Phase I Environmental Site Assessment
Property: Single-Family Residence, Caretaker's Cottage and Undeveloped Land
(Future Chinese Bible Church of San Diego)
C2C Project Number: 2016-062

1.1 EXECUTIVE SUMMARY

Coast 2 Coast Environmental, Inc. was retained by Harper Communities to conduct an environmental site assessment of 16919 Four Gee Road, San Diego, San Diego County, California (Property). A site reconnaissance was performed on June 21, 2016. The Property consists of two non-contiguous assessors parcels with a combined area of 9.1563 acres. APN 678-422-03 is a 0.0663 acre, triangular-shaped undeveloped lot. APN 678-060-27 is a 9.09 acre lot developed with a single-family residence with an attached two-car garage, a caretaker's cottage and a carport/work space. Assessor records list the combined square footage of the residences at 3,103 square feet. Both residences are currently occupied by tenants. The garage and carport are used for storage. The remainder of the Property includes a landscaped area surrounding the residences and approximately 7 to 8 acres of undeveloped land.

Historically, the Property was undeveloped in 1928 and 1939 aeriels. In a 1947 aerial the Property and land surrounding it to the west and north had been had been recently tilled possibly as preparation for barley or alfalfa. By 1949 the land again appeared undeveloped. The Golems bought the Property and other adjoining land in 1951 and developed the Property with a residence and a ranch for cattle and horses. This use continued until 1997 when Mrs. Golem decided to sell the ranch except for the Property parcel. Otherwise Property use since 1997 has been primarily residential except for a period between 2006 and 2011 when an organic farming operation cultivated row crops on the east side of the Property. A longtime employee of the Golems, Mr. Roberto Reyes, has occupied the caretaker's cottage for many years. Mrs. Golem occupied the main residence until her death in 2001. Chinese Bible Church of San Diego which acquired the Property in January 2011 has used the main residence to house clergy.

At some point between 1997 and 2000 the Property was assigned the current address 16919 Four Gee Road after the original access road was removed as part of the development of the south adjoining site with the current multi-family residential developments. The historic address of the Property was 9654 Artesian Road.

Based upon information obtained from Coast 2 Coast's research and visual observations made during our site visit, we have reached the following conclusions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:

United States Environmental Protection Agency (U.S. EPA) National Priorities List
(NPL) (including delisted sites)
State- and tribal-equivalent priorities list

U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]

State- and tribal-equivalent CERCLIS

U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities

U.S. EPA RCRA Generators

U.S. EPA Emergency Response Notification System (ERNS)

Federal Institutional Control (IC) or Engineering Control (EC) Registries

State- and tribal-equivalent IC and EC Registries

State Leaking Underground Storage Tank Program (LUST) and tribal equivalent

State Registered Underground Storage Tank (UST) and tribal equivalent

State Solid Waste Information System (SWIS) and tribal equivalent

State and tribal Voluntary Cleanup Program (VCP) sites

State and tribal Brownfields sites

- The Property appears on the following databases:
 - HMMD – Be Wise Ranch had two fuel ASTs for its on-site operation between the period 2006 and 2011. The County Department of Agriculture conducted a close out inspection in January 2012 and noted that hazardous materials were not observed on site.
- Three other sites within the designated ASTM radii of the Property appear on the DTSC EnviroStor and School Evaluation databases. While the presence of these sites in the vicinity of the Property may constitute an environmental risk to the Property, evidence was not found during the course of our assessment which indicated that the Property has been adversely impacted by these sites nor that they represent an imminent threat to the Property.
- The Property uses a septic system for sewage. Information was not found that disposal of hazardous materials and wastes into the septic system had occurred.
- Coast 2 Coast’s review of historical information sources did not indicate that the Property had been subjected to past activities that would represent a potential environmental threat or impact to the Property.
- High voltage electrical transformers were not found on the Property.
- A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.
- This assessment did not reveal evidence of recognized environmental conditions (RECs) in connection with the current use of the Property.
- This assessment found the following REC in connection with the past use of the Property:

- Prior to the development of the Property by the Golems, aerial photographs depict the entire Property possibly having been dry farmed in the 1940s. Records were not found documenting what crops were planted or whether pesticides and herbicides were used.
- Though not rising to the level of a REC the following environmental issues were noted on the Property:
 - Adjoining sites appeared on the following databases:
 - ◆ ENVIROSTOR & County SAM - Proposed Salviati Community/Bernardo Lakes Dev Prop 1 – These listings date to 2000 but address a concern in the Santa Fe Valley area concerning methane. The County of San Diego Board of Supervisors issued an ordinance concerning methane after it was found beneath completed homes in the area and appears to have been a partial cause explosion of an explosion while digging a trench for a stormwater drain.
 - Friable or damaged, nonfriable building materials likely to contain asbestos were not found on the Property. Potential asbestos-containing materials (ACM) observed to generally be in good condition included drywall systems, resilient flooring and roofing materials. Insulation materials were not visible in either residence, but if they exist, they are also a potential ACM.
- As the buildings on the Property were constructed in the 1950s and 1960s, it is possible that lead-based paint was used on the buildings. Lead-based paint was effectively banned for residential purposes as of 1978. Painted surfaces appeared to be intact and surfaces with cracked, chipped and peeling paint were not observed.

Based upon Coast 2 Coast's review of the information presented in the report, and our resulting conclusions, we recommend the following:

- If the redevelopment plans include areas of exposed soil where visitors may congregate, it is recommended that soil sampling for pesticides, herbicides and metals be completed. For the east side of the Property, Bill Brammer/Be Wise Ranch may have sampled for these contaminants prior to planting its crops as it was an organic operation, but those records are not readily available. If finished areas where people will congregate are paved or covered with some type of impermeable surface, then sampling may not be necessary. This includes play areas for the children.

In addition, if soil is to be transported from the Property during redevelopment then sampling should be conducted to confirm if the soil is a hazardous waste due to historic agricultural chemical use.

- The County of San Diego should be contacted concerning its requirements for methane sampling as it relates to grading operations and future buildings planned for the Property. Two residential tracts north of the Property apparently were required to install methane mitigation measures to manage methane. It is not clear from limited information which was readily available during this assessment if the methane was caused by inappropriate management of

organic material during mass grading activities or if there is a natural cause for elevated methane in the Santa Fe Valley area.

- If the existing residences will be demolished as part of the redevelopment of the Property, then it is recommended that a survey for asbestos-containing materials and lead-based paint be completed in order to properly manage these contaminants during demolition.
- If the residences are maintained, it is recommended that a lead-based paint survey be completed on the both residences. Due to the age of the buildings, the use of lead-based paint is a possibility and children are currently occupying one of the residences.
- It is Coast 2 Coast's opinion that further environmental assessment of this Property, beyond those items listed above, is not warranted at this time.

2.0 INTRODUCTION

2.1 Property Location and Legal Description

Name/Address: Single-Family Residence, Caretaker's Cottage and Undeveloped Land
(Future Chinese Bible Church of San Diego)
16919 Four Gee Road
San Diego, California 92127

County: San Diego

Assessor Parcel Number or Other Legal Description: 678-060-27 and 678-422-03

Owner: Chinese Bible Church of San Diego

2.2 Purpose

Coast 2 Coast Environmental Inc. performed a Phase I Environmental Site Assessment of a single-family residence, caretaker's cottage and undeveloped land located at 16919 Four Gee Road in San Diego, San Diego County, California (Property). The Property is planned for redevelopment by the Chinese Bible Church of San Diego. This assessment was performed under contract with Harper Communities, at the direction of Mr. Howard Cooper. Coast 2 Coast's services were accepted by Harper Communities on June 6, 2016.

The assessment of this Property was performed at the direction of Harper Communities in conjunction with its efforts to conduct "all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice". The purpose of performing AAI is to identify "recognized environmental conditions (RECs)" associated with past and/or present operations at the Property or adjoining sites which may pose liability for Harper Communities and Chinese Bible Church of San Diego. By completing this step in the due diligence process, Harper Communities and Chinese Bible Church of San Diego satisfy one of the requirements to qualify for the "innocent landowner defense" under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 101(35).

2.3 Scope of Services

The assessment was performed in conformance with all of the components of the ASTM E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The assessment included, but was not necessarily limited to, the activities listed below:

- A reconnaissance of the Property to observe and assess characteristics of potential environmental concern.
- Observation of adjoining sites and the surrounding area to observe and assess characteristics of potential environmental concern which may impact the Property.
- Interviews with current and past owners, operators and occupants of the Property for the purpose of gathering information regarding the potential for contamination at the Property.

- Review of regulatory agency files and interviews with government agency officials to identify and assess any listings of regulatory permits, registrations, enforcement actions, contaminated sites, etc. likely to affect the Property.
- Review of historical resources to identify previous uses and occupancies of the Property since the Property was first developed or 1940, whichever is earlier.
- Visual inspection or use of other documentation to render an opinion as to the existence of asbestos, lead-based paint (interior and exterior), lead in the drinking water, and the potential for radon exposure.
- Development of a report to include discussion of the findings of the above tasks.

2.4 Significant Assumptions and Data Gaps

Significant assumptions concerning the Property were not made during this assessment except for the following:

- Data gaps occurred for the following five-year periods: 1940 and 1955, but the use of the Property during each of the periods surrounding these periods appeared to be similar which indicated that the missing historical data was not significant.
- Lacking Property-specific information on the ground water gradient at the Property, it is assumed that the gradient mimics the topographic gradient.
- Information supplied by others is assumed to be correct and accurate.

2.5 Limitations

The conclusions and recommendations presented in this report are based upon reasonable visual reconnaissance of the Property and research of available materials within the scope and budget of the contract. The information presented is relevant to the dates of Coast 2 Coast's Property visit and should not be relied upon to represent conditions at later dates.

The opinions expressed herein are based on information obtained during Coast 2 Coast's effort and on Coast 2 Coast's experience. If additional information becomes available, we request the opportunity to review the information and modify Coast 2 Coast's opinions, if necessary.

Coast 2 Coast's services have been provided using that degree of care and skill ordinarily exercised, under similar circumstances, by environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the professional opinions presented in this report.

Coast 2 Coast Environmental, Inc. is not responsible for the conclusions, opinions, or recommendations made by others based on this information.

2.6 Exceptions to ASTM Standard Practice E1527-13

Information concerning environmental liens or activity and use limitations (AULs) on the Property and a copy of the current title search were not provided.

Past owners and tenants were not interviewed.

Information back to the date of first development of the Property was not readily ascertainable.

The above exceptions are not considered to be significant in arriving at our findings and conclusions.

2.7 Special Terms and Conditions

Special terms and conditions which limited access to reasonably ascertainable information concerning the Property were not required by Harper Communities.

2.8 User Reliance

This report has been prepared on behalf of, and for the exclusive use of Harper Communities and Chinese Bible Church of San Diego. The contents of this report may not be relied upon by any party other than Harper Communities and Chinese Bible Church of San Diego without the express written consent of Coast 2 Coast Environmental, Inc.

3.0 INFORMATION PROVIDED BY CLIENT

3.1 Owner, Property Manager and Occupant Information

The current owner of the Property is Chinese Bible Church of San Diego. The Property manager is Mr. Robert Reyes. The current tenants of the Property include Mr. Reyes and his family and a pastor and her family.

3.2 Title Records, Environmental Liens and Activity and Use Limitations

A review of reasonably ascertainable recorded land title records, environmental lien records and activity and use limitations (AULs) for the Property was not conducted by Harper Communities or Chinese Bible Church of San Diego

A search of environmental records conducted by Environmental Data Resources, Inc. (EDR) did not find listings for the Property on the federal NPL Liens database, CERCLIS liens database, State Deed Restriction Listing or State Environmental Liens Listing. The federal databases track properties that the United States Environmental Protection Agency has filed liens against to recover remedial action costs or properties where an owner has been notified of potential liability. The State Deed Restrictions listing includes sites where AULs are in effect. The State Environmental Liens Listing includes sites where the State Department of Toxic Substances Control is a lien holder.

3.3 Specialized Knowledge

Mr. Dennis Ho, Chinese Bible Church of San Diego Board Member, was not aware of environmental liens, AULs or issues and events of further environmental concern on the Property. Mr. Reyes was not aware of events of further environmental concern on the Property.

3.4 Valuation Reduction for Environmental Issues

Mr. Ho was not aware of environmental issues which may have affected the value of the Property.

