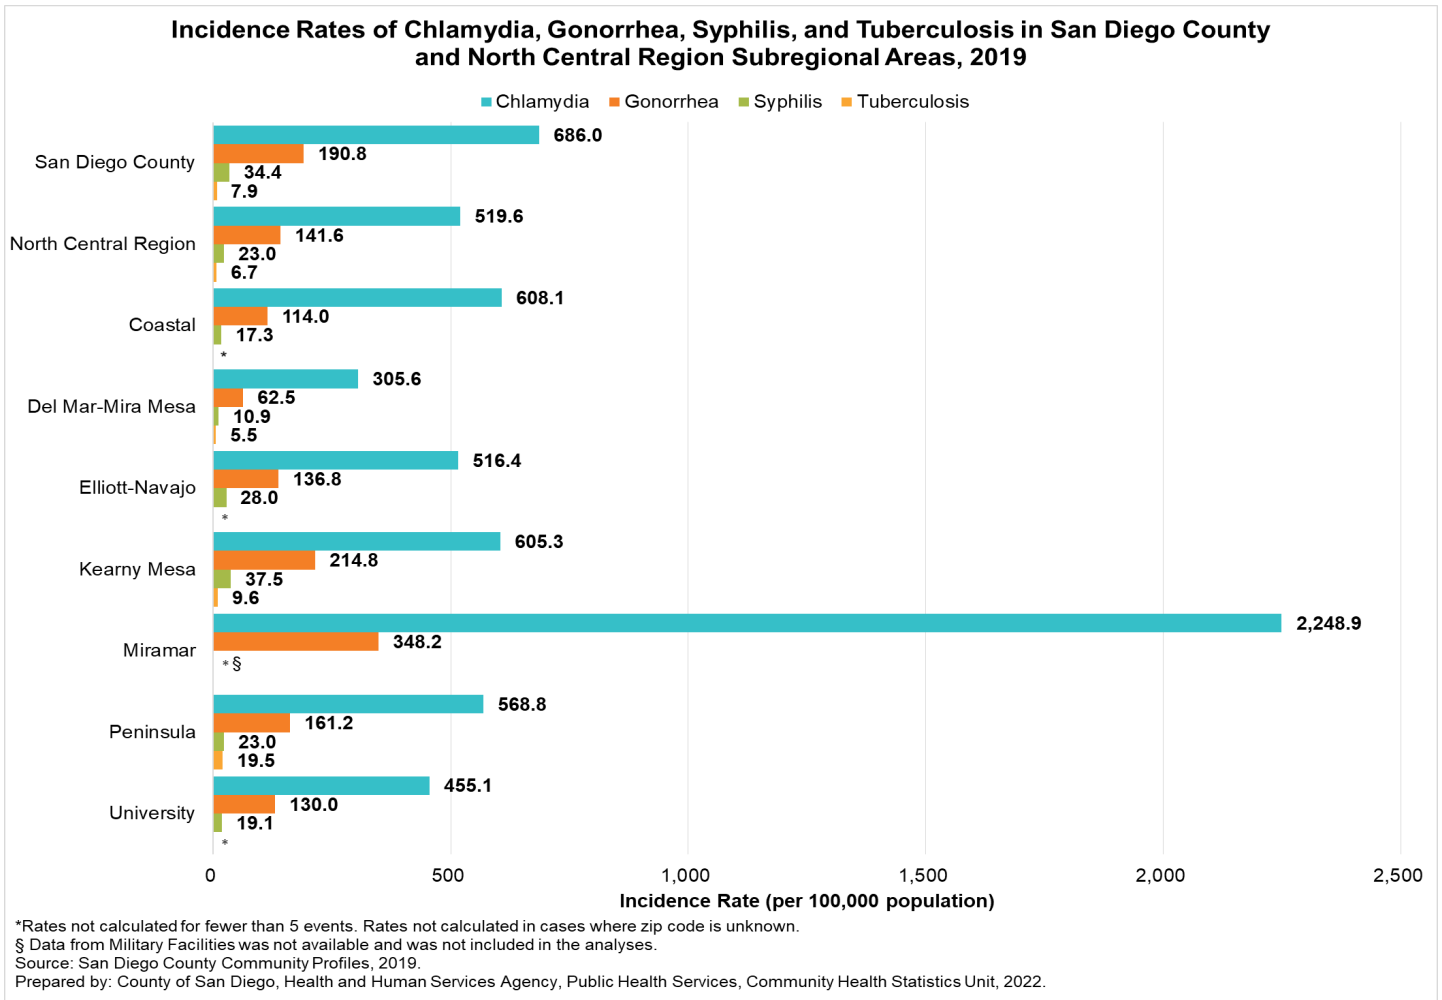

3-4-50 Death[†] Rates Among San Diego County Residents - North Central Region, 2000-2019

