

Hepatitis B

Hepatitis B (hep B) is a liver disease caused by the hepatitis B virus.

50% of people who have hep B do not know they have it.

Ways you can get hep B:

Contact with blood

During childbirth

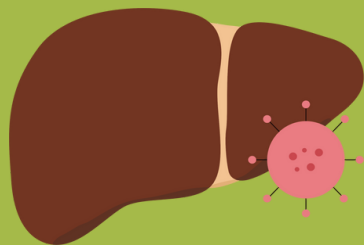

Unprotected sex

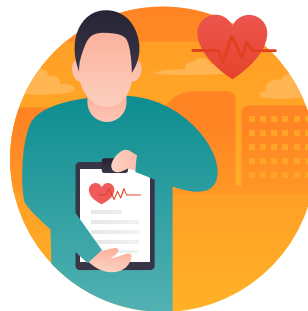

Hep B is dangerous for babies and infants.

About **9 in 10** infants who get infected will develop a life-long, chronic infection.

Hep B is a leading cause of liver cancer worldwide.

Hep B can be prevented with vaccination. **Contact your doctor today!**
