

Getting Ready for College

1 Moving boxes,

2 Shower flip flops,

3 Textbooks, and

4 Bacterial meningitis vaccines!

Bacterial meningitis spreads fast in group settings like dorms. It is a serious infection and can be life-threatening if not treated right away.

The MenACWY and MenB vaccines protect against one type of bacteria that can cause meningitis. These vaccines are required for college. Make sure you are up-to-date on vaccinations before moving in!