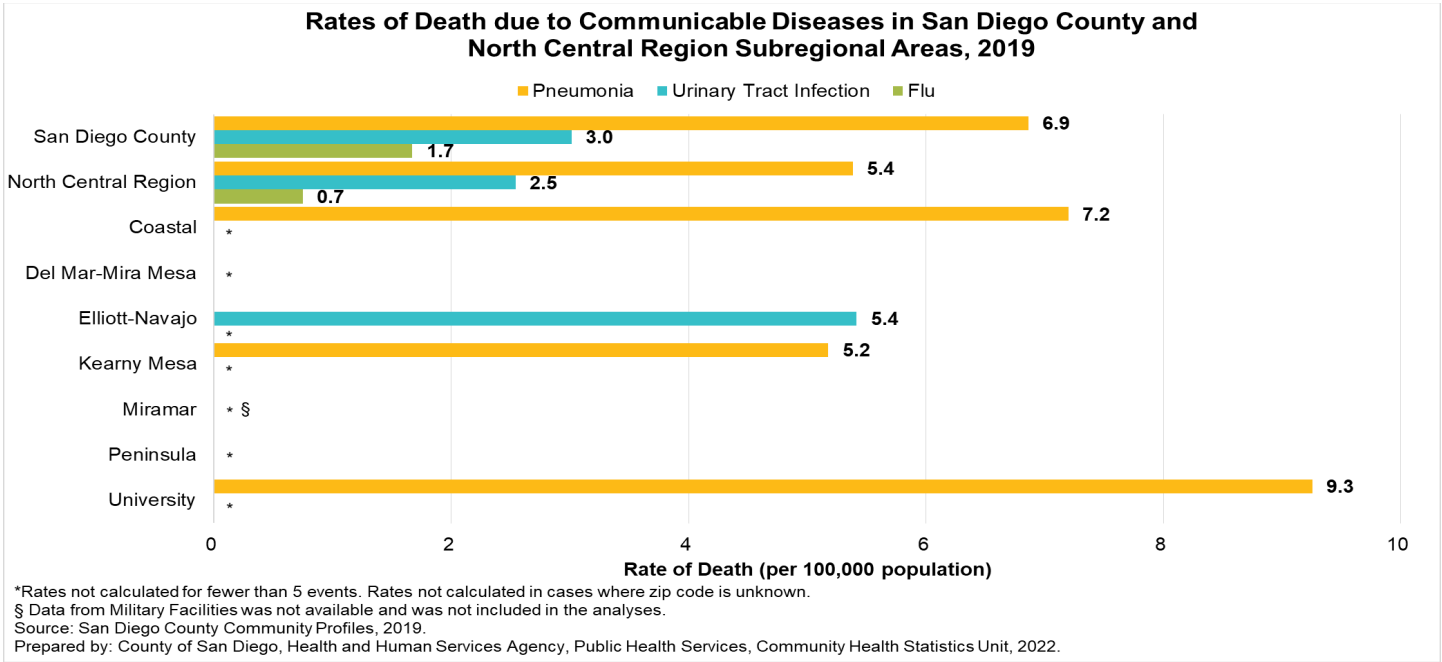

*Rates per 100,000 population.
[†]3-4-50 Deaths include Stroke, Coronary Heart Disease (CHD), Diabetes, COPD, Asthma, and Cancer. Beginning with 2017, COPD includes chronic lower respiratory diseases (COPD/chronic lower respiratory diseases).
[§]Rates not calculated for fewer than 5 events. Percents not calculated in cases where zip code is unknown.

 Prepared by: County of San Diego, Health and Human Services Agency, Public Health Services, Community Health Statistics, 2021.

