IX. Legislation

A. Tobacco Leg

California Healthcare, Research and Prevention Tobacco Tax Act of 2016 (Proposition 56) was passed in November 2016. It raises the state's tobacco tax by \$2 per pack (from \$0.87 to \$2.87) and directs this funding to tobacco prevention, cures and strengthening a health care system strained by tobacco-related disease. In addition to the \$2 per pack tobacco tax on all tobacco products, programs that have received funding via Proposition 99 and Proposition 10 would receive corresponding backfill. Furthermore, this initiative not only includes electronic cigarettes, but corrects previous definitions, to ensure that all tobacco products (e.g., snus) are captured in the State's Other Tobacco Product (OTP) definition and taxed at a rate equivalent to the cigarette tax. Anticipated increased net state revenue of \$1 billion to \$1.4 billion in 2017-18, with potentially lower annual revenues over time.
