I oppose further changes to the County of San Diego district boundaries. The voters should be able to vote on changes to their own jurisdictions. I also would like to know if the Independent Redistricting Commission is going to make the final decisions on the boundaries. Why? I was not satisfied with the previous congressional district boundary changes made between the 2018 and 2020 elections. Please remember that the Constitution of the United States creates representatives based on population not on "gerrymandering".