Communicable Diseases

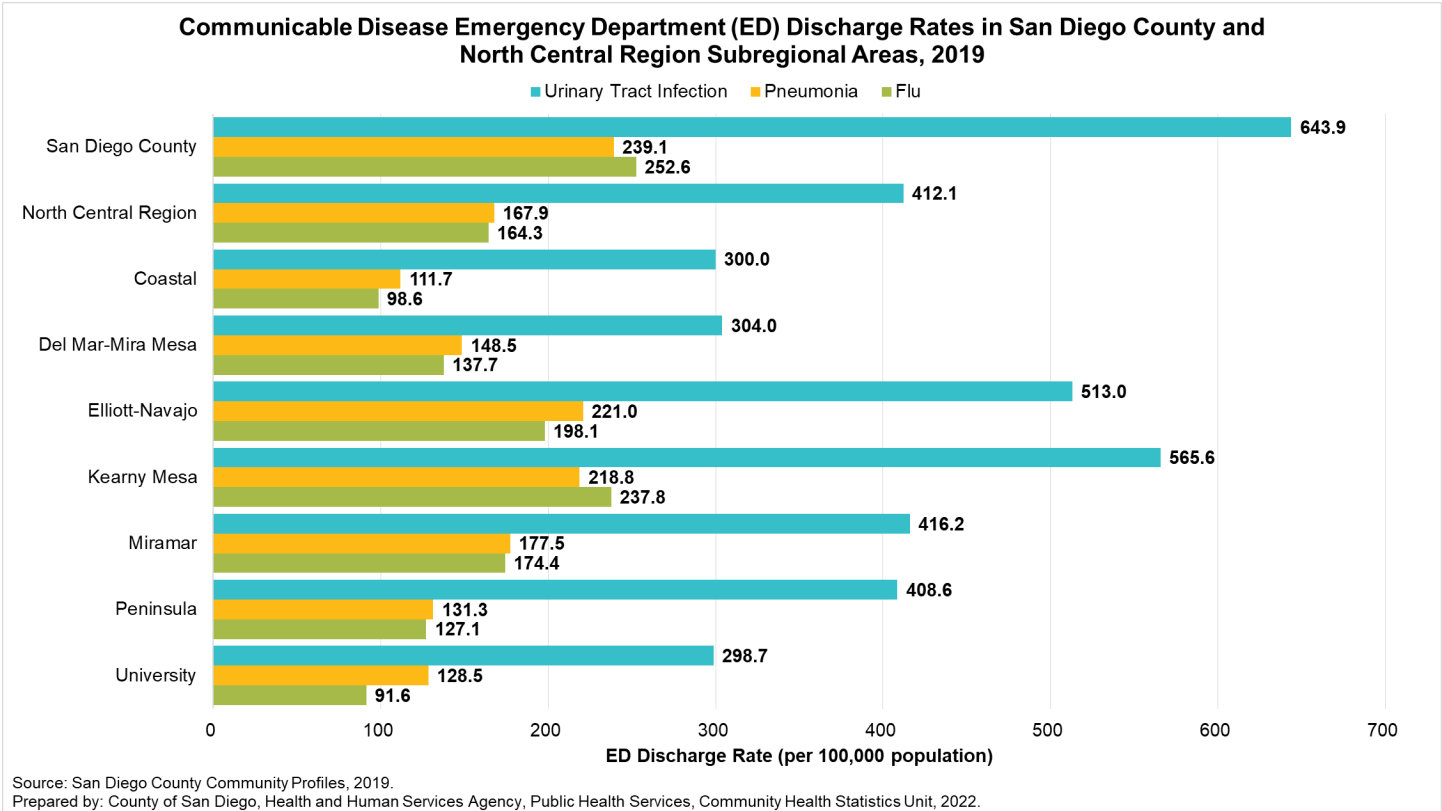

In 2019, the incidence rates of communicable diseases (chlamydia, gonorrhea, syphilis, and tuberculosis) in North Central Region and its subregional areas (SRAs) were lower than San Diego County overall. However, the incidence rate of chlamydia in Miramar SRA (2,248.9 per 100,000) was notably higher than North Central Region (519.6 per 100,000) and San Diego County overall (686.0 per 100,000). The incidence rate of gonorrhea in Miramar SRA (348.2 per 100,000) was also higher than North Central Region (141.6 per 100,000) and San Diego County overall (190.8 per 100,000).