3.5 Other Information

Mr. Ho and Mr. Reyes were not aware of other issues of environmental concern associated with the Property.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Coast 2 Coast Environmental reviewed a search of environmental records conducted by Environmental Data Resources, Inc. (EDR). A copy of EDR's report is located in Appendix D. The following standard environmental records sources were reviewed as specified for the Property, adjoining and nearby sites. Next to each source is its abbreviation as it appears in the database. An explanation of each record source is provided in EDR's beginning on Page GR-1 which immediately follows the Map Findings.

Database Reviewed	Responsible Agency	Search Distance (miles)
<i>Federal ASTM Standard Databases</i>		
National Priorities List (NPL and NPL Site Boundaries)	U.S. Environmental Protection Agency (EPA)	1.0
Delisted NPL	U.S. EPA	0.5
Federal Superfund Enterprise Management System (SEMS) – [Replaces CERCLIS which USEPA stopped updating in 2013.]	U.S. EPA	0.5

The Property was not found within the search radii for the databases reviewed. The table below is summary of sites found within the search distances of the standard environmental record sources which were reviewed for this assessment. The table includes the name, address and Map ID provided in the attached database report; the location of each site with respect to the Property; whether the site is hydraulically upgradient, crossgradient or downgradient of the Property; and a summary of the database listing(s) and the risk the site(s) pose to the Property. This summary does not include sites where the agency has closed the case file, sites that are downgradient; and sites greater than ¼ mile from the Property unless information in the database listing indicates the Property may have been impacted. These sites may be found in EDR's database report included in Appendix D.

Name and Address	Distance (miles), Direction from Property, and Gradient	Databases	Comments (Media affected, Risk to Property, other information)
Proposed Salviati Community N. Four Gee/Artesian Roads NW of Four Gee & Artisan Roads Rancho Bernardo, CA 92127 and Bernardo Lakes Dev Prop 1 N Four Gee & Artesian Roads, San Diego, CA 92127 EDR ID#2 and Three Orphan Listings	Includes historical APNs 678-060-(23, 24, 25, 26) which is the north adjoining open space and the residential tract north of the open space.	ENVIROSTOR, SAM	Records found on Geotracker for Case Numbers H38961-001, H38962-001 and H38965-001 include only a case closure letter stating that the County of San Diego Department of Environmental Health (DEH) withdrew from the voluntary assistance case agreement because DEH "does not have the appropriate in-house resources to evaluate the proposed methane gas mitigation design." The EnviroStor website listing for this site states, "DTSC is not

Name and Address	Distance (miles), Direction from Property, and Gradient	Databases	Comments (Media affected, Risk to Property, other information)
			involved with this project.” (EnviroStor Facility ID#37000053) A search of the internet has found that methane is a concern in Santa Fe Valley. This listing indicates a potential concern for the Property.

Three ENVIROSTOR/SCHOOL sites are located within 1/8 to 1/2 mile of the Property. The two school sites nearest the Property were evaluated for past use of agricultural chemicals and issues of concern were not found. Agricultural chemicals were reportedly found at the third school located 0.45 mile from the Property but DTSC did not require further action beyond the preliminary assessment.

Information was not found during this assessment which indicated these sites or “orphan” sites (sites not plotted because of insufficient geo-coding information) had impacted the Property.

4.2 Additional Environmental Record Sources

EDR also researched the following databases to enhance and supplement the standard database sources listed in Section 4.1.

Database Reviewed	Responsible Agency	Search Distance (miles)
<i>Federal Supplemental ASTM Standard Databases</i>		
Proposed NPL	U.S. EPA	0.5
Federal Facilities	U.S. EPA	1.0
U.S. Brownfields Sites (BROWNFIELDS)	U.S. EPA	0.5
Open Dump Inventory (ODI)	U.S. EPA	0.5
RCRAInfo (RCRA-NonGen)	U.S. EPA	Adjoining Sites
Department of Defense Sites (DOD)	U.S. Geological Survey	1.0
Formerly Used Defense Sites (FUDS)	U.S. Army Corps of Engineers	1.0
Superfund Consent Decrees (CONSENT)	U.S. EPA	1.0
Records of Decision (RODS)	U.S. EPA	1.0
Uranium Mill Tailings Sites (UMTRA)	U.S. Department of Energy	0.5
Mines Master Index File (US MINES)	U.S. Department of Labor, Mine Safety and Health Administration	0.25
Facility Index System (FINDS)	U.S. EPA	Property
State Coalition for Remediation of Drycleaners (SCRD DRYCLEANERS)	U.S. EPA	0.5
2020 Corrective Action Program List (2020 COR ACTION)	U.S. EPA	0.25
Coal Combustion Residues Surface Impoundments List (COAL ASH EPA)	U.S. EPA	0.5

Database Reviewed	Responsible Agency	Search Distance (miles)
State Supplemental ASTM Standard Databases		
Waste Management Unit Database (WMUDS/SWAT) [Combination of other databases which track waste.]	SWRCB	0.5 (SWLs and SWAT) Property (Other)
Recycler Facilities (SWRCY)	Department of Conservation	0.5
CalSites Database (HIST Cal-Sites) Replaced by ENVIROSTOR. Also Cal-Sites formerly known as the Abandoned Sites Program (ASPIS)	CalEPA DTSC	1.0
School Property Evaluation Program (SCH)	CalEPA DTSC	0.25

Drycleaner Facilities with Waste Generator Identification Numbers (DRYCLEANERS)	CalEPA DTSC	Adjoining Sites
Enforcement Action Listing (ENF)	SWRCB	Adjoining Sites
Facility Manifest Data (HAZNET)	CalEPA	Property
EnviroStor Permitted Facilities Listing (HWP)	CalEPA DTSC	1.0
Registered Hazardous Waste Transporter Database (HWT)	CalEPA DTSC	0.25
Local Records		
Hazardous Materials Management Database (HMMD)	San Diego County Department of Environmental Health (DEH)	Property
Site Assessment & Mitigation (SAM)	DEH	0.5
Solid Waste Facilities – San Diego County	Department of Health Services	Property
Tribal Records		
Indian Open Dump Inventory (Indian ODI)	U.S. EPA	0.5
Debris Region 9 – Torres Martinez Reservation (DEBRIS REGION 9)	U.S. EPA Region IX	Property
Indian Reservations (INDIAN RESERV)	U.S. Geological Survey	1.0
Federal and Indian Lands (FEDLAND)	U.S. Geological Survey	1.0
EDR Proprietary or Exclusive Records		
Manufactured Gas Plants (EDR MGP)	EDR	1.0
Historic Gas Stations (EDR US Hist Auto Stat)	EDR	Adjoining Sites
Historic Dry Cleaners (EDR US Hist Cleaners)	EDR	Adjoining Sites
Recovered Government Archive LUST (RGA LUST)	EDR compiled from historic SWRCB records/databases	0.5
Recovered Government Archive Solid Waste Facilities List (RGA LF)	EDR compiled from historic Department of Resources Recycling and Recovery records	0.5

The table below is summary of sites found within the search distances of the additional environmental record sources which were reviewed for this assessment. The table includes the name, address and Map ID provided in the attached database report; the location of each site with respect to the Property; whether the site is hydraulically upgradient, crossgradient or downgradient of the Property; and a summary of the database listing(s) and the risk the site(s) pose to the Property. This summary does not include sites where the agency has closed the case file and sites that are downgradient and information does not indicate the Property may have been impacted. These sites may be found in EDR’s database report included in Appendix D.

Name and Address	Distance (miles), Direction from Property, and Gradient	Databases	Comments (Media affected, Risk to Property, other information)
Be Wise Ranch 16919 Four Gee Rd. EDR ID#1	Former tenant on the Property	HMMD	Be Wise Ranch was a tenant farmer on the Property from 2006-2011. The business grows organic produce. It was permitted by DEH (Facility ID#207039) for hazardous materials storage related to fuel for its equipment. Low risk to the Property.

Information was not found during this assessment which indicated “orphan” sites (sites not plotted because of insufficient geo-coding information) which may appear on the above-listed databases had impacted the Property.

4.3 Physical Setting

4.3.1 Topographical Characteristics

The Property is located in the southeast ¼ of the southeast ¼ of Section 19, Township 13 South, Range 2 West (San Bernardino baseline and meridian) on the Escondido, California 7.5 minute United States Geological Survey (USGS) Topographic Map, which was reviewed for surface hydrologic and topographic characteristics. The topography of the Property is gently sloping with the local topographic gradient tending to the north toward Jason Creek (Lizzi, 2007), a seasonal creek paralleling the north border of the Property. Regionally the topographic gradient tends to the west-southwest. Site elevation ranges from approximately 485 above mean sea level (amsl) on the north end of the Property to 525 feet amsl on the south end of the Property. Hydraulic flow is generally in a down-gradient direction, usually toward the nearest surface water body. Surface drainage in the subject area is anticipated to flow to the north-northwest toward Jason Creek. Flood plain zoning for the Property is Zone X which includes areas determined to be outside the 0.2% annual chance floodplain.

4.3.2 Geological Setting

The Property is in the Coastal Plain section of the San Diego region. This section is characterized as a 10-mile wide strip of land which roughly parallels the coastline. It is dissected by various rivers which have formed a series of wide, flat-bottomed alluvium-filled valleys that provide important groundwater reservoirs.

Specifically, the Property is within an area that is described as being primarily underlain by Stadium Conglomerate. This formation is described as a massive cobble conglomerate with a dark yellowish-brown coarse-grained sandstone matrix. A portion of the south end of the Property is underlain by Friars Formation. This formation is described as massive, yellowish gray, medium grained, poorly indurated sandstone interlayered with dark greenish-gray sandy claystone. (Tan and Kennedy, 1999)

4.3.3 Soil Characteristics

The following surface soil have been mapped by United States Department of Agriculture Natural Resources Conservation Service (1973) as being on the Property:

- Diablo clay, 2 to 9% slopes - This soil consists of well-drained, moderately deep to deep clays derived from soft, calcareous sandstone and shale. Diablo clay has slow permeability, high shrink-swell potential 6.8 to 7.5 pH range, which is neutral to moderately alkaline suggesting that the risk of corrosion to uncoated steel pipes is low to moderate.
- Huerhuero loam, 2 to 9% slopes - This soil consists of moderately well-drained loams that have a clay subsoil. Huerhuero loam has slow permeability, high shrink-swell potential, a 5.3 to 7.0 pH range, which is strongly acidic to neutral suggesting that the risk of corrosion to uncoated steel pipes is high.
- Olivenhain cobbly loam, 2 to 9% slopes - This soil consists of well-drained, moderately deep to deep cobbly loams that have a very cobbly clay subsoil. Olivenhain cobbly loam has very slow permeability, moderate shrink-swell potential, a 5.1 to 5.7 pH range, which is moderately to strongly acidic suggesting that the risk of corrosion to uncoated steel pipes is high.
- Salinas clay loam, 2 to 9% slopes - This soil consists of well-drained and moderately well drained clay loams that formed in sediments washed from Diablo, Linne, Las Flores, Huerhuero, and Olivenhain soils. Salinas clay loam has moderately slow permeability, moderate shrink-swell potential, a 7.2 to 8.0 pH range, which is neutral to moderately alkaline suggesting that the risk of corrosion to uncoated steel pipes is low to moderate.

4.3.4 Hydrogeological Characteristics

The Property is in the Rancho Santa Fe Hydrologic Subarea of the Solana Beach Hydrologic Area of the San Dieguito Hydrologic Unit of the San Diego Hydrologic Basin (905.11). The groundwater within the Solana Beach Hydrologic Area is listed as having beneficial uses for municipal, agricultural and industrial purposes (California Regional Water Quality Control Board, San Diego Region, 1994, amended 1995).

Specific groundwater data was not found for the Property. The water well used by the Golems is located on the north end of the north adjoining open space site. A study of the well in 2004 by a California State University Fullerton student for his master's thesis noted that the well was drilled to a depth of 356 feet below ground surface (bgs) and "has been flowing under artesian conditions since it was installed in September 1951" (Lizzi, 2007).

Lizzi's thesis report also describes four wells installed in 1999 by Geocon approximately 1,000 feet west of the Golem well on the Bernardo Lakes property. The wells were reportedly installed to evaluate for petroleum hydrocarbon and methane vapors encountered while excavating a storm drain trench for the "Bernardo Lakes property." An explosion had occurred in the vicinity of the location of some former USTs. (It's not clear if the explosion occurred while digging the trench. This incident appears to be tied with the database listing discussed in Section 4.1.) The wells were installed to a depth of 50 to 90 feet bgs and after they equilibrated groundwater was encountered at depths of 19 to 59 feet bgs. Groundwater flow direction was not provided in the thesis.

Based on surface topography, groundwater flow in this area is expected to flow west-southwest. (Groundwater flow directions can be influenced by many variables such as faults and local groundwater pumping operations and other site-specific conditions.)

