Comment Letter I96

Dene Susan Harris-

I'm protesting the proposed
Solar Cell Installation Project in
Jacumba, Ca.

I96-1

We are working on developing
a town that reflects this history & unique
identity & once again we're being
threatened from doing so.

I96-2

We have a SP that once was
the go to place of movie stars
& people the world over. Then a bypass
was put around the town & the town ~~could~~ lost
business. It really hasn't been the same
since then. But now I 80 highway -
Jacumba Airport - ~~is~~ plans already going
on have promised to bring back
Jacumba as a tourist attraction & place
to live -

I96-3

Once again we are being threatened.
Some ~~foreign~~ ~~country~~ ~~outlier~~ people from
foreign country want to put up a
fence & idea & once again
they're our dreams -

I96-4

Fencing - "Chain link fence" will
provide an eye sore - certainly not
complementing our vision of what we want our
town to be -

I96-5

Ground water which we depend on
Construction will use 140 c.f.
Water from existing ~~ex~~ project
Area wells then likely needed to
wash panels 4 x's annually.

196-6

There will be increase risk of
fire hazards for high power equipment
There potential for our town
experiencing a significant increase of
MAY be 36 degrees warmer. It's called
a potential "heat island effect".

196-8

Then there's noise. Humming
24 hours a day along with
panel motors noise I can
only imagine how our dogs are going
to react to that God help us then.

196-9

There is so much wrong with this
Even being thrown our land off
Seems like Jacumba is the dumping off
sites of unsightly things -- Organic farm
Causes so many yards they actually stopped
the Isenberg. Then they sent every
several peers to Jacumba to live -

196-10

We could see to realize our dreams
of having our dream of having a really
good one - Please stop this
Project - let us build -

196-11