Among communicable diseases in 2019, the highest rate of death was due to pneumonia in North Central Region and all of its SRAs. Moreover, among North Central SRAs, University had the highest rate of death due to pneumonia (9.3 per 100,000), with a rate higher than North Central Region (5.4 per 100,000) and San Diego County overall (6.9 per 100,000).

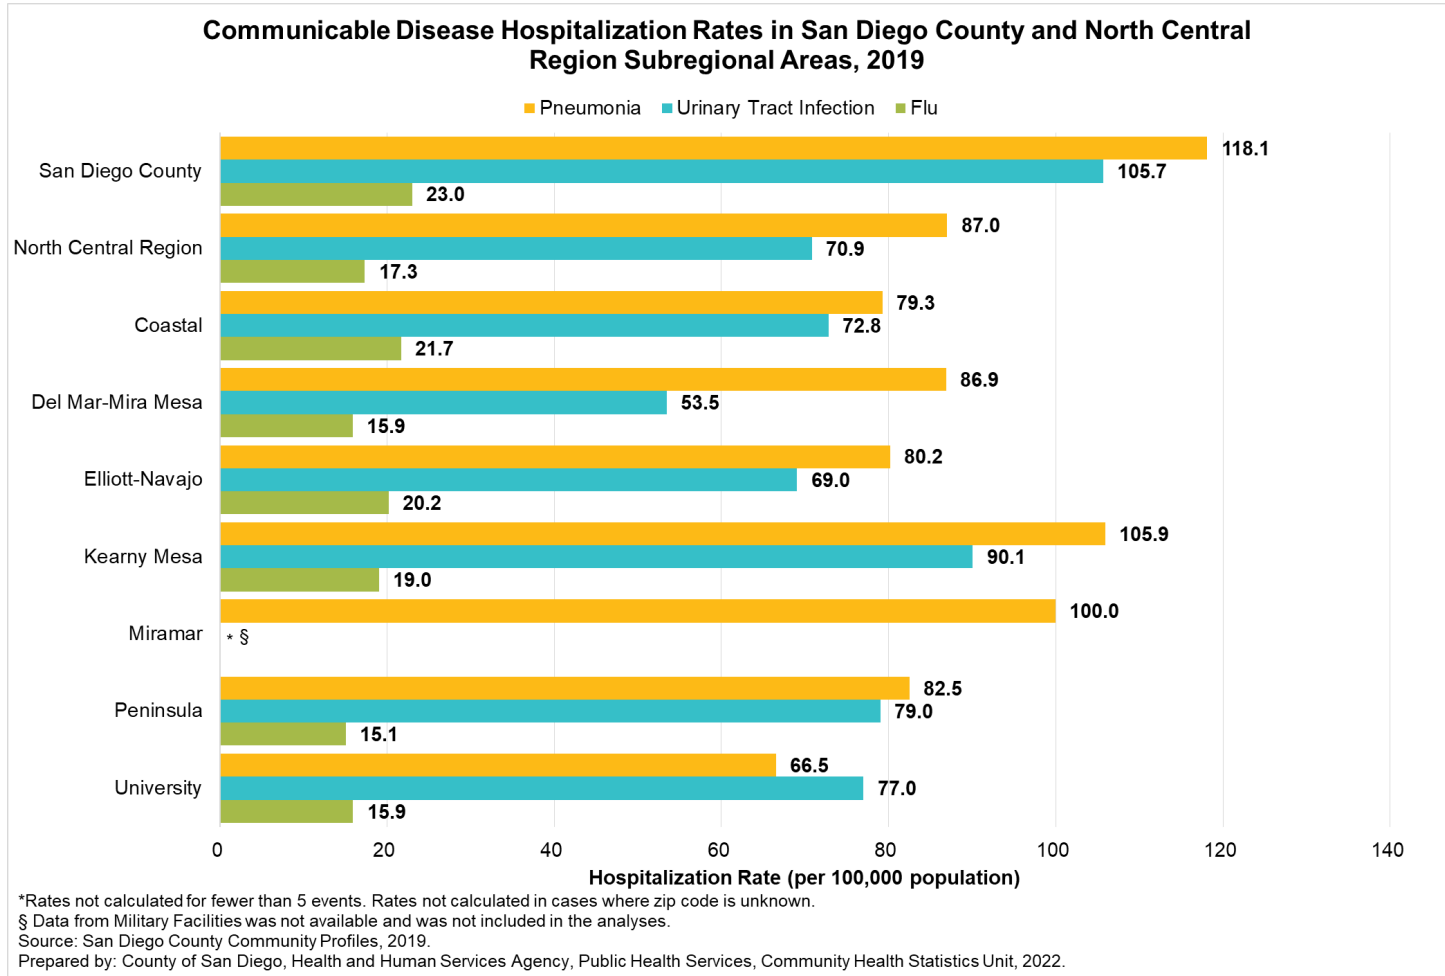

Among communicable diseases, the highest emergency department (ED) discharge rate was due to urinary tract infection in North Central Region (412.1 per 100,000) and all of its SRAs. Furthermore, the second-highest ED discharge rate was due to pneumonia in North Central Region (167.9 per 100,000) and its SRAs, except Kearny Mesa.