The most recent water quality report (Year 2015) for the Olivenhain Municipal Water District states that the district imports 100% of its raw water from surface sources. OMWD does not use local groundwater sources for domestic water. (Lizzi's thesis was investigation whether the Golem well produced enough flow to be a reliable source of irrigation water and the conclusion of the thesis is that it did not meet OMWD's flow requirements.) The report states that OMWD drinking water met primary and secondary water quality standards established by USEPA and the State of California during 2015.

Of note, during the site reconnaissance Mr. Reyes explained that the pipe from the Golem well that extends onto the Property to a water tank northwest of the caretaker's cottage has been capped off. He assumed the two residences on the Property were served by OMWD and not well water.

4.4 Historical Use of the Property

4.4.1 Previous Environmental Reports

Previous environmental assessments and investigations of the Property were not found during this assessment. Harper Communities provided a copy of an Environmental Questionnaire & Disclosure Statement completed by Mr. Richard Cromwell, trustee of the Golem Family Trust, in March 2010 for Christian Community Credit Union. The questionnaire was completed as part of due diligence research for Chinese Bible Church of San Diego's loan to purchase the Property.

Information provided in responses to the questionnaire included the following:

- Both residences are on septic.
- "Brammer Farms" (also known as Be Wise Ranch) was a tenant farmer in 2010. The business maintained aboveground storage tanks (ASTs) for gas and diesel. Mr. Cromwell did not know the capacity of the ASTs but stated that Brammer inspected them monthly. The fuel was apparently for farm equipment used by Brammer.
- Mr. Cromwell stated that he was not aware of any chemical storage on the Property.

- Mr. Cromwell was not aware of any chemicals applied to the Property.
- Mr. Cromwell stated that he was not aware of any spills, leaks or releases of chemicals on the Property.
- Mr. Cromwell stated he was not aware of the disposal of liquid or solid waste on the Property. He said household trash picked up by EDCO was the only waste stream he was aware of at the Property.

4.4.2 Chronological Review

A search of selected and readily available historical records was performed and interviews conducted with people having knowledge of the Property's history, in an effort to find if past use of the Property or activities conducted on, or in the vicinity of the Property could have adversely impacted the Property.

In summary, the Property was undeveloped in 1928 and 1939 aerials. In a 1947 aerial the Property and land surrounding it to the west and north had been had been recently tilled possibly as preparation for barley or alfalfa. By 1949 the land again appeared undeveloped. The Golems bought the Property and other adjoining land in 1951 and developed the Property with a residence and a ranch for cattle and horses. This use continued until 1997 when Mrs. Golem decided to sell the ranch except for the Property parcel. Otherwise Property use since 1997 has been primarily residential except for a period between 2006 and 2011 when an organic farming operation cultivated row crops on the east side of the Property. A longtime employee of the Golems, Mr. Roberto Reyes, has occupied the caretaker's cottage for many years. Mrs. Golem occupied the main residence until her death in 2001. Chinese Bible Church of San Diego which acquired the Property in January 2011 has used the main residence to house clergy.

The historical resources used in this assessment, along with Coast 2 Coast's findings, are presented below in chronological order. Attempts were made to find information on five-year intervals but data gaps may exist if information was not reasonably ascertainable for each interval. Data gaps occurred for the following five-year periods: 1940 and 1955, but the use of the Property during each of the periods surrounding these periods appeared to be similar which indicated that the missing historical data was not significant.

Prior to 1940: 1893 and 1901 topographic maps did not depict structures on the Property. The maps do not depict features of environmental concern such as wells or mining pits on or near the Property. 1928 and 1939 aerial photographs depict the Property as undeveloped land. Jason Creek is visible north of the Property border weaving a zig-zag alignment as it flows east to west. Evidence of hazardous materials use on the Property was not found.

1940: A historical resource was not found for this period.

1945: A 1947 aerial photograph depicts the Property, east adjoining site and area north of Jason Creek as having been cleared of vegetation and possibly dry-farmed. This was the only aerial of those reviewed which indicates the possibility of an agricultural crop prior to the Golems purchase of the Property in 1951. A 1949 aerial photograph again depicts

the Property as undeveloped land. 1948 and 1949 topographic maps did not depict structures on the Property. The maps do not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found.

1950: Mrs. Aileen Golem's obituary stated that she and her husband, Howard, purchased land including the Property in 1951. A 1953 aerial photograph depicts one building on the Property where the caretaker's house currently exists. Artesian Road bordered the south side of the Property and a narrow dirt driveway was visible. Jason Creek had been altered to provide a straight alignment as it crossed the Property. Mr. Roberto Reyes, who was interviewed during the current site reconnaissance and lives in the caretaker's cottage said he began working for Mr. Golem in 1972. He recalled Mr. Golem describing to him their temporary residence. He said it was a portable structure which they used while the main single-family house was built. It is likely that this is the structure visible in the 1953 aerial. The obituary said the Golems were ranchers who raised cattle and horses on their "sprawling North County ranch." Mr. Reyes thought the Golems had owned a square mile of land which included the Property. Evidence of hazardous materials use on the Property was not found.

1955: A historical resource was not found for this period.

1960: A 1964 aerial photograph depicts the current single-family residence and attached garage and the caretaker's house. Evidence of hazardous materials use on the Property was not found.

1965: A 1967 aerial depicts the addition of a barn with a corral extending to the east of the barn. A portion of the concrete pad from the barn is still present on the Property. Mr. Reyes said the area east of the corral and barn was used as pasture. The aerial also depicts a stormwater collection trench in the center of the east pasture area. A 1968 topographic map depicts the single-family residence and attached garage. The creek is also visible to the north and Artesian Road to the south. The Property is immediately north of the incorporated city of San Diego boundary. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. Evidence of hazardous materials use on the Property was not found.

1970: A 1970 aerial photograph did not depict changes compared to the 1967 aerial. A 1970 city directory lists Howard Golem on Artesian Road but does not list an address number. A 1973 aerial photograph depicts the addition of a small structure south of the barn that Mr. Reyes described as by Mr. Reyes as Mr. Golem's office/workshop. A second small building west of the barn is also visible but the use is not known. Evidence of hazardous materials use on the Property was not found.

1975: A 1975 photorevised topographic map depicts the addition of the caretaker's house and the barn compared to the 1968 map. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. A 1975 city directory lists Howard Golem on Artesian Road but does not list an address number. A 1979 aerial

photograph depicts the addition of another small building or awning southeast of Mr. Golem's office. Evidence of hazardous materials use on the Property was not found.

1980: A 1980 city directory lists Howard Golem on Artesian Road but does not list an address number. A 1983 aerial photograph depicts the addition of the open sided workshop west of the caretaker's cottage which still currently exist. The aerial does not depict significant changes to the Property compared to the 1979 aerial. Evidence of hazardous materials use on the Property was not found.

1985: A 1985 aerial photograph does not depict significant changes to the Property compared to the 1979 aerial. A 1986 city directory lists Howard Golem as the occupant of 9654 Artesian Road. A 1989 aerial photograph depicts the extension of the corral onto a portion of the north adjoining site. Other significant changes compared to the 1985 aerial were not observed. Evidence of hazardous materials use on the Property was not found.

1990: A 1991 city directory lists Howard Golem as the occupant of 9654 Artesian Road. Evidence of hazardous materials use on the Property was not found.

1995: A 1995 aerial photograph does not depict significant changes to the Property compared to the 1989 aerial. Howard Golem died in November 1995. Mrs. Golem's obituary states that she continued to operate the ranch until 1997 when she sold it. Assessor records indicate she sold land to North County Venture, LLC in September 1998; however, the Property appears to have remained part of the Golem Family Trust. A 1996 topographic map depicts four structures on the Property in the locations of the single-family house, caretaker's cottage, barn and the small building west of the barn. The map does not depict features of environmental concern such as wells or mining pits on or near the Property. A 1997 city directory lists Howard Golem as the occupant of 9654 Artesian Road. Evidence of hazardous materials use on the Property was not found.

2000: A 2000 city directory lists Howard Golem as the occupant of 9654 Artesian Road. Mrs. Golem died in November 2001. A 2002 city directory lists Howard Golem as the occupant of 16919 Four Gee Road. Mr. Reyes estimates that the barn was demolished in 2004. Evidence of hazardous materials use on the Property was not found.

2005: A 2005 aerial photograph depicts the concrete pads where the barn and Mr. Golem's office were located. The small building which had been west of the barn has also been removed. The La Viña residential track and the Rancho del Norte Apartments have been constructed south of the Property. Station #2 of the Rancho Santa Fe Fire Protection District is across Four Gee Road from the small west triangular portion of the Property. East of the Property, grading for a residential tract has occurred. A 2005 city directory lists Roberto Reyes as the occupant of 16919 Four Gee Road.

DEH, County Department of Agriculture records and the environmental questionnaire described in Section 4.4.1 indicate that Bill Brammer/Be Wise Ranch cultivated organic crops on the east side of the Property between 2006 and 2011. Mr. Reyes recalls him growing cucumbers, squash, strawberries, kale and lettuce on the Property. He said that

Be Wise Ranch maintained two ASTs for fuel (diesel and gas) for farm vehicles. He said that produce was stored in a cold storage unit on a slightly elevated hill that allowed trucks to back up to the unit and load without having a paved loading dock. He said the cold storage unit was powered by electricity. A 2009 aerial photograph is consistent with Mr. Reyes' description and shows fields with row crops on the east side of the Property and a cold storage building located approximately between where the barn and Mr. Golem's office were previously located. Mr. Reyes also recalls that the ASTs were stored west of the cold storage unit in an area obscured by trees in the 2009 aerial. The Sheriff's substation has been built on the southeast adjoining site. Evidence of hazardous materials use on the Property beyond the fuel ASTs was not found.

2010: A 2010 aerial photograph depicts crops on the east side of the Property and the cold storage unit still in place. A 2010 city directory lists Roberto Reyes as the occupant of 16919 Four Gee Road. Chinese Bible Church of San Diego was granted the Property in January 2011. A 2012 aerial photograph depicts the east side of the Property as undeveloped land. The cold storage unit has been removed. The Property generally appears as it currently exists. Evidence of hazardous materials use on the Property beyond the fuel ASTs was not found.

2015: A 2015 aerial photograph depicts the Property as it currently exists. A 2015 city directory did not list an occupant for 16919 Four Gee Road. Evidence of hazardous materials use on the Property was not found.

4.4.3 Historical Sources Reviewed

Historical sources between 1893 and the present were reviewed and included the following:

Aerial Photographs: EDR provided aerial photographs for the years 1939, 1947, 1949, 1953, 1964, 1967, 1970, 1979, 1985, 1989, 1995, 2005, 2009, 2010 and 2012. Aerials for the years 1928, 1973 and 1983 were obtained at the County of San Diego Public Works Department Cartographic Services. An aerial photograph for the year 2015 was obtained from Terraserver.com.

Building Permits: County of San Diego Department of Planning and Land Use was contacted for building permit records for the Property. The County maintains computerized records of building permits dating back to 1987 and descriptions of purged building permits dating back to 1972. Records of permits prior to 1972 are not available. A technician reviewed the digital and microfilm records and did not find building permits for the Property.

City Directories: Directories for years between 1970 and 2015 were reviewed in the California History Room at the main branch of the City of San Diego Library. The Golem's name first appeared in a listing of residents on Artesian Road in the 1970 directory. Many unincorporated areas of San Diego County began to be included in city directory listings starting in 1970 when Haines published its first directory for the county. Coast 2 Coast has not found a resource for criss-cross address listings for the Property area prior to 1970.

Chain-of-Title/Assessor Records: A chain of title or a search for environmental liens was not in the scope of work for this project. Coast 2 Coast reviewed recent assessor information for the Property available on First American Title Company's FastWeb database. The County of San Diego Tax Assessor requires written permission from the

Property owner to review tax files and therefore the files are not readily accessible within the scope and time constraints of this assessment.

Historical Topographic Maps: Historical topographic maps for the years 1893, 1901, 1948, 1949, 1968, 1975, 1996 and 2012 were obtained from the USGS Map Store.

Sanborn Maps: EDR reported that Sanborn maps were not available for the Property area.

4.5 Historical Use of the Adjoining Sites

Specific historical research was not conducted for the adjoining sites and surrounding area. However, in the process of researching historical data for the Property, the following historical information was obtained for the adjoining sites:

North: The site adjoining the Property to the north includes Jason Creek. The Golems straightened the creek alignment after they acquired this site in 1951. In general, the Golems used the site for grazing or cultivation of alfalfa or barley. The original well for the Property is located on this site which allowed for irrigation of crops. It has been open space for approximately the last 15 years after areas of the site were designated as having wetlands. Issues of further environmental concern associated with the past use of this adjoining site were not found.

