SAIC 10

What is SALC?

SALC stands for the **Sustainable Agricultural** Lands Conservation Grant Program which was created in 2014 as a component of the California Strategic Growth Council and administered by the California Department of Conservation (DOC).

The Program invests in agricultural land conservation with revenue from cap-andtrade auction proceeds (emissions trading) via the California Climate Investments (CCI) Fund, made available for projects that help reduce greenhouse gas (GHG) emissions.

Collaboration

The SALC 1.0 project was performed in collaboration with the Resource Conservation District of Greater San Diego County as well as several local producers and stakeholders.

Goals

- Protect at-risk agricultural lands from sprawl development to promote growth within existing jurisdictions, ensure open space remains available, and support a healthy agricultural economy
- Further the purposes of Assembly bill 32 by avoiding increases ingreenhouse gase missions associated with the conversion of agricultural land to more GHG-intensive nonagricultural uses

Objectives

- 2. Facilitate producer needs assessments and working group discussions to understand local concerns
- 3. Take inventory of existing policies at local, regional, and state level

Results

- Feedback from producer needs assessment identified 3 main issues: land access, water availably and efficiency, and workforce development
- Identified 10 policy recommendations spanning across multiple crop types, demographics, and regions of producers across San Diego County

Mapping of historical, current, & potential agricultural lands in San Diego County

SALC1.0

Timeline

April 2021

Oct 2021 - April 2022

Dec 2021 - May 2022

March2022-Sept2022

Oct 2022 – May 2023

May 2023 - Dec 2023

LAFCO awarded \$250,000 grant in collaboration with the Resource Conservation District of Greater San Diego County

Outreach Phase Identified priority concerns among agricultural producers via a producer needs assessment and several listening sessions

Mapping Phase Mapped extent of agricultural lands and quantified co-benefits

Policy Phase policies

Vision Phase Supported stakeholders to address priority policies

presentations Provided several to stakeholders at the conclusion of the grant

Drafted Strategic Planfor addressing priority

Policy Recommendations

- use

Additional Analysis Needed

SALC 1.0 concluded -- via recommendation no. 8 -- a quantitative analysis of trends and opportunities of key cost centers for smallfarmers is needed. SALC 2.0 aims to accomplishing this byway of a market analysis while also identifying government opportunities to help bridge economic gaps.

Assign agricultural liaisons for city and county governments 2. Design lease agreements that invest in working lands 3. Create a regional land use plan to prioritize agriculture 4. Fund growers to transition to low water-use crops and irrigation 5. Equip and incentivize producers to adopt climate-smart practices 6. Streamline construction of farmworker housing

7. Develop advanced water treatment facilities with priority for agricultural

8. Inform small farming opportunities through analysis of costs and benefits of small farms

9. Expand technical assistance by providing more vocational training

10. Build capacity of farmers and farmworkers with training and services

SALC 2.0

Grant Award

- \$450,000 Awarded to LAFCO & County of San Diego
- June 2023 October 2025

Market Analysis Winter 23 - Summer 24 Identify major cost centers for agricultural operations and overall profitability countywide.

Crop Selection

Market Data Collection

> Stakeholder Meeting

> > Market Analysis Report

- region

Deliverables

Gap Analysis Summer 24 - Fall 24 Identify the "profitability gap" in four crops (strawberries, lemon, avocado, tomatoes) at the crop level. **Data Collection** Identify Mechanisms Farm Visits Conduct Gap Analysis Gap Analysis Report Stakeholder Meeting