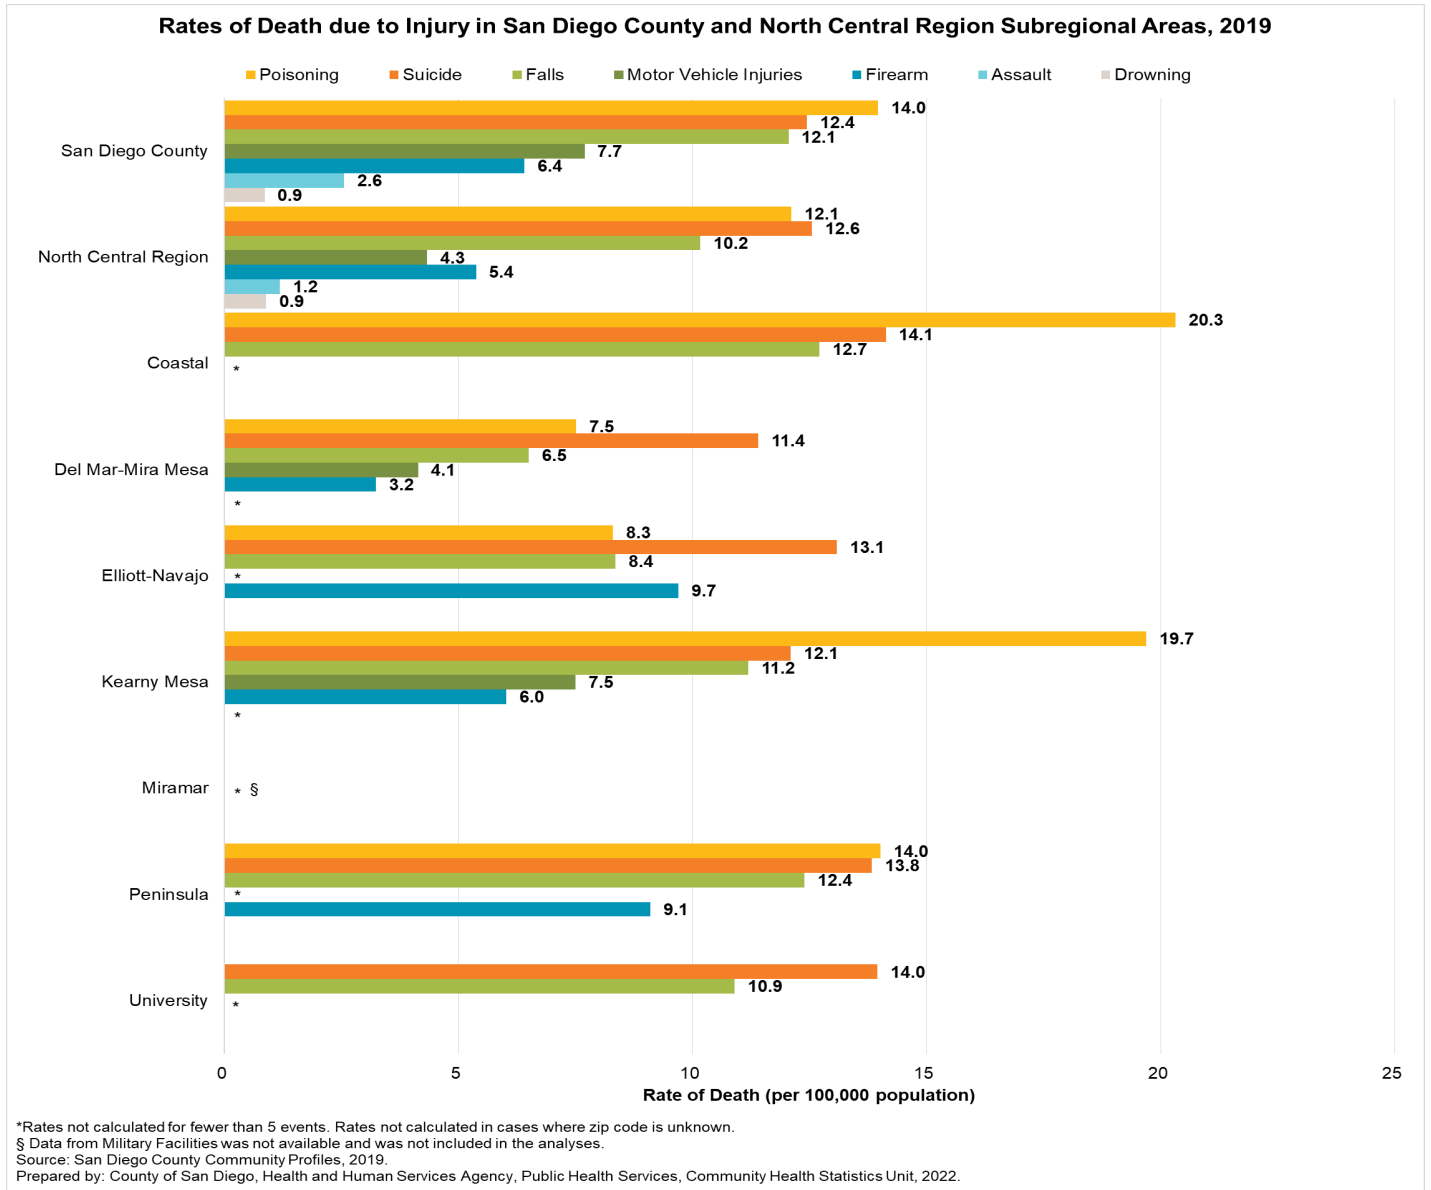

North Central Region Health Status Report Summary

Among communicable diseases, the highest hospitalization rate was due to pneumonia in North Central Region and its SRAs, except for University, where the highest hospitalization rate was due to Alzheimer’s disease and related dementias (ADRD) (77.0 per 100,000). Among North Central Region SRAs, Kearny Mesa (105.9 per 100,000) and Miramar (100.0 per 100,000) had higher hospitalization rates due to pneumonia than North Central Region (87.0 per 100,000) in 2019.

Injury Indicators

Among injuries in 2019, the highest death rate was suicide in North Central Region (12.6 per 100,000) and all of its subregional areas (SRAs), except Coastal, Kearny Mesa, and Peninsula. Among North Central Region SRAs, Coastal (14.1 per 100,000) and University (14.0 per 100,000) had the highest rates of suicide, which were higher than North Central Region (12.6 per 100,000) and San Diego County overall (12.4 per 100,000). In 2019, Coastal SRA (20.3 per 100,000) and Kearny Mesa SRA (19.7 per 100,000) had higher rates of death due to poisoning than those in North Central Region (12.1 per 100,000) and San Diego County overall (14.0 per 100,000). Among injuries, Elliott-Navajo SRA had the highest rate of death due to firearms (9.7 per 100,000), with a rate higher than North Central Region (5.4 per 100,000) and San Diego County overall (6.4 per 100,000).

North Central Region Health Status Report Summary

Among injuries, the highest emergency department (ED) discharge and hospitalization rates were due to falls in North Central Region and its SRAs in 2019. Among North Central Region SRAs, Kearny Mesa (2,148.6 per 100,000) and Elliott-Navajo (2,050.2 per 100,000) had higher ED discharge rates due to falls than North Central Region (1,666.2 per 100,000) and San Diego County overall (2,036.9 per 100,000). In 2019, the second-highest ED discharge rate was due to motor vehicle injuries in North Central Region and its SRAs.