East: The west boundary line of the former Rancho San Bernardo forms the property line between the Property and the east adjoining site. The vegetation on this site is distinct compared to the Property. From at least 1928 through 1995 the site was covered with native vegetation and areas where the vegetation had been cleared. By 2005 the current residential tract was under development. Issues of further environmental concern associated with the past use of this adjoining site were not found.

South: The boundary line separating the City of San Diego and unincorporated County land serves as the south border of the Property. Artesian Road served as the main access to the Property until the late 1990s when the segment of the road bordering the Property was closed. The site adjoining the Property to the south remained undeveloped through at least 1995. By 2005 the current multi-family residential developments had been constructed. Issues of further environmental concern associated with the past use of this adjoining site were not found.

West: Sites adjoining to the west included land on the west side of Four Gee Road which primarily remained undeveloped except for a period around 1970 when a small orchard was observed. The current Rancho Santa Fe Fire Protection District station was constructed sometime between 2000 and 2005. On the east side of Four Gee Road the adjoining site area included land that followed a similar history to the north adjoining area. More recently, the area has been open space for approximately the 15 years. Issues of further environmental concern associated with the past use of these adjoining areas were not found.

In addition, historic land usage in the general vicinity of the Property included rural ranch with some agricultural cultivation. Development of the surrounding area with the current suburban neighborhoods began in approximately 2000. Information was not found during this assessment indicating that these past uses impacted the environmental quality of the Property.

5.0 PROPERTY DESCRIPTION AND SITE RECONNAISSANCE

5.1 Property and Vicinity General Characteristics

Lot Size: 9.1563 acres

Current Zoning: The Property is within the Santa Fe Valley Specific Plan. Historically it was zoned Rural Residential.

Roads: Roads were not observed crossing through the Property. The following roads are adjacent to the borders of the Property:

West: Four Gee Road

South: Remaining portions of the former Artesian Road

5.2 Structures, Other Improvements and Utilities

Site Improvements: Two residences which have an approximate floor area of 3,103 square feet.

The main single-family house is a one-story structure built on a partial crawl space and partial slab on grade. The exterior walls are finished with wood siding, wood trim, brick and glass. The roof is composed of wood framing members, a wood deck and a built up roofing system. Ceilings are finished with cedar paneling. Interior partition walls were finished with cedar paneling, brick and stone. Floor finishes include carpet and resilient sheet flooring. HVAC includes two forced air unit for heat and electric-powered air conditioning. Building and HVAC insulation were not observed. The attached garage is built on concrete slab on grade with a wood paneled exterior, exposed structure interior and a built up roof.

The caretaker's cottage is a one-story structure built on a partial crawl space and partial slab on grade. The exterior walls are finished with wood siding, wood trim and glass. The roof is composed of wood framing members, a wood deck and rolled composition roofing. Ceilings are finished with pressboard held in place by an exposed wood grid. Interior partition walls are finished with drywall. Floor finishes include carpet and resilient sheet flooring. There is no HVAC system. Building insulation was not observed.

Other Structures: West of the caretaker's cottage is an open-sided workshop/carport/storage area. Another awning extends off the west side of the two-car garage and covers a lawnmower, ladder and other maintenance/yard care equipment.

Hardscaped Areas: The driveway and parking areas on site are paved with asphalt. The pavement appeared to be in good condition and significant surface staining, patching or depressions were not observed.

Landscaped Areas: Landscaping included trees, bushes, flowers, shrubs and grass. The vegetation appeared to be in good condition and did not appear to be damaged or

stressed in a manner which could be attributable to the presence of contamination.

Water Retention Areas: Pits, ponds, lagoons, swimming pools and other water retention areas were not observed on the Property.

Swimming Pool: An aboveground Jacuzzi is located behind (north) of the caretaker's cottage.

Utilities: The following agencies or businesses provide utility services to the Property:

Electric power:	San Diego Gas & Electric
Gas:	Not provided; The single-family house uses propane.
Potable Water:	Olivenhain Municipal Water District
Sewage:	Septic system

Heating & Cooling Systems: Heating and cooling systems on the Property are fueled by propane and electricity.

5.3 Site Reconnaissance Methodology and Limiting Conditions

On June 21, 2016, Marybeth Norgren conducted a site reconnaissance of the Property to find if current usage or activities on the Property have created, or have the potential to create, an environmental impairment to the Property. The results of the site reconnaissance are presented below.

A site reconnaissance typically begins with a guided tour of the interior of the buildings on the Property. During the site reconnaissance an emphasis is placed on viewing areas where activities likely to use and generate hazardous materials occur such as maintenance and repair areas, boiler rooms and manufacturing areas. In addition, accessible common areas and a representative sample of tenant (occupant) spaces are observed.

The site reconnaissance continues by touring the exterior of the Property buildings and viewing the interior of any secondary structures such as sheds. The site reconnaissance is completed by viewing the Property from all adjacent public thoroughfares and commercial properties (where possible).

During this assessment, access to the Property was provided by Mr. Roberto Reyes and the church family living in the single-family house. During the current assessment, the Property appeared to be accessible and limitations were not placed on Property access.

5.4 Observed Use of the Property and Current Condition

The Property is currently occupied by a family associated with the Chinese Bible Church in the single-family house and by Mr. Roberto Reyes and his family in the caretaker's cottage. The Property is currently utilized for residential purposes. Tenants using or generating hazardous materials were not observed. In general the Property and building lease spaces were observed to be in fair to good condition. On-site activities observed during Coast 2 Coast's assessment of the Property did not appear to represent an environmental hazard to the Property.

A Property Plan (Figure 2) depicting the general configuration of the Property as well as pertinent site observations is included in Appendix A. Photographs of the Property are included in Appendix B.

6.3 Interior and Exterior Observations

Coast 2 Coast looked for the following improvements and features interior and exterior to the buildings on the Property and whether the use, treatment, storage, disposal or generation of hazardous substances and petroleum products had occurred on the Property.

Drains and Sumps:

Floor drains, floor sinks, trench drains, sumps and clarifiers were not observed on the Property.

Odors:

Strong, pungent or noxious odors were not detected during the assessment.

Oil and Gas Pipelines and Wells

Map W1-7 prepared by the State of California Division of Oil, Gas and Geothermal Resources did not show oil wells within a one-mile radius of the Property.

Pest Control:

The Property does not use regularly-scheduled pest control services.

Potential PCB-Containing Equipment:

Transformers and other potential PCB-containing equipment were not observed on the Property.

Septic Systems and Wells:

Both residences are on a septic system. Mr. Reyes said the leach field is located north of the single-family house and east of the caretaker's cottage.

It appears the two residences were connected to the public water system at some point. An internet search for information about the ranch and the Golems' use of the Property revealed information that The Golems were community leaders who helped establish the Olivenhain Municipal Water District in 1959 in order to provide a reliable source of water to Santa Fe Valley. They donated some of their ranch land for the District's original water tank system. (The SD Union Tribune, 2001)

As noted in Section 4.3.4, Mr. Golem did install a well for the ranch in 1951 but it was located on what is now the north adjoining open space. A pipe extended from the well to an aboveground storage tank on the Property. Mr. Reyes said that the original water tank was replaced in the 1980s (his best guess) with the storage tank that is still located northwest of the caretaker's cottage. Mr. Reyes capped the pipe leading from the well to the tank but he did not recall when that occurred.

Stains and Corrosion:

Floors, walls and ceilings were observed for evidence of staining and corrosion caused by sources other than standing water. Evidence of stains or corrosion by hazardous substances was not observed.

Stained Soil and Pavement:

Visual observations were made of the soil and paved areas to find discolorations or surface staining which could be indicative of contaminant discharge.

Significant soil and pavement stains were not observed on the Property.

Hazardous Materials:

The following materials were observed to be stored exterior to the buildings on the Property at the time of Coast 2 Coast's assessment:

- A propane tank which provides gas to the single-family house. The caretaker's cottage only has electricity.

Mr. Reyes was asked how the Golems' ranch fueled its ranch equipment. He said they used 5-gallon portable gas containers.

Drums and Other Containers:

Drums or other potential chemical containers were not observed.

Storm Drains:

Storm drains were not observed on the Property.

Surface Anomalies/Depression:

Visual observations were also made to find the presence of environmentally unusual and/or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, waste dump sites, leach fields or other subsurface activities.

Surface anomalies and depressions were not observed on the Property.

Surface Drainage on Site:

Based upon Property surface and improvement characteristics observed during Coast 2 Coast's site reconnaissance of the Property, surface drainage at the Property would flow to the north toward Jason Creek. At the time of the inspection it did not appear that the Property would be subject to wetlands restrictions.

Surface Drainage Obstructions:

During Coast 2 Coast's site reconnaissance it was observed that the Property is protected from surface run-off from adjoining sites to the north by topography.

Underground and Aboveground Storage Tanks:

Underground and above ground storage tanks were not observed on the Property.

Mr. Reyes described the location of where Be Wise Ranch had two aboveground fuel tanks when it occupied the east side of the Property for crop cultivation between 2006 and 2011. Staining was not observed in the area pointed out by Mr. Reyes.

Waste Disposal:

The following vendors provide waste disposal services to the Property:

Trash Collection: Edco

Hazardous Waste Disposal: The Property does not currently generate hazardous waste requiring disposal.

Solid waste (trash) other than in proper containers was not observed.

5.6 Current Uses of Adjoining Sites

The present land usage of the adjoining sites was also observed to assess their potential to adversely impact the Property. These observations were made “off-site” and in most cases did not involve entering the adjoining site. The results of these observations are presented below:

North: The site adjoining the Property to the north includes Jason Creek and open space owned by the Salviati Homeowners Association. Visual observations of this site [did/not] indicate that current activities on this adjoining site had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

East: The site adjoining the Property to the east is occupied by a residential tract. Visual observations of this site did not indicate that current activities on this adjoining area had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

South: The sites adjoining the Property to the south are occupied by the La Viña residential tract, Rancho del Norte Apartments (16775 Saintsbury Glen) and the 4S Ranch Substation of the San Diego County Sheriff’s Department (10282 Rancho Bernardo Road). Wild Horse Glen road separates the Property from the La Viña tract. Visual observations of these sites did not indicate that current activities on these adjoining sites had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

West: The site adjoining the Property to the west includes from east to west: additional open space owned by the Salviati Homeowners Association; Four Gee Road; and the Rancho Santa Fe Fire Protection District Station #2 at 16930 Four Gee Road. Visual observations of these sites did not indicate that current activities on these adjoining sites had adversely affected the Property nor did they reveal current activities that appear to represent an environmental threat to the Property.

5.7 Area Reconnaissance

A vehicular reconnaissance of the surrounding area in the immediate vicinity of the Property was conducted to observe, in very general terms, the current land use of the sites in the area and to assess if this use poses an environmental threat to the Property. Land usage in the general vicinity of the Property included new residential tracts, new retail centers to support the community and undeveloped former ranch land. These uses did not appear to pose an environmental threat to the Property.

6.0 INTERVIEWS

Records of communication for interviews and agency contacts completed during this assessment are included in Appendix E.

6.1 Interview with Owner

Mr. Dennis Ho, Board Member, Chinese Bible Church of San Diego completed an Owner Questionnaire. He was not aware of issues or events of environmental concern associated with the Property. He referred to a questionnaire completed by Mr. Richard Cromwell, Trustee of the Golem Family Trust for questions concerning the past use of the Property. That questionnaire is described in Section 4.4.1.

6.2 Interview with the Property Manager

Mr. Robert Reyes, Caretaker, was interviewed during the site reconnaissance. He first began working for the Golems in 1972. He shared his knowledge of the Property's history. His comments about ranch operations are included in various sections of the report. He estimated dates for most questions. In general he was not aware of issues or events of environmental concern associated with the Property.

6.3 Interviews with Occupants

Mr. Reyes occupies the caretaker's cottage and used the garage attached to the single-family house for storage. He provided access to both structures during the site reconnaissance though the view of his home was limited to what could be seen through the front door.

The family living in the single-family house provided access to the house.

6.4 Interviews with Local Government Officials

Coast 2 Coast contacted the Certified Unified Program Agency (CUPA) for the Property. The CUPA is responsible for enforcement and monitoring of various environmental programs. For the Property, the San Diego County Department of Environmental Health (DEH) is the CUPA. In addition, Coast 2 Coast contacted the City of San Diego Fire Department, Rancho Santa Fe Fire Protection District, County of San Diego Department of Planning and Land Use (DPLU) and County of San Diego Department of Agriculture, Weights and Measures (County Ag) and requested to review files for the Property. A response from DEH is discussed below. The fire agencies did not find records for the Property. The County DPLU did not find building permits for the Property as their records typically only extend back to 1972, if available.

