Unknown [4]	*41,850*		
Total San Diego County Residents	*742,724*	*100.0%*	*22,159.1*

[1]Percentages may add up to greater than 100% due to rounding. Cases with unknown city of residence are excluded from percentage calculations.

[2]Overall total rates and incorporated city rates are calculated using 2019 population estimates from the San Diego Association of Governments. Unincorporated community rates are calculated using 2019 ACS 5-year estimates. Rates based on small case counts may vary considerably and should be interpreted with caution.

[3]United States Census Designated Places are used to define unincorporated communities. These are the statistical counterparts of incorporated cities.

[4]More information may become available as individual case investigations are completed.
*Rates are not calculated for counts under 5 cases or population size under 10,000.

Some addresses with a postal address indicating a city may be reallocated to the unincorporated area based on the physical location of the address.

COVID-19 is widespread in the community. People may have contracted the illness anywhere in the county, not necessarily in their city of residence. These data should not be interpreted as an indication of activity in any specific location. Under a community transmission status, the true prevalence of this disease may not be known as most cases are likely not diagnosed or reported.

Data are preliminary and subject to change.
