To: CAP
Subject: (CAP) Greenhouse Gas (GHG) Reduction Strategies and Measures
Date: Saturday, September 16, 2017 3:22:53 PM

Dear Sirs,

Roundabouts significantly decrease fuel consumption and emissions and should be added as a Climate Action Plan strategy to reduce HG emissions.

According to the San Diego Air Pollution Control District (APCD) document on Modern Roundabouts, each roundabout can eliminate 189 metric tons of CO2 emissions annually. As noted in the APCD document, in addition to other significant multi-modal benefits including increased safety for vehicles.

Thank you for adding roundabout to the CAP GHG emission reduction strategies.

Sincerely,

Judith Shadzi