Processes or equipment requiring a permit from the San Diego Air Pollution Control District were not observed on the Property.

San Diego County Department of Environmental Health (DEH)

DEH is now generally responding to records requests electronically. For each address submitted to the agency, DEH will provide a written response that it has no records or it will provide electronic copies of its files for an address. In general, detailed inspection records dated earlier than the late-1990s for most sites have been purged from DEH's files and only a brief summary page is available. Copies of past and current Unified Permits, Hazardous Materials Business Plans

and Hazardous Materials Inventories are not readily available and require written permission from Business Owner to obtain. Coast 2 Coast attempts to acquire copies of these documents during the site reconnaissance. During the current site reconnaissance, activities which might require a CUPA permit were not observed.

On June 13, 2016, DEH provided the following records for 16919 Four Gee Road:

Establishment #207039 – Be Wise Ranch

- In July 2006, the business submitted a Business Owner/Operator Identification form and a Business Activities form to DEH indicating the business would be storing hazardous materials on the Property (fuel) above the reportable limit of 55 gallons.
- In January 2008, the business submitted a form certifying that its HMBP was still up to date.
- In November 2009, the business submitted a form certifying changes to its emergency contacts and site map.
- Records of DEH completing a compliance inspection on the Property were not found. Typically, the County Department of Agriculture, Weights and Measures completes hazardous materials inspections for agricultural operations. A response from this agency is below.

On June 14, 2016, DEH responded that it has no records for APN 678-422-03.

On June 28, 2016, DEH responded that it has no records for 9654 Artesian Road.

County of San Diego Department of Agriculture, Weights and Measures (County Ag)

On July 7, 2016, County Ag provided records it has for the Property. The records were for Be Wise Ranch and included duplicate copies of the DEH records noted in the above bullets plus one inspection report. The report was completed in January 2012 and documented the final inspection of the site. In the Remarks section of the report was the comment, “No hazardous materials on site.” The establishment number (207039) was deactivated following the inspection.

6.5 Interviews with Others

Other individuals with knowledge of the Property were not found during this assessment.

7.0 ADDITIONAL SERVICES

7.1 Asbestos

Summary of Previous Asbestos Surveys, O&M Program and Abatement Activities

Reports of previous asbestos surveys and abatement records were not found for the Property. The Property does not currently have an asbestos O&M Program in place.

Sampling Protocol

Coast 2 Coast Environmental performed a limited visual asbestos survey of the buildings located on the Property. The purpose of a limited asbestos survey is to assess if a building contains significant sources of asbestos-containing materials (ACM). The survey for the Property approximately followed the current recommended U.S. EPA guidance document for surveying and abating ACM (Guidance for Controlling Asbestos-Containing Materials in Buildings, 1985 edition). The survey was conducted by a CalOSHA Certified Asbestos Consultant.

Accessible areas of the Property were visually inspected to locate suspected sources of ACM. Demolition for access to materials was not conducted. Inaccessible materials (i.e. piping in the walls, hidden insulation treatments, rooms or areas not accessed during this inspection due to tenant occupation, secured areas, etc.) or other materials not evaluated during this assessment should be evaluated if and when they are located, and prior to building renovation or demolition activities which would disturb the materials. At the time of Coast 2 Coast's survey of the buildings, bedrooms in the residences were not accessible.

Survey Results

Friable or damaged, nonfriable building materials likely to contain asbestos were not found on the Property. Potential asbestos-containing materials (ACM) observed to generally be in good condition included drywall systems, resilient flooring and roofing materials. Insulation materials were not visible in either residence, but if they exist, they are also a potential ACM.

7.2 Lead-Based Paint

As the buildings on the Property were constructed in the 1950s and 1960s, it is possible that lead-based paint was used on the buildings. Lead-based paint was effectively banned for residential purposes as of 1978. Painted surfaces appeared to be intact and surfaces with cracked, chipped and peeling paint were not observed.

7.3 Radon

Radon is a colorless, odorless gas that can seep into structures from the ground. It is a leading cause of lung cancer. The USEPA has a recommended action level of 4.0 picoCuries per liter (pCi/L) of air. The USEPA has classified San Diego County as Zone 3, indicating that the average indoor radon activity is not expected to exceed 2 pCi/L.

Existing radon testing data for the Property area is summarized in EDR's report which is included in Appendix D. Within the zip code of the Property 11 homes were tested and all were reported to have radon concentrations less than 4.0 pCi/L. Within San Diego County, 30 homes were tested as part of a Federal program and were reported to have less than 4.0 picocuries/liter (pCi/L) with

the average concentration being 0.677 pCi/L on the first floor and 0.400 pCi/L on the second floor. As these results are below the EPA action level, it is not anticipated that radon poses a significant environmental threat to the Property.

7.4 Vapor Encroachment

The Property is not known to have had current or past contamination that may result in vapor encroachment. Evidence was not found during this assessment indicating that there was a potential environmental concern which may be the result of vapor intrusion with respect to the buildings on the Property.

Information was not found during this assessment indicating that adjoining and nearby sites have had current or past contamination which may have resulted in vapor encroachment.

Maps included in EDR's report in Appendix D did not indicate a regional groundwater contamination plume. Other information or evidence of a regional groundwater contamination plume was not found during this assessment.

Other conditions which may result in vapor encroachment at the Property were not found during this assessment.

8.0 FINDINGS AND CONCLUSIONS

Based upon Coast 2 Coast's review of the information obtained during the course of this assessment of the Property and herein presented, we have formed the following opinions:

- The Property and adjoining sites were not found on the Standard Environmental Record sources required to be reviewed under ASTM Standard E1527-13, including the following:
 - United States Environmental Protection Agency (U.S. EPA) National Priorities List (NPL) (including delisted sites)
 - State- and tribal-equivalent priorities list
 - U.S. EPA Superfund Management Enterprise System (SEMS) (including sites requiring no further action) [formerly Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)]
 - State- and tribal-equivalent CERCLIS
 - U.S. EPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposal Facilities (TSDF) and CORRACTS Facilities
 - U.S. EPA RCRA Generators
 - U.S. EPA Emergency Response Notification System (ERNS)
 - Federal Institutional Control (IC) or Engineering Control (EC) Registries
 - State- and tribal-equivalent IC and EC Registries
 - State Leaking Underground Storage Tank Program (LUST) and tribal equivalent
 - State Registered Underground Storage Tank (UST) and tribal equivalent
 - State Solid Waste Information System (SWIS) and tribal equivalent
 - State and tribal Voluntary Cleanup Program (VCP) sites
 - State and tribal Brownfields sites
- The Property appears on the following databases:
 - HMMD – Be Wise Ranch had two fuel ASTs for its on-site operation between the period 2006 and 2011. The County Department of Agriculture conducted a close out inspection in January 2012 and noted that hazardous materials were not observed on site.
- Three other sites within the designated ASTM radii of the Property appear on the DTSC EnviroStor and School Evaluation databases. While the presence of these sites in the vicinity of the Property may constitute an environmental risk to the Property, evidence was not found during the course of our assessment which indicated that the Property has been adversely impacted by these sites nor that they represent an imminent threat to the Property.
- The Property uses a septic system for sewage. Information was not found that disposal of hazardous materials and wastes into the septic system had occurred.
- Coast 2 Coast's review of historical information sources did not indicate that the Property had been subjected to past activities that would represent a potential environmental threat or impact to the Property.
- High voltage electrical transformers were not found on the Property.

- A review of a statewide radon study did not indicate the Property was within an area where radon is likely to be found in buildings in concentrations above the U.S. Environmental Protection Agency action limit of 4.0 picocuries per liter.
- This assessment did not reveal evidence of recognized environmental conditions (RECs) in connection with the current use of the Property.
- This assessment found the following REC in connection with the past use of the Property:
 - Prior to the development of the Property by the Golems, aerial photographs depict the entire Property possibly having been dry farmed in the 1940s. Records were not found documenting what crops were planted or whether pesticides and herbicides were used.
- Though not rising to the level of a REC the following environmental issues were noted on the Property:
 - Adjoining sites appeared on the following databases:
 - ◆ ENVIROSTOR & County SAM - Proposed Salviati Community/Bernardo Lakes Dev Prop 1 – These listings date to 2000 but address a concern in the Santa Fe Valley area concerning methane. The County of San Diego Board of Supervisors issued an ordinance concerning methane after it was found beneath completed homes in the area and appears to have been a partial cause explosion of an explosion while digging a trench for a stormwater drain.
 - Friable or damaged, nonfriable building materials likely to contain asbestos were not found on the Property. Potential asbestos-containing materials (ACM) observed to generally be in good condition included drywall systems, resilient flooring and roofing materials. Insulation materials were not visible in either residence, but if they exist, they are also a potential ACM.
 - As the buildings on the Property were constructed in the 1950s and 1960s, it is possible that lead-based paint was used on the buildings. Lead-based paint was effectively banned for residential purposes as of 1978. Painted surfaces appeared to be intact and surfaces with cracked, chipped and peeling paint were not observed.

9.0 RECOMMENDATIONS

Based upon Coast 2 Coast's review of the information presented in the report, and our resulting conclusions, we recommend the following:

- If the redevelopment plans include areas of exposed soil where visitors may congregate, it is recommended that soil sampling for pesticides, herbicides and metals be completed. For the east side of the Property, Bill Brammer/Be Wise Ranch may have sampled for these contaminants prior to planting its crops as it was an organic operation, but those records are not readily available. If finished areas where people will congregate are paved or covered with some type of impermeable surface, then sampling may not be necessary. This includes play areas for the children.

In addition, if soil is to be transported from the Property during redevelopment then sampling should be conducted to confirm if the soil is a hazardous waste due to historic agricultural chemical use.

- The County of San Diego should be contacted concerning its requirements for methane sampling as it relates to grading operations and future buildings planned for the Property. Two residential tracts north of the Property apparently were required to install methane mitigation measures to manage methane. It is not clear from limited information which was readily available during this assessment if the methane was caused by inappropriate management of organic material during mass grading activities or if there is a natural cause for elevated methane in the Santa Fe Valley area.
- If the existing residences will be demolished as part of the redevelopment of the Property, then it is recommended that a survey for asbestos-containing materials and lead-based paint be completed in order to properly manage these contaminants during demolition.
- If the residences are maintained, it is recommended that a lead-based paint survey be completed on the both residences. Due to the age of the buildings, the use of lead-based paint is a possibility and children are currently occupying one of the residences.
- It is Coast 2 Coast's opinion that further environmental assessment of this Property, beyond those items listed above, is not warranted at this time.

10.0 DEVIATIONS

We have performed a Phase I Environmental Site Assessment of the Property at 16919 Four Gee Road, San Diego, San Diego, California in conformance with the scope and limitations of ASTM Standard E1527-13. Exceptions to, or deletions from, the standard practice are described in Section 1.2 of this report. This assessment did not reveal evidence of recognized environmental conditions in connection with the Property except for the following:

- Prior to the development of the Property by the Golems, aerial photographs depict the entire Property possibly having been dry farmed in the 1940s. Records were not found documenting what crops were planted or whether pesticides and herbicides were used.

12.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Property. I have developed and performed all the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Submitted:

Experience

Ms. Norgren has 25 years of experience managing and conducting environmental site assessments (ESAs) and hazardous materials surveys on all types of properties including commercial, industrial, residential, agricultural and unimproved properties. She has utilized the ASTM 1527 standard for ESAs since its inception in the early 1990s and incorporated it into client specific standards as requested. She has managed projects involving underground storage tank removals, unauthorized releases and associated sampling. In addition, she has experience conducting all phases of asbestos and lead-based paint abatement projects including comprehensive building surveys, contract bid solicitation, contract administration, project specifications, and contract documentation. Prior to starting Coast 2 Coast Environmental, Inc. in 2004, she worked for both small and large consulting firms on projects primarily located in the western United States.

Relevant Projects

Wells Fargo Bank/First Interstate Bank, Bank of the West, Bank of America, Union Bank and Great Western Bank - Various Locations. Managed and conducted Phase I ESAs for commercial, industrial, retail and agricultural properties throughout California as well as Arizona, Nevada, Oregon, Washington, Texas and Midwest and East Coast sites. Assessment activities included Property reconnaissance, agency record reviews, historical land use research, geologic conditions research, and recommendations for handling identified concerns. Property reconnaissance has included asbestos sampling, radon sampling and/or water and paint sampling for lead. Conducted Phase II ESAs including comprehensive asbestos surveys and soil and groundwater sampling.