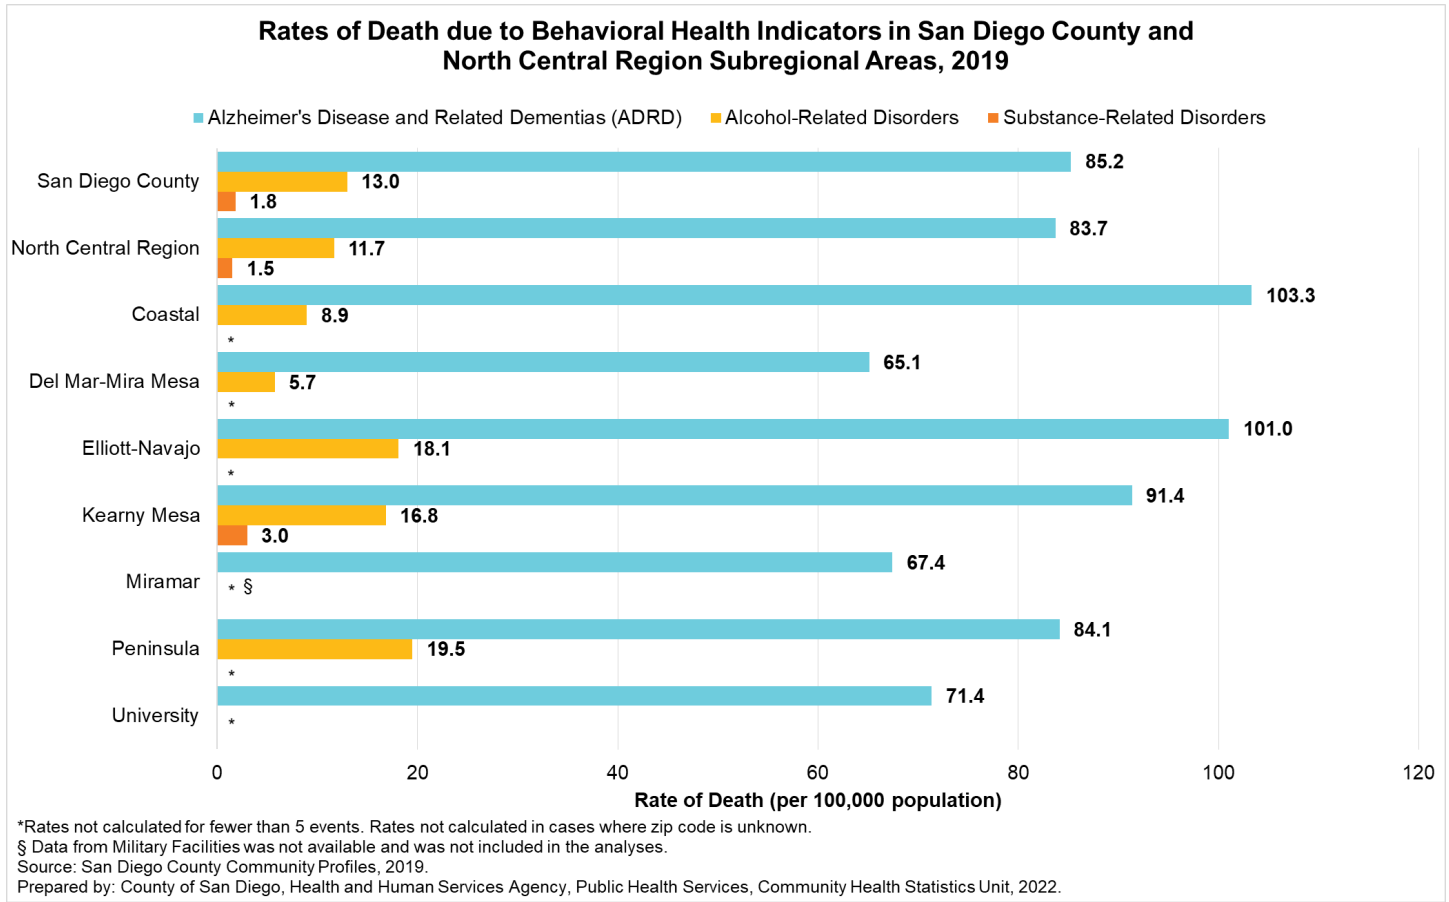

North Central Region Health Status Report Summary

Among North Central Region SRAs, Elliot-Navajo had the highest hospitalization rate due to falls (415.9 per 100,000), while Miramar had the lowest hospitalization rate (239.4 per 100,000). In 2019, the second-highest hospitalization rate was due to poisoning in North Central Region and its SRAs, except Coastal, Del Mar-Mira Mesa, and University.

Behavioral Health Indicators

Among behavioral health indicators, the highest rate of death was due to Alzheimer’s disease and related dementias (ADRD) in North Central Region and its subregional areas (SRAs) in 2019. Among North Central Region, Coastal SRA had the highest rate of death due to ADRD (103.3 per 100,000), which was higher than North Central Region (83.7 per 100,000) and San Diego County overall (85.2 per 100,000).

Among behavioral health indicators, the highest emergency department (ED) discharge rate was due to alcohol-related disorders in North Central Region and its SRAs. In 2019, Peninsula SRA had a higher ED discharge rate due to alcohol-related disorders (383.4 per 100,000) than North Central Region (242.6 per 100,000) and San Diego County overall (270.2 per 100,000). Among behavioral health indicators, the second-highest ED discharge rate was due to mood disorders in North Central Region and its SRAs.