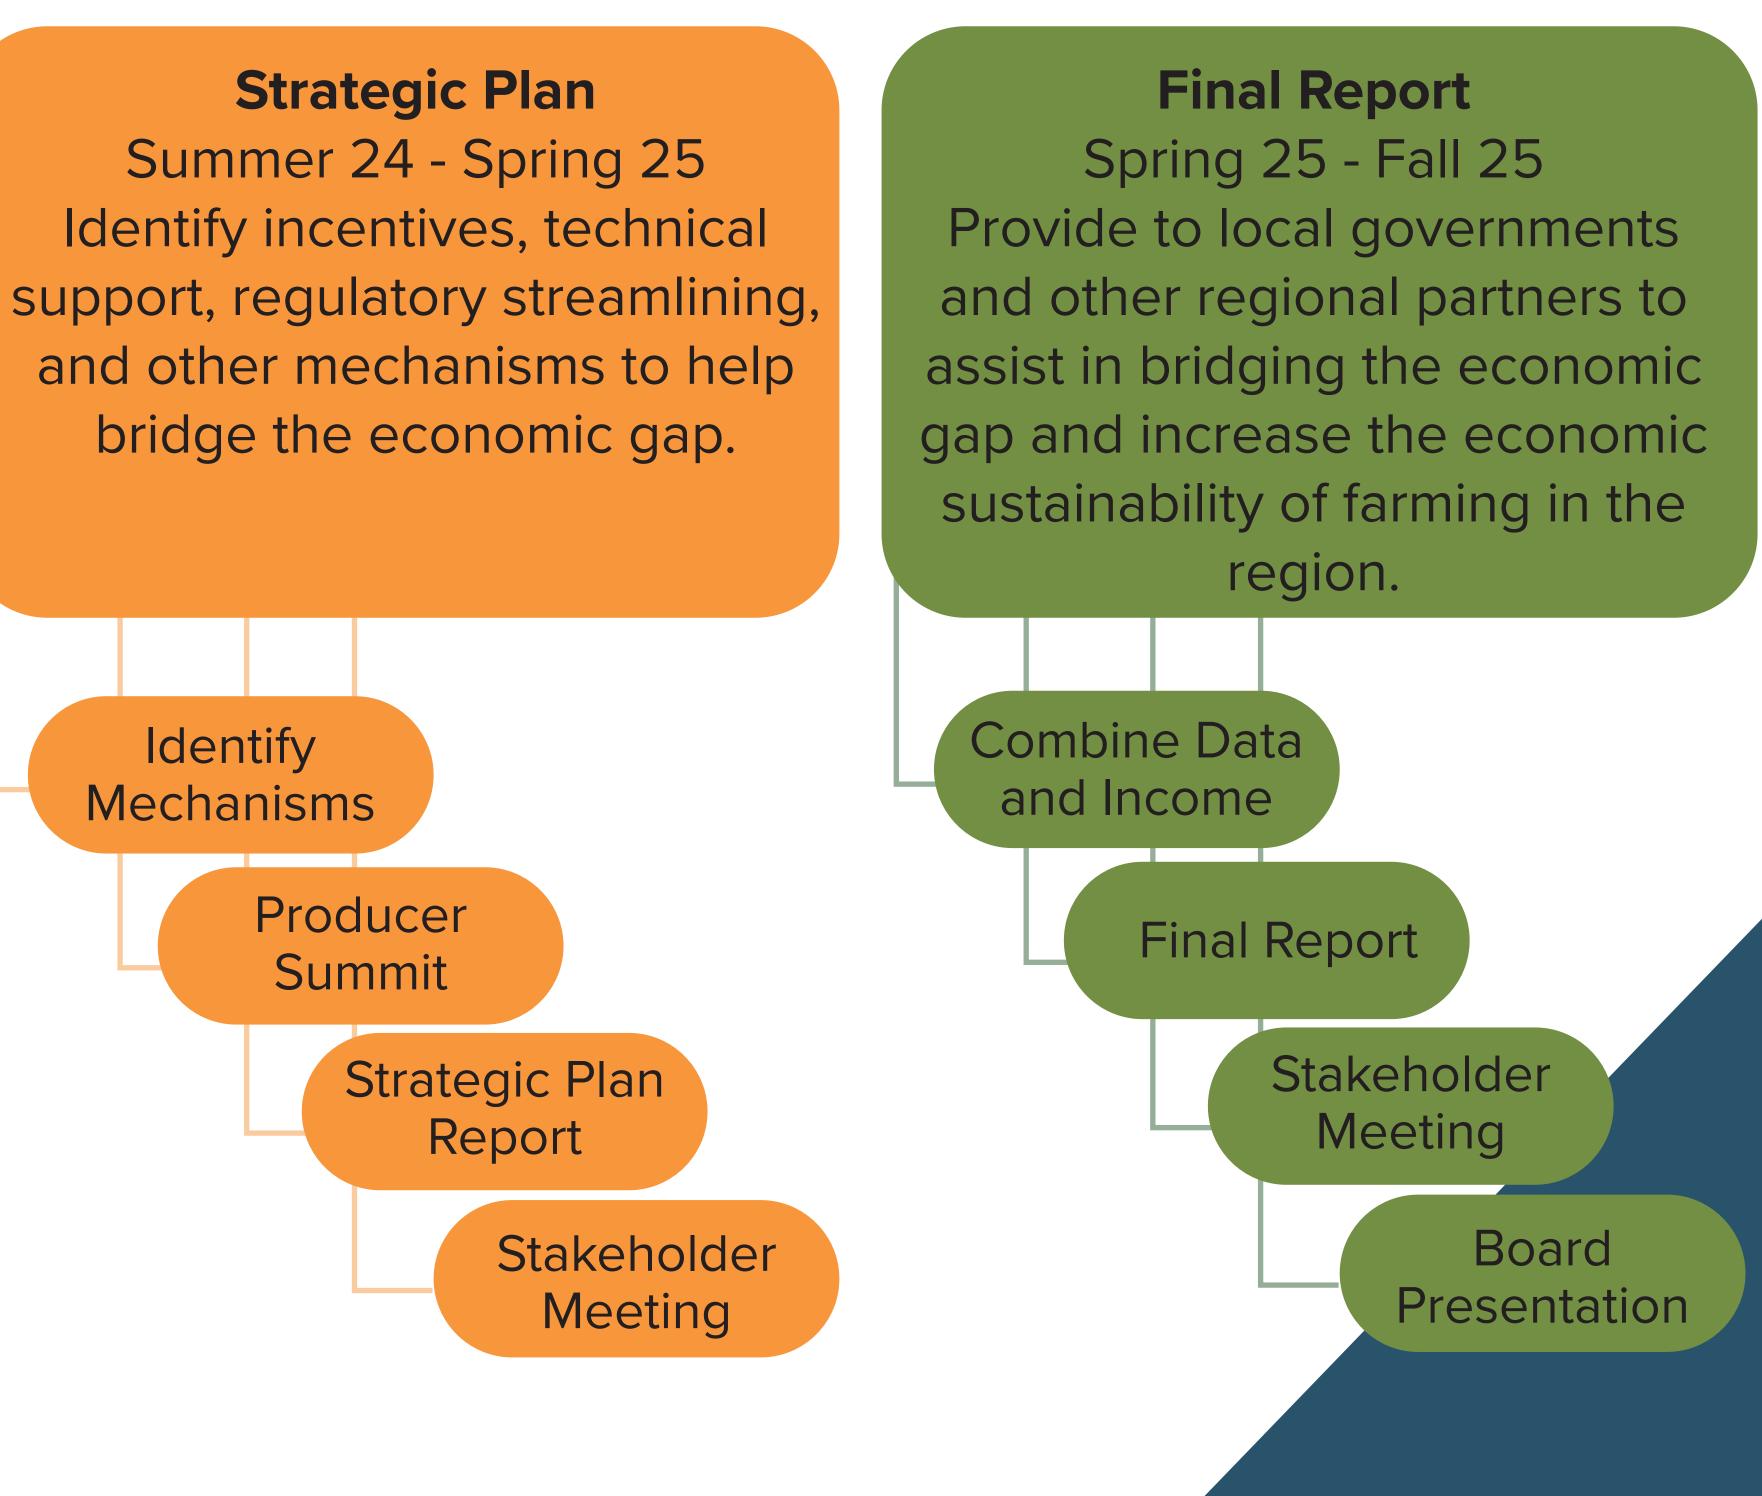

Project Objectives

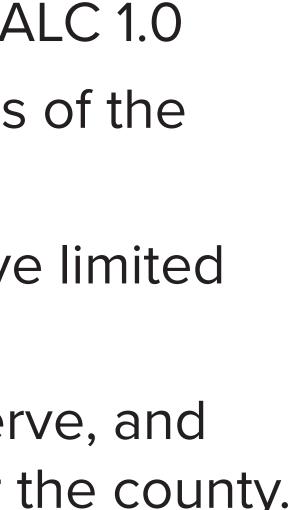

• Provide quantitative data to farmers as recommended by SALC 1.0 Provide farmers with timely market information on key crops of the

 Focus on small-scale farming operations that otherwise have limited resources and support

 Inform local agencies' decision-making to further aid, preserve, and maximize the vital contributions that small-scale farms offer the county.