City of Ontario Housing Agency, Ontario, CA. Managed a multi-year contract for asbestos and lead-based paint sampling of 600 homes which were part of the Residential Sound Insulation Project to reduce air traffic noise from Ontario Airport. Other work included conducting Phase I ESAs and demolition surveys for asbestos and lead-based paint on properties being purchased by the City in high noise areas.

Paseo Project, San Diego State University Foundation, San Diego, CA. Prepared a Phase I Environmental Site Assessment (ESA) of five city blocks south of San Diego State University. The ESA was part of the Hazardous Materials Technical Study for the SDSU Foundation Master Plan concerning the formation of a redevelopment project area on lands adjacent to the University. The ESA included historical research dating back to the development of the area beginning in 1931 when the University moved to its current location. The report also included a review of agency files for four gas stations which were either currently or historically located on the site.

J Serra High School Expansion, San Juan Capistrano, CA. Prepared a Phase I Environmental Site Assessment Update as part of the Hazardous Materials Technical Study for an environmental impact report for the recreational facilities of the J Serra High School located on approximately 30 acres of land in San Juan Capistrano. As a private school, J Serra High School board chose not to have the project reviewed by the Department of Toxic Substances Control (DTSC), but the report was prepared in a format acceptable to DTSC. Issues associated with the project site included two adjacent and upgradient gasoline stations with active leaking underground storage tank cases and historic use of the site for agricultural orchards.

Various Residential and Commercial Developers and Land Brokers, San Diego County, CA. Managed and prepared Phase I ESAs for San Diego developers including McMillin Companies, The Otay Ranch Company, Affirmed Housing Group and Hitzke Development Corporation. Properties assessed have included large tracts of land proposed for use as residential communities, commercial developments and mitigation bank sites.

Department of the Navy, Southwest Division, San Diego, CA. Conducted lead-based paint surveys and prepared Operations and Maintenance Programs based on survey results. Surveys included all exterior and some interior surveys on 170 buildings at two naval bases in San Diego. Conducted Pollution Prevention Assessment surveys of various naval operation shops to identify processes in each shop that use hazardous chemicals and/or generate hazardous waste. Prepared reports describing and quantifying materials used in the shops' processes.

City of Los Angeles Department of Airports, CA. Managed asbestos survey of approximately fifty buildings at Van Nuys Airport and Van Nuys California Air National Guard Facility. Based on survey results, prepared asbestos abatement specifications. Project included arranging for approval of special abatement procedures from the South Coast Air Quality Management District.

Trizec Properties, Inc., Various Locations. Performed contractor supervision and industrial hygiene services during removal of asbestos-containing fireproofing. All buildings were multi-story commercial structures and projects ranged from abating single suites to full-floor abatement. Responsible for ensuring contractor followed all government regulations and maintained proper work practices.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

North County cattle rancher dies at age 90

| midnight Nov. 14, 2001

SPENCER SOPER

Staff Writer

Arleen Golem, who raised cattle and horses on a sprawling North County ranch and helped form the Olivenhain Municipal Water District, has died at the age of 90.

Born in upstate New York, Golem moved to San Diego in the 1930s with her husband, Howard, an executive with Consolidated Vultee Aircraft.

The couple originally lived in San Diego, then bought a ranch on Black Mountain Road southeast of Rancho Santa Fe in 1951.

After buying the ranch, the couple helped create the Olivenhain water district in 1959 and donated land for its water tank system, to provide a more secure water supply for the area. Howard Golem served on the water district board of directors.

Arleen Golem also owned Pennywells Antiques and Appraisers in La Jolla. She sold the shop in 1965 to focus on the ranch.

Her daughter, Sharon Parkhouse, who lives in Escondido, said Golem was often busy cooking dinners for cowboys working the ranch, especially during roundups.

She recalled a buffalo named Sampson one time strayed from its home in Fairbanks Ranch and hid among Golem's cattle. They finally found Sampson's owner, but not before Golem took a liking to the buffalo, Parkhouse said.

"She got a little stuffed buffalo and put a gold tag around its neck that said, 'In memory of Sampson,' " Parkhouse recalled.

Golem's husband died in 1995, and she ran the ranch alone until she sold it in 1997.

David McCollom, general manager of the Olivenhain water district, said he remembered going to Christmas parties at the Golem ranch, where they would serve generous portions of roast beef, turkey and venison.

"They were just good salt-of-the-earth people and they were a part of San Diego's history," he said of the Golems.

Dee Wunderlich, a longtime family friend, said she used to go horseback riding with Arleen Golem at their ranch on Sundays.

Golem was fond of animals and donated to local animal shelters and humane societies, Wunderlich said.

"She had money and she was very generous with it," she said.

Golem died Nov. 7 at her Santa Fe Valley home. She is survived by her daughter; sister Better Morse of Ocean Beach; brother Ken Hinds of Atascadero; and several grandchildren and great grandchildren.

Services are set for noon Thursday at El Camino Memorial Park Chapel on Carroll Canyon Road in San Diego.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/02/2016 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>BLACK MOUNTAIN RANCH</i> Facility Id: 60001540 Status: No Further Action	<i>SOUTHWEST CORNER OF</i>	<i>ENE 1/8 - 1/4 (0.127 mi.)</i>	<i>4</i>	<i>9</i>
<i>DEL NORTE HIGH SCHOOL</i> Facility Id: 37010044 Status: No Further Action	<i>BLACK MOUNTAIN ROAD/</i>	<i>SSW 1/4 - 1/2 (0.459 mi.)</i>	<i>6</i>	<i>14</i>

State and tribal leaking storage tank lists

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there is 1 SAN DIEGO CO. SAM site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PROPOSED SALVIATI CO Case Number: H38965-001 Facility Status: Preliminary Assessment	N FOUR GEES & ARTESI	WSW 0 - 1/8 (0.024 mi.)	2	8

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 05/02/2016 has revealed that there are 2 SCH sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

UTM Y (Meters): 3653631.0
Elevation: 504 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5641298 ESCONDIDO, CA
Version Date: 2012

Northwest Map: 5641310 RANCHO SANTA FE, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

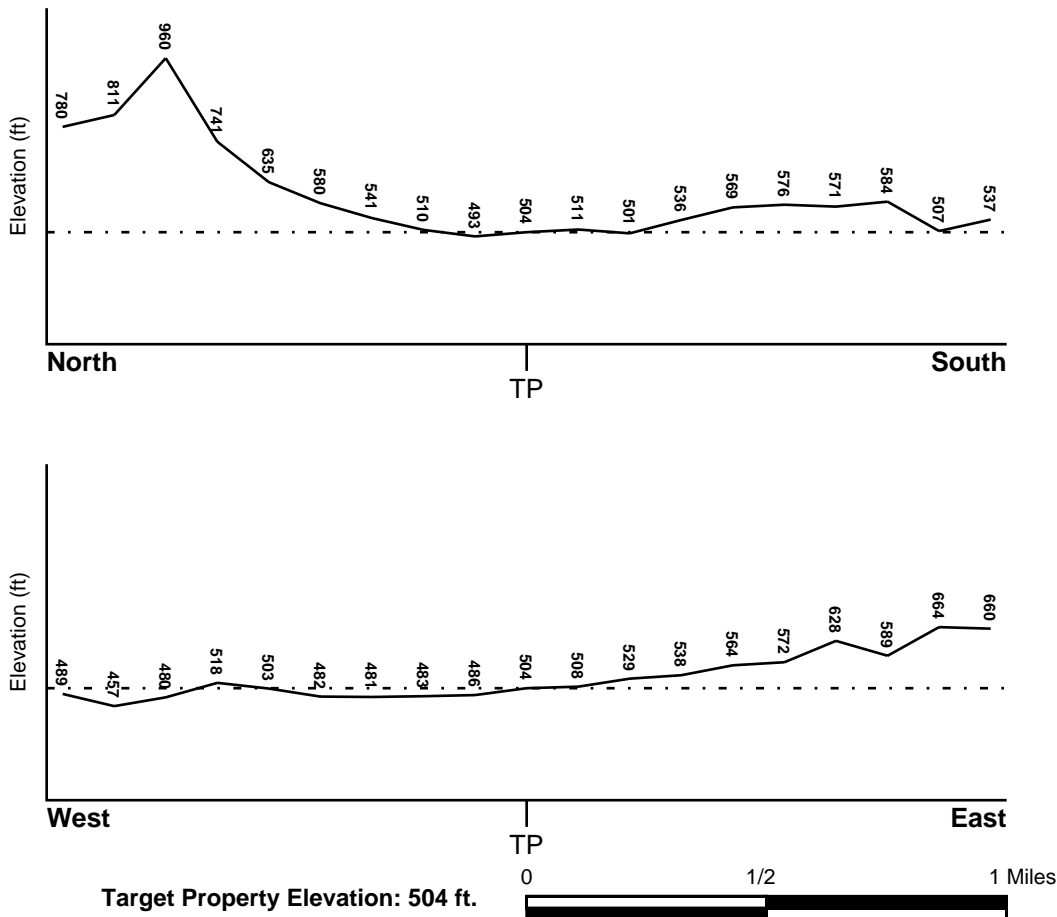

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SAN DIEGO, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06073C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ESCONDIDO	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: OLIVENHAIN

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6 Min: 5.6
2	9 inches	42 inches	very cobbly clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 5.5 Min: 5.1
3	42 inches	59 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 5.5 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OWNER QUESTIONNAIRE

Property:	Property Owner:	Report User:
Residence and Former Agricultural Land 16919 Four Gee Road San Diego, CA 92127 APNs: 678-060-27-00 and 678-422-03-00	Chinese Bible Church of San Diego 16919 Four Gee Road San Diego, CA 92127 Contact: <u>Dennis Ho</u> Email: <u>dennis.ho@live.com</u> Phone: <u>858-829-2604</u>	Harper Communities on behalf of Chinese Bible Church of San Diego 16919 Four Gee Road San Diego, CA 92127

At the request of Harper Communities, Marybeth Norgren with Coast 2 Coast Environmental, Inc. is the environmental professional preparing a Phase I Environmental Site Assessment (ESA) for your Property in accordance with ASTM E 1527-13. The ASTM standard requires the Property owner to be interviewed. In order to fulfill this requirement, this questionnaire is being sent to you for completion. Coast 2 Coast 2 Coast Environmental, Inc. appreciates your effort to respond to the questions in a timely manner. If you need assistance or have questions, please contact Coast 2 Coast Environmental, Inc. using the contact information listed above.

1. Are you aware of any environmental cleanup liens against the Property that filed or recorded under federal, tribal, state or local law?

No X

Yes _____ Please explain:

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed against the Property under federal, tribal, state or local law?

No X

Yes _____ Please explain:

3. As the owner and occupant of the Property do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No X

Yes _____ Please explain:

4. Does the purchase price being paid or most recent appraised value for this Property reasonably reflect the fair market value of the Property? (We are not asking you to tell us what the Property is worth, just whether you think it is fair and not reduced in value due to environmental concerns.)

Yes

Not applicable _____

No _____

Please explain N/A response: _____
(Refinancing not buying Property or other reason)

5. If the preceding answer is "No", is the price lower because contamination is known or believed to be present at the Property?

Not applicable _____

Yes _____ Please explain:

No _____ Please explain:

(Ex: Foreclosure sale, slow market or other known reason for reduced price)

6. Are you aware of commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions of releases or threatened releases of hazardous materials or waste?

No

Yes _____

7. Please provide as much information as you know about past owners, occupants and uses of the Property?

a. Business names Private Residence & Brammer Farms

b. Approximate years the previous businesses occupied the Property Unknown

c. How the previous businesses used the Property Organic Farm

d. Current or past Property owner names Richard Cromwell, Trustee (Golem Family Trust)

e. Reasons for selling (ex. business expanded – needed more room, business closed, estate sale due to death, etc.). see previous Phase 1 questionnaire

f. Addresses previously used for the Property other than 16919 Four Gee Road

8. Do you know of specific chemicals that are present or were previously present at the Property?

No No

Yes _____ Please explain:

9. Do you know of spills or other chemical releases that have taken place on the Property?

No No

Yes _____ Please explain:

10. Do you know of any environmental cleanups that have taken place on the Property?

No No

Yes _____ Please explain:

11. Are there previous environmental reports for the Property (e.g. prior Phase I ESA, Phase II ESA, soil or groundwater sampling reports)?

No _____

Yes X Please explain and provide copies of the reports: Phase 1 Questionnaire by previous owner.