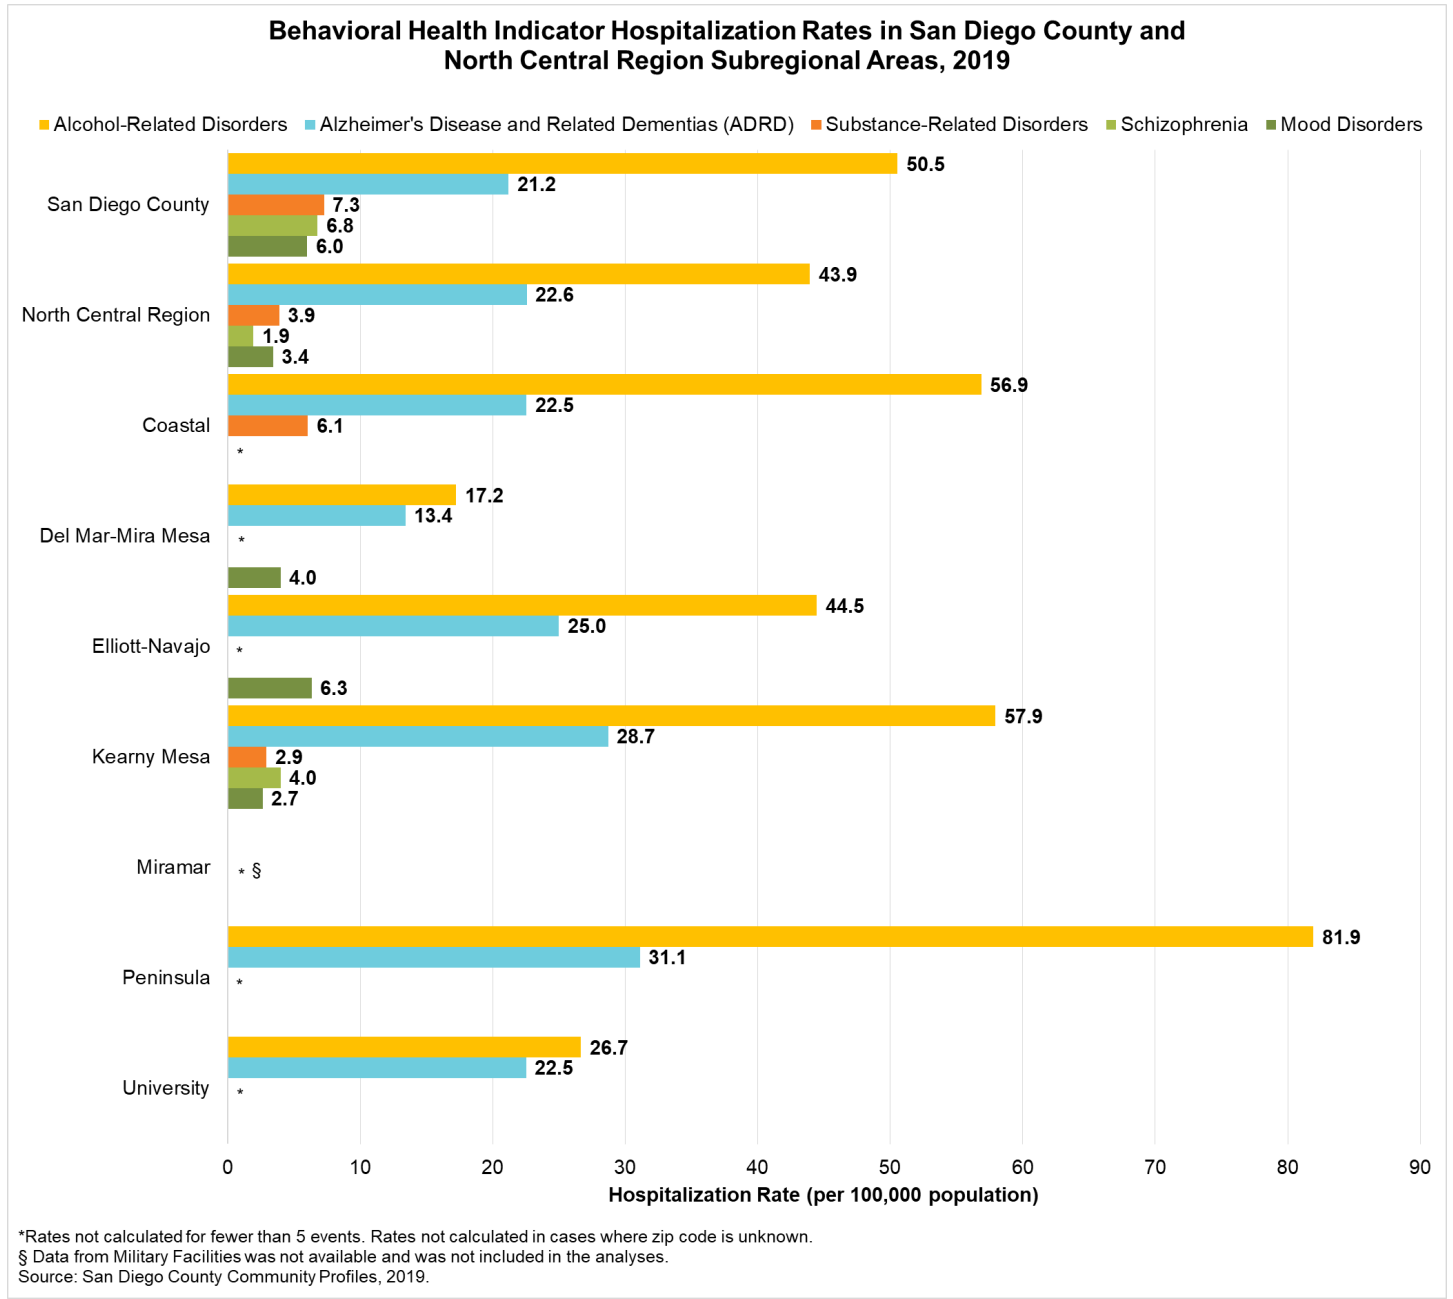

Behavioral Health Indicator Emergency Department (ED) Discharge Rates in San Diego County and North Central Region Subregional Areas, 2019

*Rates not calculated for fewer than 5 events. Rates not calculated in cases where zip code is unknown.

North Central Region Health Status Report Summary

Among behavioral health indicators, the highest hospitalization rate was due to alcohol-related disorders in North Central Region and its SRAs. In 2019, Peninsula SRA had the highest hospitalization rate due to alcohol-related disorders (81.9 per 100,000), which was higher than North Central Region (43.9 per 100,000) and San Diego County overall (50.5 per 100,000). Among behavioral health indicators, the second-highest hospitalization rate was due to ADRD in North Central Region and its SRAs.

