Please protect our rural and agricultural communities.

1. The process needs to be fair and equitable to rural and agricultural communities.
2. Mapping should protect rural interests and represent Communities of Common Interest in the rural areas of San Diego County.
3. Don't split unincorporated communities, these communities need adequate representation in government decision making.
4. Agricultural communities should not be split, they must be considered Communities of Common Interest and they need adequate representation in government decision making.
5. Special districts, school districts and water districts covering rural areas should not be separated.

Thank you!