12. Based on your knowledge and experience related to the Property, are there any obvious indicators that point to the presence or likely presence of contamination at the Property?

No X

Yes _____ Please explain:

13. Any other comments you would like to provide concerning the Property:

No X

Yes _____ Please explain:

This questionnaire should be signed by the Property owner (e.g. managing member, officer of corporation or other legal representative).

Prepared by: Dennis Ho Title Board Member Date 6-27-16

State

Zip

Please answer all questions using separate sheet when necessary

A. Current/Former Uses of the Property

1. Name of current and all former owner(s) Please see Attachment "A" for all answers
2. Description of current use(s) of the Property (if other than office use exclusively, please provide name(s) of current occupant(s) and date(s) of occupancy) _____
3. Date of completion of original construction and any substantial renovations (including tenant improvement) _____
4. Name(s) of previous occupant(s) _____
5. Description of previous use(s) of the Property _____
6. Description of use(s) of adjacent properties _____

B. Asbestos

1. Is there asbestos currently in any of the construction materials contained in the building(s)? _____
2. If so, has a survey been conducted to assess the type, amount, location and condition of asbestos? (If so, please attach a copy of any survey report.) _____
3. Has asbestos air samples been taken? If so, what are the results? _____

C. Polychlorinated Biphenyl ("PCBs")

1. Have polychlorinated biphenyl (PCBs) been used in electrical transformers, capacitors or other equipment at the Property? _____
2. If so, please describe the use and quantity of PCBs used on the Property. _____

D. Fuel/Chemical Storage Tanks, Drums and Pipelines

1. Are there any above ground or underground gasoline, diesel, fuel oil or other chemical storage tanks on the Property? _____
2. If so, please describe substances stored and capacity of tank(s). _____
3. Have the tanks been inspected or tested for leakage? When was the most recent test? What were the results? _____
4. Are any other chemicals stores on the Property in drums or other containers? If so, please describe the substances, quantities stored, and types of containers. _____
5. Have there been any spills, leaks, or release of chemicals on the Property? If so, please describe the chemicals and quantities released, any clean-up measures taken, and the results of any soil or groundwater samples performed to detect the presence of the chemicals spilled, leaked, or released on the Property. _____
6. Please attach copies of any permits or licenses pertaining to the use, storage, handling or disposal of chemicals on the Property.

E. Air Emission

1. Describe air emissions from each source of air pollutants, including fuel burning equipment (describe type of fuel burned), on the Property. _____
2. Describe air pollution control equipment used to reduce emissions for each source of air emissions. _____
3. Are air emissions monitored? If so, indicate frequency of monitoring. _____
4. Please attach copies of any air permits or licenses pertaining to operations of the Property.

F. Water Discharges

1. List all sources of waste discharges to surface waters, septic systems, or holding ponds. _____

2. List all sources of waste water discharged to public sewer systems. _____
3. For each discharge, list the average daily flow. _____
4. Please attach copies of any water discharge permits or licenses pertaining to operations on the Property.

G. Waste Disposal

1. Describe the types of liquid wastes (other than waste water described in Part F above) and solid wastes generated at the Property. _____
2. Describe how the liquid and solid wastes generated at the Property are disposed. _____
3. Please attach copies of any waste disposal permits or licenses pertaining to operations on the Property.

H. If the Property has been or is used for industrial purposes, the following additional information should be provided.

1. Has the Property been used for disposal of any liquid or solid waste? If so, describe the location of all disposal sites, the type of wastes disposed at each site, the results of any soil or groundwater samples taken in the vicinity of each site, and the manner in which each site not presently in use as closed. _____
2. Have evaporation or storage ponds been located on the Property? If so, describe the location of all ponds, the type of wastes placed in each pond, the results of any soil or ground water samples taken in the vicinity of each pond, and the manner in which each pond not presently in use was closed. _____
3. Have wastes water treatment facilities, such as acid neutralization vaults, been located on the Property? If so, please describe the location of all facilities, the type of wastes treated in each facility, the results of any soil or groundwater samples taken in the vicinity of each facility, and the manner in which each facility not presently in use was closed. _____
4. Are the raw chemical or waste chemical storage areas on the Property? If so, please describe the location of all such areas, the type of products or wastes stored in each area, the amount of precuts or wastes stored in each area, the results of any soil or groundwater samples taken in the vicinity of each are, and the manner in which each area not presently in use was closed. _____

I. If the Property has been or is used for agricultural purposes, the following additional information should be provided.

1. Have pesticides, herbicides, or other agricultural chemicals been applied to the Property? If so, please describe the locations where such pesticides, herbicides or chemicals were applied, the type of pesticides, herbicides or chemicals applied in each area, and the results of any soil or groundwater analyses performed to detect pesticides, herbicides or chemicals used at the site. _____
2. Have pesticides, herbicides or other agricultural chemicals been mixed, formulated, rinsed, or disposed of on the Property? If so, please describe the locations where such pesticides, herbicides or chemicals were mixed, formulated, rinsed, or disposed, the type of pesticides, herbicides or chemicals mixed, formulated, rinsed or disposed of at each location and the results of any soil or ground water analyses performed to detect pesticides, herbicides or chemicals mixed formulated, rinsed or disposed at the site. _____

As the present owner of the Property or as an officer or a general partner of the present owner of the Property (or the duly authorized representative of such owner), I am familiar with all of the operations presently conducted on the Property, have made a diligent inquiry into the former uses of the Property and hereby certify to and for the benefit of the Purchase/Lender that to the best of my knowledge, information and belief the information disclosed above is true, correct, and complete.

Signature _____ Print or type name _____

ATTACHMENT "A"

A. Current/Former Uses of the Property

1. Name of current and all former owner(s) Former owners: Mr. Howard Golem and Mrs. Arleen Golem; Current owner: Golem Family Trust, Richard Cromwell III as Trustee
2. Description of current use(s) of the Property (if other than office use exclusively, please provide name(s) of current occupant(s) and date(s) of occupancy) Residential (Mr. Roberto Reyes maintains the property) and Commercial (Brammer Farms, operated by Mr. Bill Brammer)
3. Date of completion of original construction and any substantial renovations (including tenant improvement) Unknown to Trustee
4. Name(s) of previous occupant(s) Unknown to Trustee
5. Description of previous use(s) of the Property Ranching
6. Description of use(s) of adjacent properties Residential

B. Asbestos

1. Is there asbestos currently in any of the construction materials contained in the building(s)? Unknown to Trustee
2. If so, has a survey been conducted to assess the type, amount, location and condition of asbestos? (If so, please attach a copy of any survey report.) N/A
3. Has asbestos air samples been taken? If so, what are the results? N/A

C. Polychlorinated Biphenyl ("PCBs")

1. Have polychlorinated biphenyl (PCBs) been used in electrical transformers, capacitors or other equipment at the Property? Unknown to Trustee
2. If so, please describe the use and quantity of PCBs used on the Property. N/A

D. Fuel/Chemical Storage Tanks, Drums and Pipelines

1. Are there any above ground or underground gasoline, diesel, fuel oil or other chemical storage tanks on the Property? Yes, above-ground fuel storage tanks
2. If so, please describe substances stored and capacity of tank(s). Gas and diesel tanks. Capacity unknown
3. Have the tanks been inspected or tested for leakage? When was the most recent test? What were the results? Monthly inspections by Brammer Farms
4. Are any other chemicals stores on the Property in drums or other containers? If so, please describe the substances, quantities stored, and types of containers. Trustee not aware of any chemical storage
5. Have there been any spills, leaks, or release of chemicals on the Property? If so, please describe the chemicals and quantities released, any clean-up measures taken, and the results of any soil or groundwater samples performed to detect the presence of the chemicals spilled, leaked, or released on the Property. Trustee is not aware of any spills, leaks, or release of chemicals on Property
6. Please attach copies of any permits or licenses pertaining to the use, storage, handling or disposal of chemicals on the Property. N/A

E. Air Emission

1. Describe air emissions from each source of air pollutants, including fuel burning equipment (describe type of fuel burned), on the Property. Trustee is only aware of farming equipment used by Brammer Farms
2. Describe air pollution control equipment used to reduce emissions for each source of air emissions. Unknown to Trustee
3. Are air emissions monitored? If so, indicate frequency of monitoring. Unknown to Trustee
4. Please attach copies of any air permits or licenses pertaining to operations of the Property. N/A

F. Water Discharges

1. List all sources of waste discharges to surface waters, septic systems, or holding ponds. Both homes use septic system
2. List all sources of waste water discharged to public sewer systems. Unknown to Trustee
3. For each discharge, list the average daily flow. N/A
4. Please attach copies of any water discharge permits or licenses pertaining to operations on the Property. N/A

G. Waste Disposal

1. Describe the types of liquid wastes (other than waste water described in Part F above) and solid wastes generated at the Property. Trustee is only aware of solid waste typically generated by a residential home
2. Describe how the liquid and solid wastes generated at the Property are disposed. Hauled by EDCO weekly
3. Please attach copies of any waste disposal permits or licenses pertaining to operations on the Property. N/A

H. If the Property has been or is used for industrial purposes, the following additional information should be provided.

1. Has the Property been used for disposal of any liquid or solid waste? If so, describe the location of all disposal sites, the type of wastes disposed at each site, the results of any soil or groundwater samples taken in the vicinity of each site, and the manner in which each site not presently in use as closed. Trustee is not aware of any liquid or solid waste disposal on Property
2. Have evaporation or storage ponds been located on the Property? If so, describe the location of all ponds, the type of wastes placed in each pond, the results of any soil or ground water samples taken in the vicinity of each pond, and the manner in which each pond not presently in use was closed. N/A
3. Have wastes water treatment facilities, such as acid neutralization vaults, been located on the Property? If so, please describe the location of all facilities, the type of wastes treated in each facility, the results of any soil or groundwater samples taken in the vicinity of each facility, and the manner in which each facility not presently in use was closed. N/A
4. Are the raw chemical or waste chemical storage areas on the Property? If so, please describe the location of all such areas, the type of products or wastes stored in each area, the amount of precuts or wastes stored in each area, the results of any soil or groundwater samples taken in the vicinity of each are, and the manner in which each area not presently in use was closed. N/A

I. If the Property has been or is used for agricultural purposes, the following additional information should be provided.

1. Have pesticides, herbicides, or other agricultural chemicals been applied to the Property? If so, please describe the locations where such pesticides, herbicides or chemicals were applied, the type of pesticides, herbicides or chemicals applied in each area, and the results of any soil or groundwater analyses performed to detect pesticides, herbicides or chemicals used at the site. Trustee is not aware of any chemicals having been applied to the Property
2. Have pesticides, herbicides or other agricultural chemicals been mixed, formulated, rinsed, or disposed of on the Property? If so, please describe the locations where such pesticides, herbicides or chemicals were mixed, formulated, rinsed, or disposed, the type of pesticides, herbicides or chemicals mixed, formulated, rinsed or disposed of at each location and the results of any soil or ground water analyses performed to detect pesticides, herbicides or chemicals mixed formulated, rinsed or disposed at the site. N/A

I, Richard Cromwell, III, the Successor Trustee of the Golem Family Trust, have never used or occupied the property located at 16919 Four Glee Road, San Diego, CA 92127-2630. In order to respond to this Environmental Questionnaire and Disclosure Statement, my attorney, William B. Treitler, spoke to the caretaker for the property, Mr. Roberto Reyes, and spoke to the tenant farmer who farms a portion of the property, Mr. Bill Brammer. Based upon my limited personal knowledge of the condition of the property, and the inquiry that has been made on my behalf of said caretaker and tenant farmer, I hereby certify to and for the benefit of the Purchaser/Lender that, to the best of my knowledge, information and belief, the information disclosed herein is true, correct and complete. However, due to the fact that I have never occupied or used the property it is recommended that the Purchaser conduct its own investigation with respect to the condition of the property, including, but not limited to, an environmental assessment, and should not rely upon the limited information provided by this Environmental Questionnaire and Disclosure Statement. The Purchaser is acquiring the property on an "As Is" basis, and is not acquiring the property based upon the limited representations of the Seller regarding the condition of the property.

Executed this 4th day of March, 2010.

Richard Cromwell, III
Successor Trustee,
Golem Family Trust

HAZARDOUS MATERIALS BUSINESS PLAN
CERTIFICATION STATEMENT

The California Health & Safety Code (H&SC), Division 20, Chapter 6.95, Section 25505 provides after submission of a complete Hazardous Materials Business Plan (HMBP), a business handling hazardous materials must annually submit 1. hazardous materials inventory, 2. list of emergency contacts, and 3. site plan,.