PRELIMINARY FINDINGS

What Trends Exist in the Number of San Diego **County Agricultural Operations and Acres** (I.e. "How Bad is it?)

Trends in the Total Number of San Diego County Farms and Agricultural Acres (based on USDA Census of Agriculture data)

450000

Key Points

7000

- FARMS: The number of farms has dropped from 5,255 in 2002 to 4,031 in 2022. If this downward trend continues, then the predicted number of farms in 2027 will be 3,772.
- ACRES: The number of agricultural acres has dropped from 408,003 in 2002 to 179,330 in 2022. If this downward trend continues, then the predicted number of agricultural acres in 2027 will be 146,016.
- WHY THIS MATTERS: People have long had a sense that farming is on the decline in San Diego County. This analysis not only confirms and quantifies that decline, but also projects what will happen if current trends continue unabated.

Also

• SMALL FARMS: The percentage of small farms (under 10 acres) held steady from 2002 to 2022, between 60% to 70% of all farms.

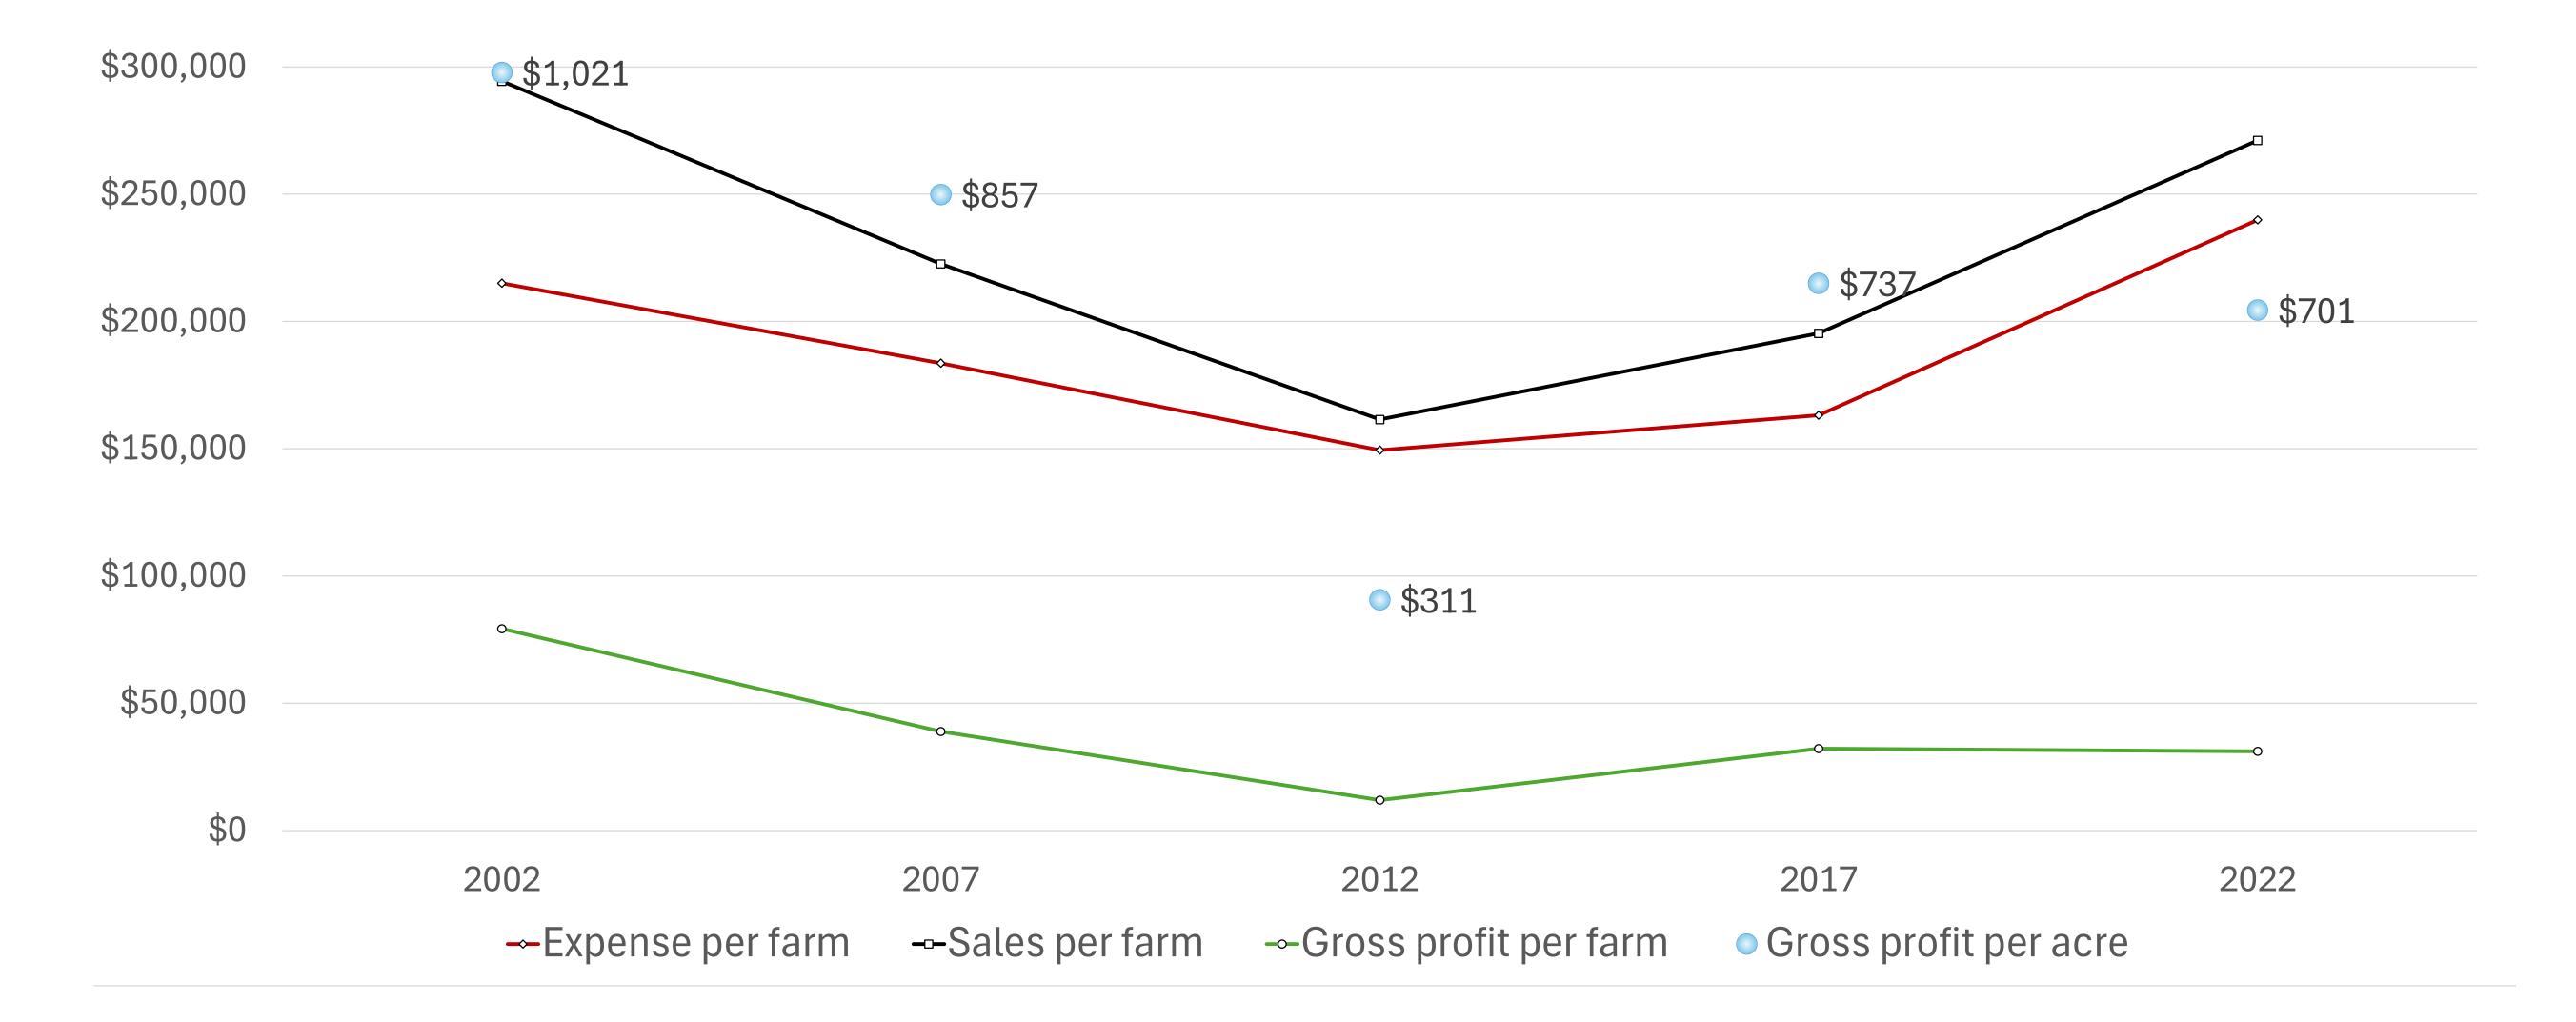

• AVERAGE SIZE: The average farm size in 2002 was 78 acres. Since 2007, the average farm size has stayed in narrow range of 38 to 45 acres. It is predicted to be 39 acres by 2027.

PRELIMINARY FINDINGS

How Profitable are San Diego County Agricultural Operations?

Sales, Expense and Profit

(Average per farm, inflation-adjusted based on 2022 Census of Agriculture Data)