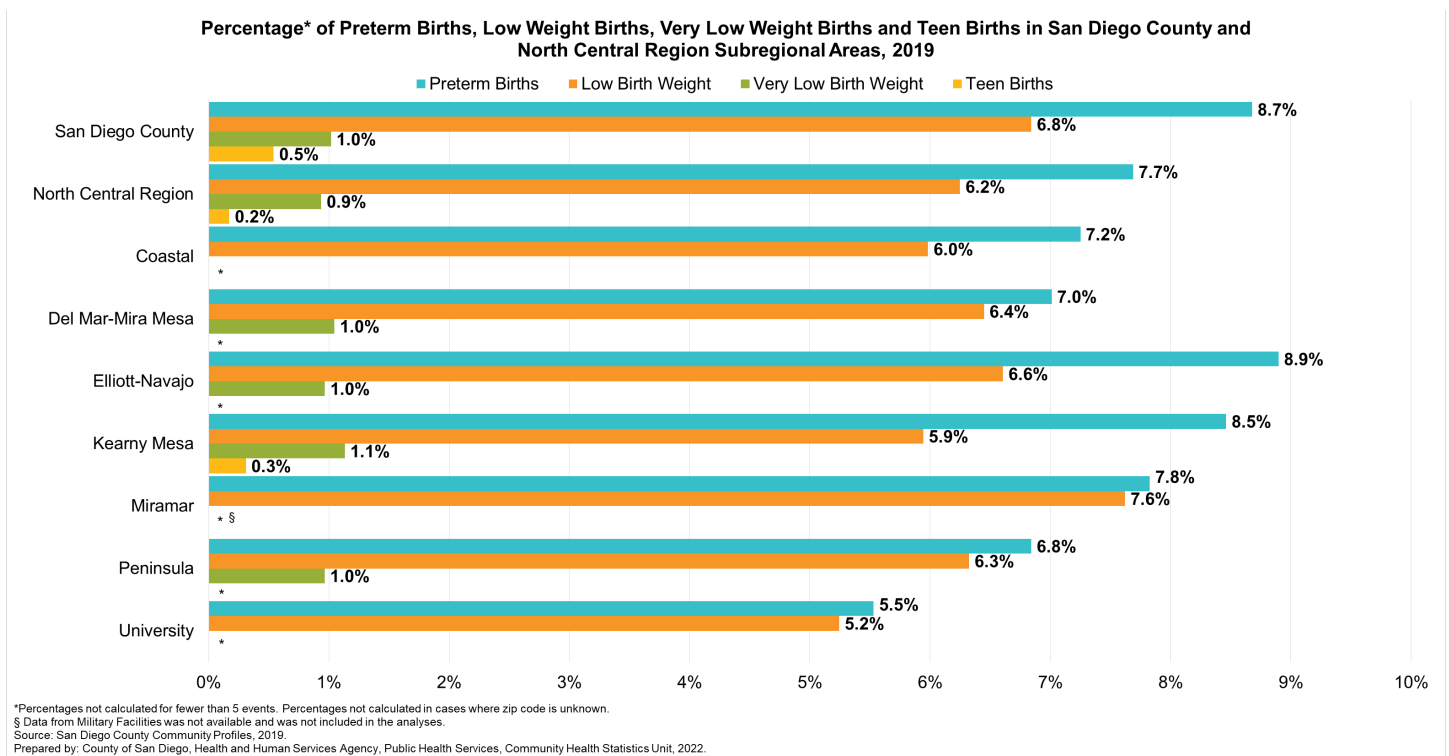

Maternal and Child Health Indicators

In 2019, there were 6,946 total live births in North Central Region, which represented 18.1% of the total live births in San Diego County (38,445).

In 2019, 7.7% of the live births in North Central Region were preterm births, while 6.2% of the live births were low weight births. Among North Central Region subregional areas (SRAs), Elliott-Navajo had the highest proportion of preterm births (8.9%), followed by Kearny Mesa (8.5%) and Miramar (7.8%). Among all live births in North Central Region, Miramar SRA had the highest proportion of infants with low birth weight (7.6%), followed by Elliot-Navajo SRA (6.6%) and Del Mar-Mira Mesa SRA (6.4%).

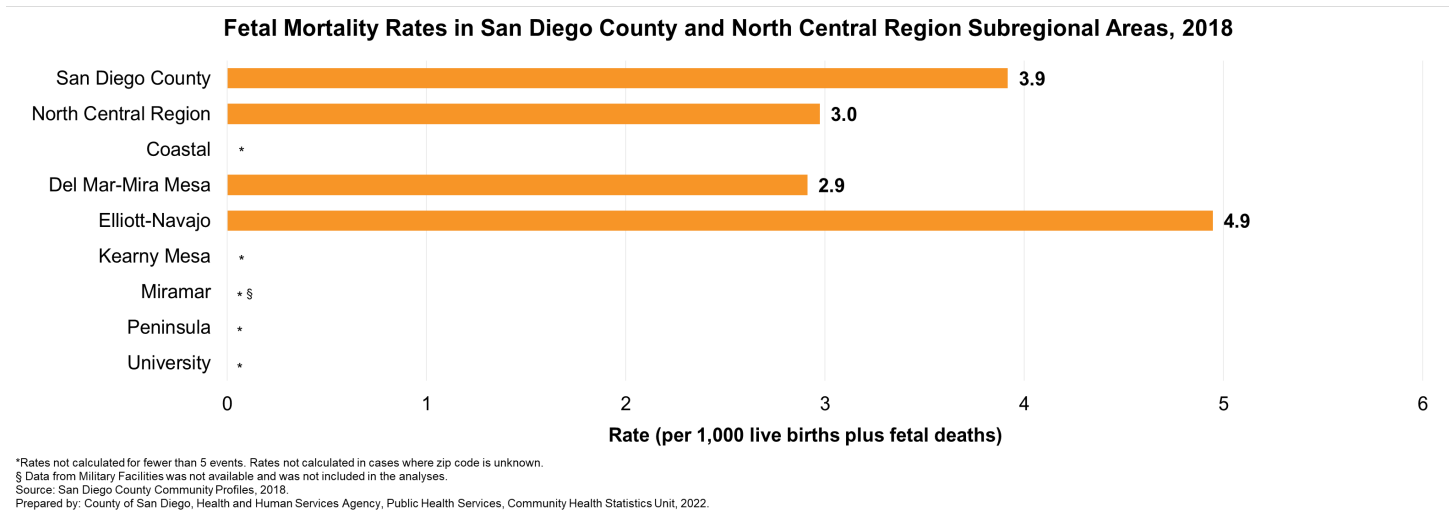

North Central Region Health Status Report Summary

In 2019, North Central Region had a higher infant mortality rate (4.0 per 1,000 total live births) than San Diego County overall (3.7 per 1,000 total live births). Among North Central Region SRAs, Kearny Mesa had the highest infant mortality rate (6.5 per 1,000 total live births), followed by Elliott-Navajo (45.8 per 1,000 total live births), both of which were higher than North Central Region and San Diego County overall.

In 2018, North Central Region had a lower fetal mortality (3.0 per 1,000 live births plus fetal deaths) than San Diego County overall (3.9 per 1,000 live births plus fetal deaths). Among North Central Region SRAs, Elliot-Navajo had a higher fetal mortality rate (5.8 per 1,000 live births plus fetal deaths) than North Central Region and San Diego County overall.

CONCLUSION

The North Central Region Health Status Report Summary provides descriptive information on demographic and socioeconomic characteristics, as well as morbidity/mortality rates for various health conditions. This information can be used by both Health and Human Services Agency (HHS) internal as well as external stakeholders, such as local community organizations, in the process of identifying evidence-based decisions to inform health policy by assessing the health status and factors that may potentially contribute to the overall health and well-being of North Central Region.

Live Well San Diego focuses on creating an environment that encourages all San Diego County residents to live healthy, safe, and thriving lives.