The business must certify that a complete HMBP has been prepared and is maintained at the site where the hazardous materials are stored. A complete HMBP includes the items to be submitted to the Hazardous Materials Division and an Emergency Response Plan and Employee Training Plan, as established in H&SC Section 25504. The business must certify the HMBP is current and maintained on site. See back for instructions and further clarification.

16919 FOUR GEE ROAD
CITY SAN DIEGO CA ZIP CODE 92127

II. CERTIFICATION STATEMENT

Check only one of the following boxes:

- INITIAL CERTIFICATION: This is to certify (H&SC Section 25505(e)(1)) that a complete HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, has been prepared and is maintained at the site where the hazardous materials are stored.
ANNUAL CERTIFICATION: This is an annual certification (H&SC Section 25505(d)&(e)(2)) that the HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, is current and includes all the information required in H&SC Section 25504, and 25509, and is maintained at the site where the hazardous materials are stored. Attached are changes to the hazardous materials inventory and/or list of emergency contacts. For site map revisions, submit only the pages that have a change or revision and attach to this certification.
CERTIFICATION OF CHANGES/REVISIONS: This is to certify that the HMBP has been reviewed (H&SC Section 25505(c) & 25510) and all necessary changes/revisions have been made. The HMBP is current and is maintained at the site where the hazardous materials are stored. Attached are changes to the hazardous materials inventory and/or list of emergency contacts. For site map revisions, submit only the pages that have a change or revision and attach to this certification.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION

The California Health & Safety Code (H&SC), Division 20, Chapter 6.95, Section 25505 provides for the following:
 The San Diego County, Department of Environmental Health, Hazardous Materials Division (HMD), as the administering agency, requires a business that handles hazardous materials to submit the hazardous materials inventory, a list of emergency contacts, and a site plan, in lieu of a complete Hazardous Materials Business Plan (HMBP), only after the initial submittal of a complete HMBP. The business must certify that a complete HMBP has been prepared and is maintained at the site where the hazardous materials are stored. A complete HMBP includes the items to be submitted to the HMD and an Emergency Response Plan and Employee Training Plan, as established in H&SC Section 25504. The business must also annually certify that the HMBP is current and maintained on site. See Back for instructions and further clarification.

II. CERTIFICATION STATEMENT

CARCINOGEN/REPRODUCTIVE TOXIN ANNUAL RENEWAL WITHOUT CHANGES: This is an annual renewal to certify that the list of carcinogens and/or reproductive toxins last provided is a current list as specified in the San Diego County Code of Regulatory Ordinances Section 68.1113.

Check only one of the following boxes:

INITIAL CERTIFICATION: This is to certify (H&SC Section 25505(e)(1)) that a complete HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, has been prepared and is maintained at the site where the hazardous materials are stored.

ANNUAL CERTIFICATION WITHOUT CHANGES: This is an annual certification (H&SC Section 25505(d)&(e)(2)) that the HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, is current and includes all the information required in H&SC Section 25504, and 25509, and is maintained at the site where the hazardous materials are stored.

CERTIFICATION OF CHANGES/REVISIONS: This is to certify that the HMBP has been reviewed (H&SC Section 25505(c) & 25510) and all necessary changes/revisions have been made. The HMBP is current and is maintained at the site where the hazardous materials are stored. Attached are changes to the hazardous materials inventory and/or list of emergency contacts. For site map revisions, submit only the pages that have a change or revision and attach to this certification. This submittal satisfies annual certification requirements specified in H&SC Section 25505(d)&(e)(2).

As an Authorized Representative, I certify under the penalty of law, that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete. By checking any of the boxes above I also certify that : a) The information contained in the hazardous materials inventory most recently submitted to the CUPA or Administrative Agency is complete, accurate, and up to date; b) There has been no change in the quantity of hazardous materials reported in the most recently submitted inventory; and c) All hazardous materials subject to inventory requirements are listed on the most recently submitted inventory.

RE: Request for Records

Dear Fire Marshal Hill:

Coast 2 Coast Environmental is conducting a Phase I Environmental Site Assessment of the following Property:

- **Former Four Gee Ranch Homestead, 16919 Four Gee Road (historically 9654 Artesian Road), San Diego, CA 92127**

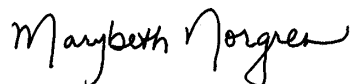

We are interested in reviewing any records concerning spills or environmental emergency responses or inspection records maintained by your department for the Property.

We have also contacted the County of San Diego Department of Environmental Health. However, we are also required to contact the local fire department to find if they have additional records which provide information about the environmental condition of a property.

If records are available, please contact me to schedule an appointment to review them. I may be reached at 619-889-6232 or C2CEnvironmental@AOL.com.

Thank you for your assistance.

Sincerely,

Marybeth Norgren
Principal

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION STATEMENT

The California Health & Safety Code (H&SC), Division 20, Chapter 6.95, Section 25505 provides after submission of a complete Hazardous Materials Business Plan (HMBP), a business handling hazardous materials must annually submit 1. hazardous materials inventory, 2. list of emergency contacts, and 3. site plan,.

The business must certify that a complete HMBP has been prepared and is maintained at the site where the hazardous materials are stored. A complete HMBP includes the items to be submitted to the Hazardous Materials Division and an Emergency Response Plan and Employee Training Plan, as established in H&SC Section 25504. The business must certify the HMBP is current and maintained on site. See back for instructions and further clarification.

I. IDENTIFICATION

FACILITY ID# 3 7 0 0 0 207039

BUSINESS NAME (Same as FACILITY NAME or DBA - Doing Business As) **BE WISE RANCH**

BUSINESS SITE ADDRESS **16919 FOUR GEE ROAD**

CITY **SAN DIEGO** CA ZIP CODE **92127**

II. CERTIFICATION STATEMENT

Check only one of the following boxes:

INITIAL CERTIFICATION: This is to certify (H&SC Section 25505(e)(1)) that a complete HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, has been prepared and is maintained at the site where the hazardous materials are stored.

ANNUAL CERTIFICATION: This is an annual certification (H&SC Section 25505(d)&(e)(2)) that the HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, is current and includes all the information required in H&SC Section 25504, and 25509, and is maintained at the site where the hazardous materials are stored. Attached are changes to the hazardous materials inventory and/or list of emergency contacts. For site map revisions, submit only the pages that have a change or revision and attach to this certification.

CERTIFICATION OF CHANGES/REVISIONS: This is to certify that the HMBP has been reviewed (H&SC Section 25505(c) & 25510) and all necessary changes/revisions have been made. The HMBP is current and is maintained at the site where the hazardous materials are stored. Attached are changes to the hazardous materials inventory and/or list of emergency contacts. For site map revisions, submit only the pages that have a change or revision and attach to this certification.

AS AN AUTHORIZED REPRESENTATIVE, I CERTIFY UNDER THE PENALTY OF LAW, THAT I HAVE PERSONALLY EXAMINED AND AM FAMILIAR WITH THE INFORMATION SUBMITTED AND BELIEVE THE INFORMATION IS TRUE, ACCURATE, AND COMPLETE.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION

The California Health & Safety Code (H&SC), Division 20, Chapter 6.95, Section 25505 provides for the following:
 The San Diego County, Department of Environmental Health, Hazardous Materials Division (HMD), as the administering agency, requires a business that handles hazardous materials to submit the hazardous materials inventory, a list of emergency contacts, and a site plan, in lieu of a complete Hazardous Materials Business Plan (HMBP), only after the initial submittal of a complete HMBP. The business must certify that a complete HMBP has been prepared and is maintained at the site where the hazardous materials are stored. A complete HMBP includes the items to be submitted to the HMD and an Emergency Response Plan and Employee Training Plan, as established in H&SC Section 25504. The business must also annually certify that the HMBP is current and maintained on site. See Back for instructions and further clarification.

STATE	CA
ZIP CODE	92127

II. CERTIFICATION STATEMENT

CARCINOGEN/REPRODUCTIVE TOXIN ANNUAL RENEWAL WITHOUT CHANGES: This is an annual renewal to certify that the list of carcinogens and/or reproductive toxins last provided is a current list as specified in the San Diego County Code of Regulatory Ordinances Section 68.1113.

Check only one of the following boxes:

INITIAL CERTIFICATION: This is to certify (H&SC Section 25505(e)(1)) that a complete HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, has been prepared and is maintained at the site where the hazardous materials are stored.

ANNUAL CERTIFICATION WITHOUT CHANGES: This is an annual certification (H&SC Section 25505(d)&(e)(2)) that the HMBP, which includes the hazardous materials inventory, a list of emergency contacts, a site plan, emergency response plan, and employee training plan, is current and includes all the information required in H&SC Section 25504, and 25509, and is maintained at the site where the hazardous materials are stored.

CERTIFICATION OF CHANGES/REVISIONS: This is to certify that the HMBP has been reviewed (H&SC Section 25505(e) & 25510) and all necessary changes/revisions have been made. The HMBP is current and is maintained at the site where the hazardous materials are stored. Attached are changes to the hazardous materials inventory and/or list of emergency contacts. For site map revisions, submit only the pages that have a change or revision and attach to this certification. This submittal satisfies annual certification requirements specified in H&SC Section 25505(d)&(e)(2).

As an Authorized Representative, I certify under the penalty of law, that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete. By checking any of the boxes above I also certify that: a) The information contained in the hazardous materials inventory most recently submitted to the CUPA or Administrative Agency is complete, accurate, and up to date; b) There has been no change in the quantity of hazardous materials reported in the most recently submitted inventory; and c) All hazardous materials subject to inventory requirements are listed on the most recently submitted inventory.

Good afternoon: I found no Air Pollution Control records for above addresses. Thanks.

APPENDIX F

SCOPE OF WORK

The general purpose of the Phase I ESA will be to find recognized environmental conditions which may indicate hazardous substances or petroleum products have been released at the Property, whether the result of current or past activities on or near the Property. Coast 2 Coast endeavors to meet the criteria for "due diligence" as described in the Federal Superfund law and to meet the criteria of the American Society for Testing and Materials (ASTM) Standard E1527-13.

Scope of Services

The scope of services will include:

- Development of an environmental history of the Property including agricultural, industrial, manufacturing or other operations which may have involved the presence of petroleum or other hazardous substances on the Property. Sources of information may include current ownership records, plat plans, assessor's records, oil and gas maps, building permit records, tenant lists, city and crisscross directories, fire insurance maps, aerial photograph review, interviews with persons knowledgeable about the Property, and interviews with hazardous materials response personnel concerning on site spills or releases of petroleum or hazardous substances. A fifty-year chain-of-title and a search for environmental liens will not be provided as part of this assessment but existing title documents will be reviewed if they are made available by the client to Coast 2 Coast.
- Review topographic, geologic and hydrogeologic literature to establish surface and subsurface conditions, including groundwater depth and flow direction and water quality, if available;
- Conduct a detailed visual site inspection to document the present condition of the Property with respect to the current or past use of petroleum or other hazardous substances on the Property, including the presence of above or below ground storage tanks, electrical equipment that may contain polychlorinated biphenyl (PCB) oil, potential asbestos-containing materials, potential lead-based painted surfaces, drainage patterns onto and leaving the Property, septic systems, impoundments, sumps and other conditions that may create the risk of environmental liability or impairment;
- If petroleum or hazardous substances are or have been used on the Property, Coast 2 Coast will review management practices for the materials, including generation, use, storage, treatment, recycling and disposal; inventory acutely hazardous materials and other hazardous materials in containers larger than five gallons; and review Material Safety Data Sheets (MSDS) and disposal permits required by the Resource Conservation and Recovery Act (RCRA);
- Observe adjoining site usage and attempt to find information indicating whether the adjoining site has adversely affected the Property, including the review of aerial photographs of adjoining and nearby sites;
- Review records and databases, as required by ASTM Standard E1527-13, from federal, state, regional and local agencies to find if current or previous land uses or Property improvements could have generated hazardous substances or petroleum. An attempt will also be made to

find the current regulatory status and to find if nearby sites may be hazardous sites with the potential to affect the Property. Where there are duplicate federal and state sources of information for the Property, Coast 2 Coast will review the most updated source.

- The written report will document the findings of the ESA including an executive summary and Coast 2 Coast's conclusions and recommendations as to whether the Property is or is not environmentally impaired or whether additional information needs to be obtained. The report will also include:

A statement of the scope of the assessment;

A physical and geological description of the Property;

A location map and a site map;

A summary of the available site history;

A summary of the records review;

A summary of the Property and area reconnaissance;

A description of the hazardous substances storage and the hazardous waste management practices on the Property;

A brief description of the historical resources reviewed;

Conclusions;

Recommendations;

References.