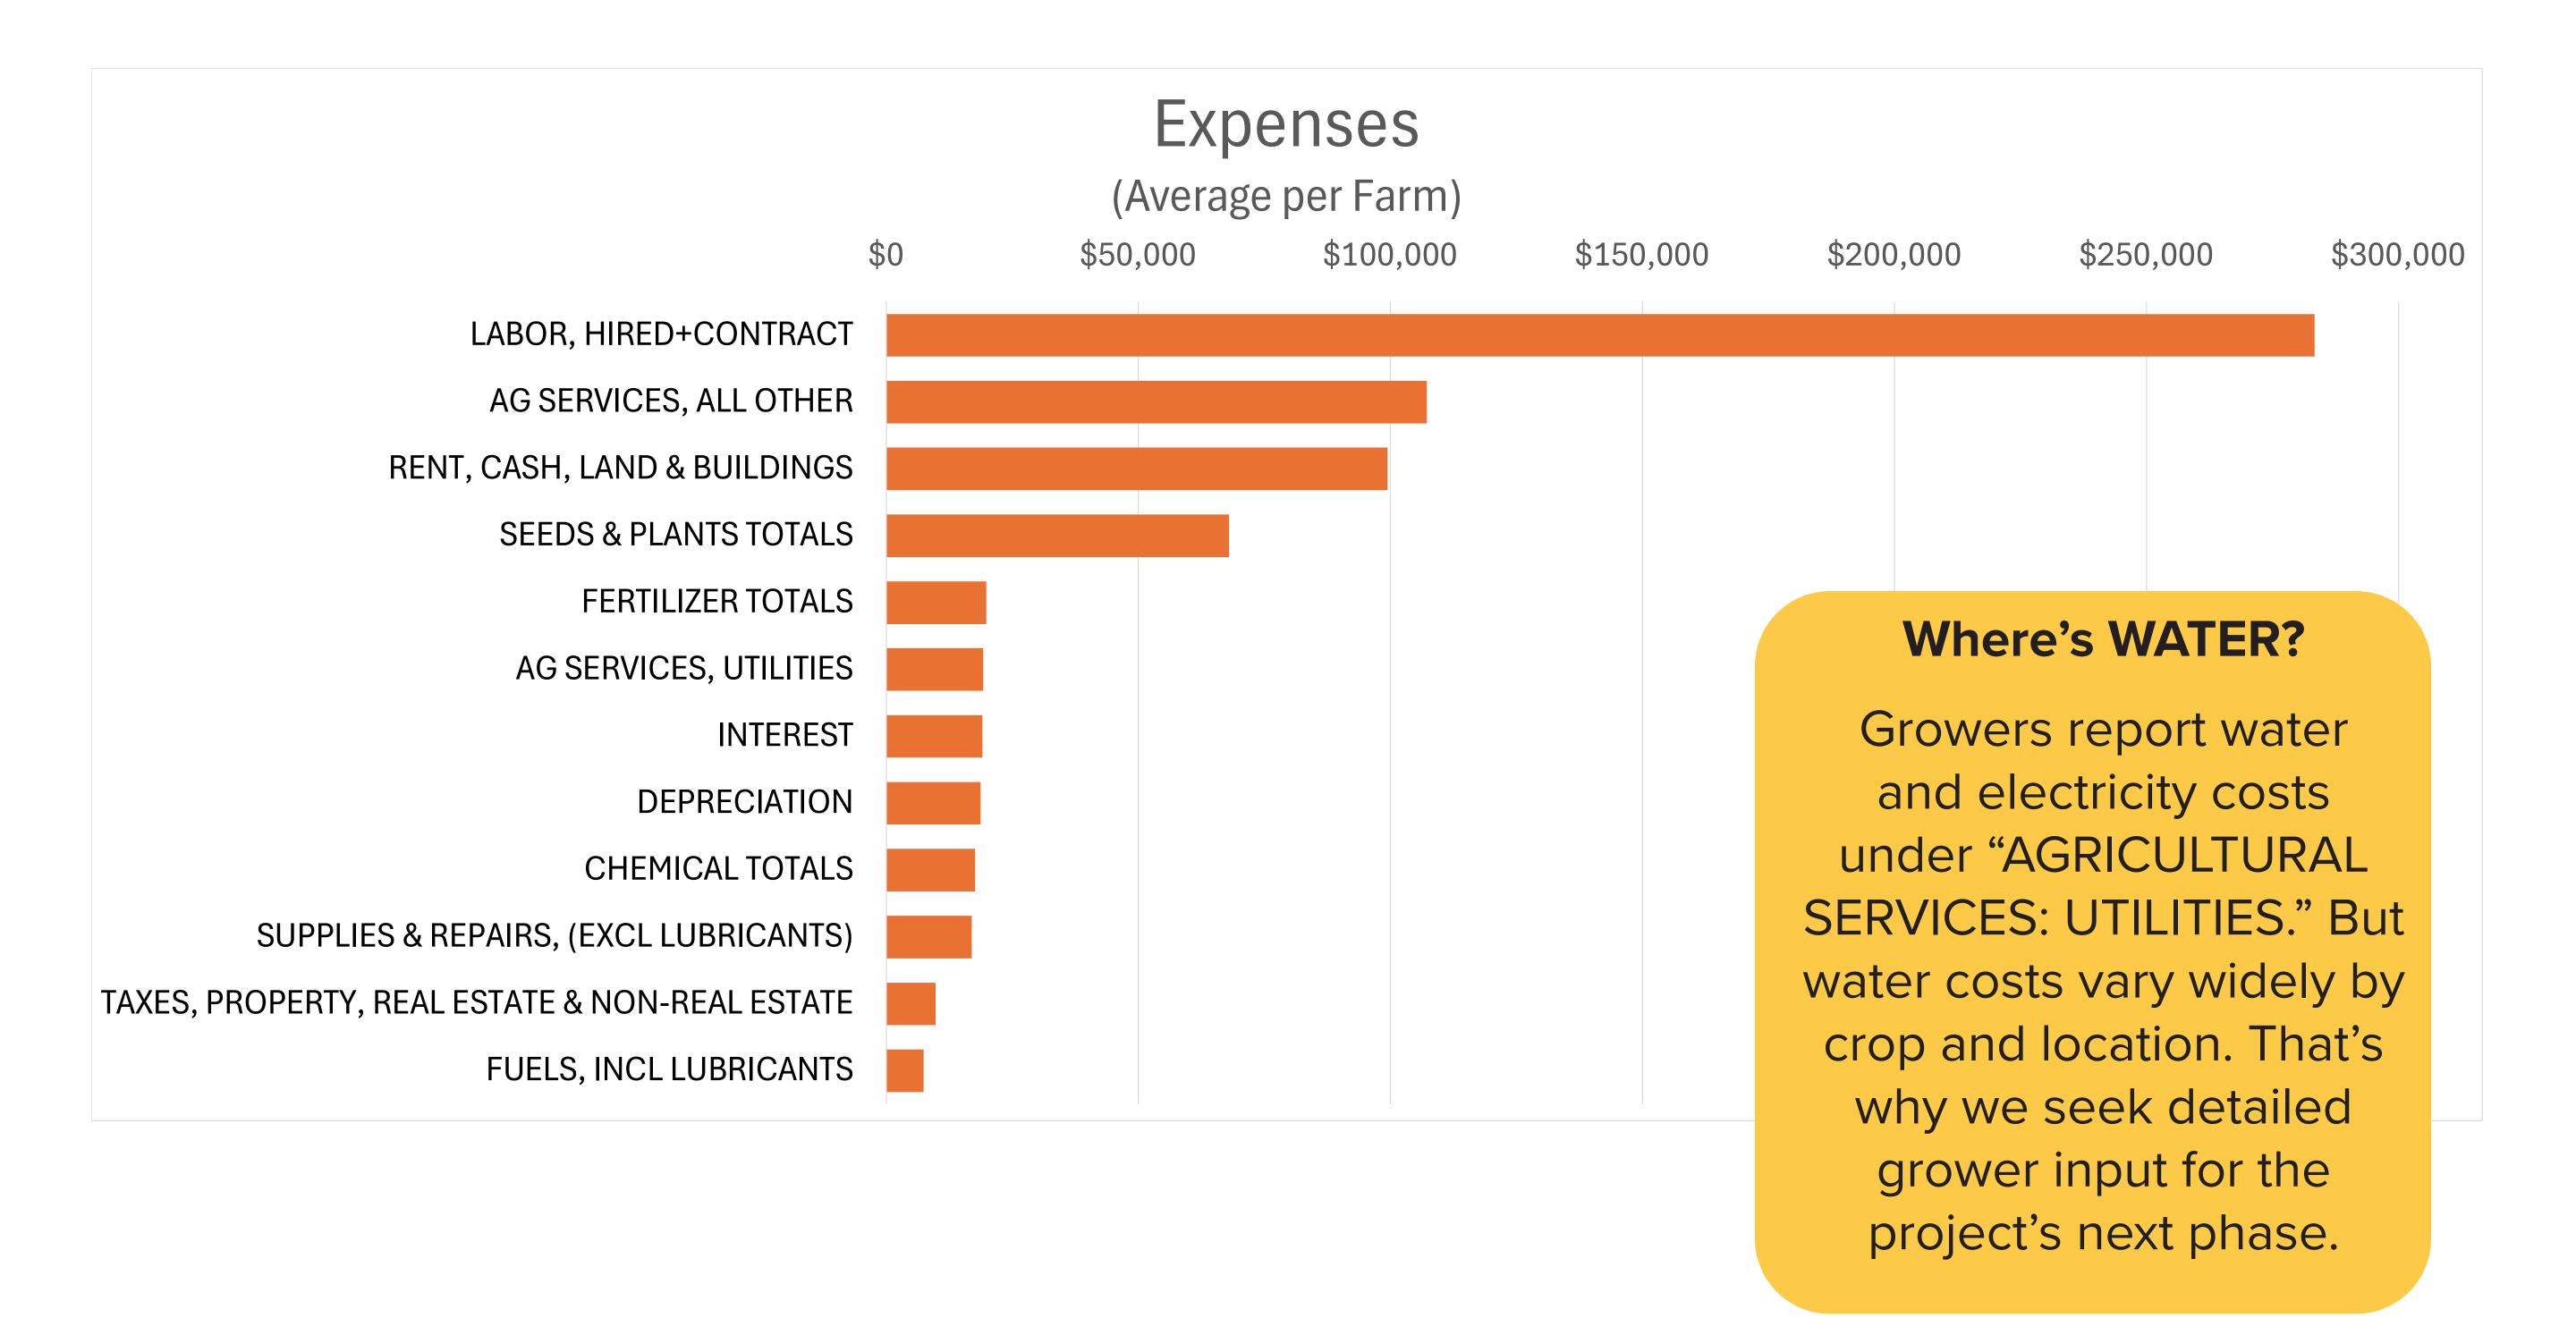

Notes

- This analysis examines gross profitability, defined as total income minus total operating costs, as reported by growers in the 2022 Census of Agriculture. The project's next phase will explore other measures of profitability, as well as profitability among specific focal crops.
- The average per-farm gross profit margin for 2022 was 13% (\$31,194 divided by \$239,935).

PRELIMINARY FINDINGS

What did San Diego County Agricultural Operations Report as their Biggest Operating Expenses for 2022?

Notes

- Source: 2022 USDA Census of Agriculture, San Diego County.
- This analysis does not reflect livestock-related expenses such as animals, feed, and veterinary services.
